Proc. of SPIE Vol. 9464 946401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SITUATIONAL UNDERSTANDING AND ANOMALY DETERMINATION

9464 02	Tasking the tweeters: obtaining actionable information from human sensors [9464-1]
9464 03	Exploring discriminative features for anomaly detection in public spaces [9464-2]
9464 04	Detection of anomalous track patterns for long term surveillance [9464-3]
9464 06	The use of visual programming tools and techniques for rapid in field ad-hoc edge of the network situational application integration in a coalition environment (Invited Paper) [9464-5]

COALITION OPERATIONS II

9464 0B	Computing on encrypted data and its applicability to a coalition operations environment [9464-10]
---------	--

INTEROPERABILITY AND NETWORKING: ARCHITECTURES AND FRAMEWORKS

9464 0C	The convergence of open systems and interoperable systems [9464-11]
9464 0D	PED fusion via enterprise ontology [9464-12]
9464 0E	The Sandia architecture for heterogeneous unmanned system control (SAHUC) [9464-13]
9464 0F	Dual node decision wheels: an architecture for interconnected information fusion and decision making [9464-14]

NETWORK SENSING AND PROCESSING FOR ISR APPLICATIONS I

9464 0G	Acoustic sensor network for hostile fire indicator for ground bases and helicopter-mounted applications [9464-15]
9464 0H	The effect of decentralization and communication networks on a set of ISR-gathering assets [9464-16]

- 9464 0I **Exploring EO vehicle recognition performance using manifolds as a function of lighting condition variability** [9464-17]

NETWORK SENSING AND PROCESSING FOR ISR APPLICATIONS II

- 9464 0L **Ground target tracking and classification in an unattended wireless sensor network** [9464-21]
- 9464 0O **A micro services architecture for use by microcontroller driven devices to provide interoperability with the open lean services architecture** [9464-24]
- 9464 0P **Visibility based multi-agent surveillance strategies in decentralized network** [9464-25]

SENSOR, DATA AND INFORMATION PROCESSING AND FUSION ALGORITHMS

- 9464 0Q **Bayesian hidden Markov models for UAV-enabled target localization on road networks with soft-hard data** [9464-26]
- 9464 0S **Remote vibrometry vehicle classification** [9464-28]
- 9464 0T **Predicting exploitation success on compressed imagery through common image quality metrics: an initial look** [9464-29]

NOVEL SENSING AND SIGNAL PROCESSING

- 9464 0V **Beyond H.264: implications of next generation video compression on surveillance imagery** [9464-31]
- 9464 0W **Binocular link smartphone system** [9464-32]
- 9464 0X **Phased array beamformer performance in variable environments** [9464-33]
- 9464 0Y **Classification of uncooperative vehicles with sparse laser Doppler vibrometry measurements** [9464-34]
- 9464 0Z **Sources of uncertainty in feature-based image registration algorithms** [9464-35]
- 9464 1I **YUV chrominance sub-sampling comparison using H.264** [9464-37]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Symposium Co-chair

David A. Logan, BAE Systems (United States)

Conference Chairs

Tien Pham, U.S. Army Research Laboratory (United States)

Michael A. Kolodny, U.S. Army Research Laboratory (United States)

Conference Program Committee

Kevin L. Priddy, Air Force Research Laboratory (United States)

Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

Robert Heathcock, U.S. Defense Intelligence Agency (United States)

Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)

Gavin Pearson, Defence Science and Technology Laboratory
(United Kingdom)

King K. Siu, U.S. Army Armament Research, Development and
Engineering Center (United States)

Raja Suresh, General Dynamics Advanced Information Systems
(United States)

Robert Williams, Air Force Research Laboratory (United States)

Session Chairs

- 1 Situational Understanding and Anomaly Determination
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)
- 2 Coalition Operations I
Tien Pham, U.S. Army Research Laboratory (United States)
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
- 3 Coalition Operations II
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
Tien Pham, U.S. Army Research Laboratory (United States)

- 4 Interoperability and Networking: Architectures and Frameworks
Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
- 5 Network Sensing and Processing for ISR Applications I
Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)
Robert Williams, Air Force Research Laboratory (United States)
- 6 Situation Awareness: Joint Session with Conferences 9458 and 9464
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
Tien Pham, U.S. Army Research Laboratory (United States)
- 7 Network Sensing and Processing for ISR Applications II
Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
- 8 Sensor, Data and Information Processing and Fusion Algorithms
Tien Pham, U.S. Army Research Laboratory (United States)
Gavin Pearson, Defence Science and Technology Laboratory
(United Kingdom)
- 9 Novel Sensing and Signal Processing
Tien Pham, U.S. Army Research Laboratory (United States)
Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

Introduction

This was the sixth year that Ground/Air Multisensor Interoperability, Integration, and Networking for Persistent IVR was part of the SPIE Defense and Security Sensing Symposium held in Baltimore, Maryland, 20–24 April 2015. The goal of this conference is to bring together the technical, operational (users), and policy community to provide a forum for discussion of problems, issues, and technology involving interoperability for persistent ISR. This conference is about promoting and advancing technology and interoperability for persistent ISR resulting in enhanced situational understanding for the warfighter decision makers.

The conference featured oral presentations of 33 technical papers and was highlighted by a joint session with the Cyber Sensing Conference on Situational Awareness with keynote speaker Dr. Steven Rogers, Chief Scientist for AFRL Sensor Directorate. The conference featured nine different session topics including Situational Understanding and Anomaly Determination, Coalition Operations I & II, Interoperability and Networking: Architectures and Frameworks, Network Sensing and Processing for ISR Applications I and II, Situational Awareness, Sensor, Data and Information Processing for Fusion Algorithms and Novel Sensing and Signal Processing.

We hope you find the proceedings both provocative and informative. We are looking forward to an even more exciting conference in 2016 which will include a holistic and provocative panel discussion on Situational Awareness and joint sessions with several other conferences. We hope that everyone will join us next year.

Tien Pham
Michael A. Kolodny
