Event: SPIE Defense + Security, 2015, Baltimore, MD, United States

PROCEEDINGS OF SPIE

Laser Technology for Defense and Security XI

Mark Dubinskii
Stephen G. Post
Editors

21–22 April 2015
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 9466

Proceedings of SPIE 0277-786X, V. 9466

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Technology for Defense and Security XI, edited by Mark Dubinskii
Stephen G. Post, Proc. of SPIE Vol. 9466, 946601 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2201145

Proc. of SPIE Vol. 9466 946601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

MID-IR AND UV-VIS LASERS

9466 02	Ring cavity surface emitting quantum cascade laser with a near Gaussian beam profile [9466-1]
9466 03	Continuous-wave deep ultraviolet sources for resonance Raman explosive sensing [9466-2]
9466 04	AlGaInN laser diode technology and systems for defence and security applications [9466-3]
9466 05	Recent progress in high-power ultrafast thulium-doped fiber lasers and mid-infrared supercontinuum sources [9466-4]

PROGRESS IN DIODE LASERS/NOVEL BULK SOLID-STATE LASERS

9466 08	Resonantly pumped Kerr-lens mode-locked Er:YVO₄ laser [9466-7]

FIBER LASERS: POWER SCALING

9466 0C	Higher order mode selection for power scaling in laser resonators using transmitting Bragg gratings [9466-11]
9466 0D	Laser beam characteristics of optical phased arrays [9466-12]

NEW LASER AND NONLINEAR MATERIALS AND THEIR PROPERTIES

9466 0E	Tougher glasses for eye-safe lasers [9466-13]
9466 0I	Spectroscopic properties of Er-doped Y₂O₃ ceramic related to mid-IR laser transition [9466-17]

PULSED FIBER LASERS AND SBS MITIGATION

9466 0J	Stimulated Brillouin scattering in optical fibers with end reflections excited by broad-band, phase-modulated pump waves [9466-18]

9466 OK **Mode-locked and Q-switched fiber lasers with graphene oxide based saturable absorber (Invited Paper)** [9466-19]

9466 OM **Arbitrary phase modulation for optical spectral control and suppression of stimulated Brillouin scattering** [9466-21]

NOVEL LASER-BASED PRACTICAL DEVICES AND SYSTEMS

9466 OS **Compact, passively q-switched 523-nm laser** [9466-27]

9466 OU **20.2W CW 2.118 μ m Ho:YAlO₃ laser pumped by 1.915nm Tm-doped fiber laser** [9466-29]

INTERACTIVE POSTER SESSION

9466 OV **Yb-fiber-MOPA based high energy and average power uplink laser beacon for deep space communication operating under Nested PPM format** [9466-30]

9466 OW **Proposal of a defense application for a chemical oxygen laser** [9466-31]

9466 OX **Analysis and modeling of a high power side diode pumped solid state laser system** [9466-32]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Symposium Co-chair

David A. Logan, BAE Systems (United States)

Conference Chairs

Mark Dubinskii, U.S. Army Research Laboratory (United States)

Stephen G. Post, Missile Defense Agency (United States)

Conference Program Committee

Steven R. Bowman, U.S. Naval Research Laboratory (United States)

Iyad Dajani, Air Force Research Laboratory (United States)

Anthony M. Johnson, University of Maryland, Baltimore County
(United States)

Stephen G. Patterson, DILAS Diode Laser, Inc. (United States)

Don D. Seeley, High Energy Laser Joint Technology Office
(United States)

Session Chairs

- 1 Mid-IR and UV-Vis Lasers
Anthony M. Johnson, University of Maryland, Baltimore County
(United States)
- 2 Progress in Diode Lasers/Novel Bulk Solid-state Lasers
Mark Dubinskii, U.S. Army Research Laboratory (United States)
- 3 Fiber Lasers: Power Scaling
Stephen G. Post, Missile Defense Agency (United States)
- 4 New Laser and Nonlinear Materials and Their Properties
George A. Newburgh, U.S. Army Research Laboratory (United States)
- 5 Pulsed Fiber Lasers and SBS Mitigation
Steven Bowman, U.S. Naval Research Laboratory (United States)

- 6 Novel Fiber Lasers
Stephen G. Patterson, DILAS Diode Laser, Inc. (United States)
- 7 Novel Laser-based Practical Devices and Systems
Nikolay E. Ter-Gabrielyan, U.S. Army Research Laboratory
(United States)
