Volume 9447

Proceedings of SPIE 0277-786X, V. 9447

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

18th International School on Quantum Electronics: Laser Physics and Applications, edited by Tanja Dreischuh,
Sanka Gateva, Alexandros Serafetinides, Proc. of SPIE Vol. 9447, 944701 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2185058

Proc. of SPIE Vol. 9447 944701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committees</i>
xi	<i>Introduction</i>

SESSION 1 LASER SPECTROSCOPY AND METROLOGY

9447 02	Degenerate two- and three-level systems in presence of longitudinal and transverse magnetic fields (Invited Paper) [9447-71]
9447 03	Velocity anisotropy effect in pump-probe spectra of cesium in a micrometric thickness optical cell (Invited Paper) [9447-73]
9447 04	Simple method for characterization of anti-relaxation coating of optical cells (Invited Paper) [9447-74]
9447 05	Nonclassically paired photons from sources based on cold atoms (Invited Paper) [9447-77]
9447 06	Parametric non-degenerate four wave mixing in hot potassium vapor [9447-54]
9447 07	Conversion between electromagnetically induced absorption and transparency in a four-level system [9447-55]
9447 08	Influence of anti-relaxation coating of optical cells on the potassium D₁ line saturated absorption [9447-75]
9447 09	Light-induced atomic desorption dynamics in cells with different coatings [9447-41]
9447 0A	Magneto-optical resonance of the polarized fluorescence in a paraffin-coated ⁸⁷Rb vacuum cell [9447-68]
9447 0B	Investigation of the influence of strontium carbonate on fluorescence spectra of oxy-fluoride glasses doped with samarium oxide and samarium fluoride [9447-53]
9447 0C	An anisotropic stratified structure for surface plasmon excitation [9447-67]

SESSION 2 LASER-MATTER INTERACTIONS

9447 0D	LIBS and Raman spectroscopic investigation of historical copper alloy objects [9447-66]
9447 0E	Optical properties of Ag-ZnO nanostructures [9447-11]
9447 0F	Pulsed laser deposition of organic semiconductor rubrene thin films [9447-34]

- 9447 OG **Laser dispersing of WC and TiC powders in light metal alloys for wear resistance enhancement** [9447-33]
- 9447 OH **Fabrication of ZnO nanostructures by PLD** [9447-17]
- 9447 OI **Estimation of ultrashort laser irradiation effect over thin transparent biopolymer films morphology** [9447-46]
- 9447 OJ **Femtosecond laser system for micromachining of the materials** [9447-6]
- 9447 OK **Fabrication and characterization of metal nanostructures on metal substrates** [9447-19]
- 9447 OL **Influence of the scanning conditions on the characteristics of the nanostructures fabricated by laser ablation in liquid** [9447-27]
- 9447 OM **Formation of bimetallic nanoparticles by pulsed laser ablation of multicomponent thin films in water** [9447-21]
- 9447 ON **Matrix description of the differential group delay of high-speed optical communication lines with polarization mode dispersion (PMD) and polarization dependent losses (PDL)** [9447-5]
- 9447 OO **CuBr laser ablation of titanium surface** [9447-63]

SESSION 3 LASER REMOTE SENSING AND ECOLOGY

- 9447 OP **Ångström coefficients calculated from aerosol optical depth data obtained over Sofia, Bulgaria** [9447-26]
- 9447 OQ **Ceilmeter observation of Saharan dust over mountain valley of Sofia, Bulgaria** [9447-4]
- 9447 OR **Two-wavelength lidar characterization of optical, dynamical, and microphysical properties of Saharan dust layers over Sofia, Bulgaria** [9447-29]
- 9447 OS **Considerations about the lognormality of the aerosol lidar signal fluctuations** [9447-64]
- 9447 OT **Finite system response shape due distortions of the temperature and density profiles in fusion plasmas recovered using Thomson scattering lidar** [9447-23]
- 9447 OU **LIDAR detection of forest fire smoke above Sofia** [9447-72]

SESSION 4 LASERS IN BIOLOGY AND MEDICINE

- 9447 OV **Plasmon assisted optical trapping: fundamentals and biomedical applications (Invited Paper)** [9447-65]
- 9447 OW **Antimicrobial photodisinfection with Zn(II) phthalocyanine adsorbed on TiO₂ upon UVA and red irradiation** [9447-2]

- 9447 OX **Excitation-emission matrices (EEMs) and synchronous fluorescence spectroscopy (SFS) investigations of gastrointestinal tissues** [9447-48]
- 9447 OY **Laser induced autofluorescence for diagnosis of non-melanoma skin cancer** [9447-25]
- 9447 OZ **Synchronous fluorescence spectroscopy for analysis of wine and wine distillates** [9447-62]
- 9447 10 **Total attenuation coefficient of intralipid dilutions for discrete laser wavelengths between 405 and 1315 nm** [9447-10]
- 9447 11 **Tissue fluorescence origins evaluation using excitation-emission matrices** [9447-51]
- 9447 12 **Laser cleaning treatment of burnt paintings** [9447-61]
- 9447 13 **Quantum yields of the photodissociation of HbO₂ in the visible and near IR spectral region** [9447-14]
- 9447 14 **Characterization of new drug delivery nanosystems using atomic force microscopy** [9447-69]
- 9447 15 **Investigation of photothermolysis therapy of human skin diseases using optical phantoms** [9447-49]
- 9447 16 **Bent optical fiber tapers for refractometry and biosensing** [9447-58]

