Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Introduction

The International Seminar on Photonics, Optics, and Its Applications (ISPhOA 2014) was held 14–15 October 2014 in Sanur, Bali. It aimed to bring together students, scientists, and engineers involved in research and development of technologies related to photonics, optics, and its applications from colleagues of researchers and academicians, which come from diverse sub-topics in optics and photonics fields.

This event provided an opportunity to participants to disseminate their recent original research findings, discussing current issues, as well as exchange of ideas related to photonics and optics technologies. The event wished to promote the transfer of research and development outcomes into applications that match with societal and industrial needs, particularly the ones across nationwide and ASEAN regions.

I would like to thank all invited speakers that agreed to accept our invitation to share their novel and recent research achievements and expertise to other participants of the seminar. Many thanks also to the worldwide researchers and academicians who have sent their working papers to be shared and presented in the seminar forum. High appreciation is also dedicated to members of the technical committee, who helped us review and choose the submitted contributions that fulfil the scientific quality standards set for the seminar. We thank all of the sponsors from companies and societies in optics and photonics (ICO, OSA, SPIE, and InOS) that gave their valuable support to the successful organization of the seminar. Last but not least, many thanks to the university's management (in all its levels) for their total and endless support, and for facilitating the preparation and organization of the seminar.