SESSION 5 LASER SYSTEMS AND NONLINEAR OPTICS

- 9447 17 **Femtosecond laser filament and plasma channels in focused beam in air (Invited Paper)** [9447-38]
- 9447 18 **Analogies between solitonic bio-energy transport along polypeptide chains and nonautonomous optical solitons in structured nonuniform fibers (Invited Paper)** [9447-40]
- 9447 19 **Determination of spatially- and time-resolved electron temperature in nanosecond pulsed longitudinal discharge used for excitation of powerful gas discharge lasers** [9447-16]
- 9447 1A **Comparison of soliton solutions of the nonlinear Schrödinger equation and the nonlinear amplitude equation** [9447-57]
- 9447 1B **Analogies and distinctions between hydrodynamic and optical nonlinear waves** [9447-39]
- 9447 1C **Dark-gray soliton transformations: possibility to study microscopic quantum phenomena by nonlinear optical methods** [9447-42]
- 9447 1D **Scaling symmetry breaking and wave-particle duality of optical and matter-wave solitons** [9447-47]
- 9447 1E **Evaluation of pulse front tilt measurement of femtosecond laser pulses** [9447-78]

- 9447 1F **Influence of intrapulse Raman scattering on the stationary pulses in the presence of linear and nonlinear gain as well as spectral filtering** [9447-31]
- 9447 1G **Time shift in the presence of linear and nonlinear gain, spectral filtering, third-order of dispersion and self-steepening effect** [9447-32]
- 9447 1H **Dynamic laser speckle measurement with enhanced visualization of activity map** [9447-36]
- 9447 1I **Birefringence induced in azopolymer (PAZO) films with different thickness** [9447-37]
- 9447 1J **Polymers in lens design for laser applications** [9447-12]
- 9447 1K **Aqueous solutions of $\text{MgSO}_3 \cdot 6\text{H}_2\text{O}:\text{M}$ ($\text{M} = \text{Co}$ or $\text{Co}+\text{Ni}$) for laser applications** [9447-35]
- 9447 1L **Generation of modulated microchip laser pulses** [9447-7]
- 9447 1M **Comparison between the performance of Nd:YAG, Nd/Cr:GSGG and Nd/Cr:YAG ceramic lasers with quasi-solar pumping** [9447-20]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

The International School on Quantum Electronics: Laser Physics and Applications (ISQE) has been organized biennially since 1980 by the Institute of Electronics of the Bulgarian Academy of Sciences, with the aim to provide a forum for exchange and dissemination of knowledge and ideas on the latest developments in the field of lasers and their applications in material processing, laser spectroscopy and metrology, nonlinear optics, biology and remote sensing.

The 18th International School on Quantum Electronics (ISQE 2014) took place from 29 September to 3 October 2014 in the Black Sea resort town of Sozopol, Bulgaria. This year, the school commemorated the 145th anniversary of the Bulgarian Academy of Sciences foundation and the 50th anniversary of the Nobel Prize for Physics being awarded to Charles Towns, Nikolay Basov and Alexander Prokhorov for works leading to the development of the laser and maser principles. The event was supported by SPIE, the European Physical Society (EPS), the Ministry of Education and Science of Republic of Bulgaria, the Bulgarian Academy of Sciences, the National Technical University of Athens (Greece), and the American Elements Co. to whom the Organizing Committee expresses its deep gratitude.

For over 30 years, ISQE has provided an excellent opportunity for young researchers to meet internationally renowned scientists to exchange ideas, review the latest technologies and achievements, discuss future directions, and initiate new collaborations and joint research projects. Many former school participants have gone on to become leading scientists in research establishments and companies throughout the world. More than 90 scientists from Algeria, Armenia, France, Greece, India, Israel, Italy, Japan, Mexico, Poland, Romania, Russia, Serbia, Turkey and Bulgaria participated in ISQE 2014 and presented around 100 contributions – invited lectures, oral and poster presentations. To recognize research excellence and scientific presentation abilities, SPIE and EPS sponsored the Best Student Paper Awards Competition.

This proceedings volume contains fifty-seven invited and contributed papers covering the School topics of laser-matter interactions, laser spectroscopy and metrology, laser remote sensing and ecology, lasers in biology and medicine, and laser systems and nonlinear optics. All the submitted manuscripts were peer-reviewed by experts in the respective fields using the SPIE review process.

ISQE 2014 owes its success to many people. The International Program Committee planned and organized the scientific program, ensuring high-quality plenary presentations. The Local Committee bore the brunt of the organization and ensured the smooth running of the conference. The choice of Sozopol, one of the

oldest towns on the Bulgarian Black Sea coast, strongly enhanced the friendly and stimulating atmosphere of the conference.

The Editors of the volume would like to thank all the invited speakers and participants for their contribution to these proceedings, the members of the International Advisory and Program Committees for their great support, as well as the reviewers for their time and effort evaluating the papers. Thanks also go to the SPIE staff for their invaluable assistance. We hope that the readers will find this collection of papers interesting and useful and we would like to invite them to take part in the next 19th ISQE, which will be held in September 2016.
