SPIE

Volume 9496

Proceedings of SPIE 0277-786X, V. 9496

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Independent Component Analyses, Compressive Sampling, Large Data Analyses (LDA), Neural Networks, Biosystems, and Nanoengineering XIII, edited by Harold H. Szu, Liyi Dai, Yufeng Zheng, Proc. of SPIE Vol. 9496, 949601 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2201109

Proc. of SPIE Vol. 9496 949601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

BIOMEDICAL WELLNESS APPLICATIONS

9496 02	Remote stress detection using a visible spectrum camera [9496-1]
9496 04	Remotely detected differential pulse transit time as a stress indicator [9496-3]
9496 05	Computer-aided diagnosis of breast MRI with high accuracy optical flow estimation [9496-4]
9496 06	Catheter ultrasound for cross-sectional imaging and drug delivery to vessel wall (Invited Paper) [9496-5]

SYSTEM BIOLOGY

9496 07	Visual exploratory analysis of integrated chromosome 19 proteomic data derived from glioma cancer stem-cell lines based on novel nonlinear dimensional data reduction techniques [9496-6]
9496 08	Dynamical complex network theory applied to the therapeutics of brain malignancies [9496-7]
9496 09	A new EEG measure using the 1D cluster variation method [9496-26]

LEARNING THEORY AND APPLICATIONS

9496 0A	Reducing weight precision of convolutional neural networks towards large-scale on-chip image recognition [9496-8]
9496 0B	An evaluation into the efficiency and effectiveness of machine learning algorithms in realistic traffic pattern prediction using field data [9496-9]
9496 0C	e-IQ and IQ knowledge mining for generalized LDA [9496-10]
9496 0D	Earth mover's distances of feature vectors in large data analyses [9496-11]
9496 0E	Compressive sensing solutions through minimax optimization [9496-12]

SMART SENSOR SYSTEMS, MINIATURIZATION, AND APPLICATIONS

- 9496 OF **Hypothesis on human eye perceiving optical spectrum rather than an image** [9496-13]
9496 OG **Optical display for radar sensing** [9496-14]
9496 OH **Selective-imaging camera** [9496-15]

UNSUPERVISED LEARNING AND ICA

- 9496 OJ **VoIP attacks detection engine based on neural network** [9496-17]
9496 OK **Thermal image enhancement construct for seeing through obscurants** [9496-18]
9496 OL **Auxiliary function approach to independent component analysis and independent vector analysis** [9496-19]
9496 OM **How do artificial neural networks (ANNs) compare to partial least squares (PLS) for spectral interference correction in optical emission spectrometry?** [9496-20]
9496 ON **Bio-mining for biomarkers with a multi-resolution block chain** [9496-21]

SYSTEM BIOLOGY PIONEER AWARD

- 9496 OP **Quantitative real-time analysis of collective cancer invasion and dissemination (Invited Paper)** [9496-32]

LEADERSHIP AWARD AND SMART BRAIN COMPUTER INTERFACE

- 9496 OR **Computational intelligence from AI to BI and NI (Invited Paper)** [9496-36]
9496 OS **Spatially revolved high density electroencephalography (Invited Paper)** [9496-28]
9496 OT **Hardware enhance of brain computer interfaces (Invited Paper)** [9496-27]
9496 OU **Simulated annealing model of acupuncture (Invited Paper)** [9496-29]

POSTER SESSION

- 9496 OV **Detection of cardiac activity changes from human speech** [9496-22]
9496 OW **FPGA-based real-time blind source separation with principal component analysis** [9496-23]
9496 OX **Independent component analysis algorithm FPGA design to perform real-time blind source separation** [9496-24]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Wolfgang Schade, Clausthal University of Technology (Germany) and
Fraunhofer Heinrich-Hertz Institute (Germany)

Symposium Co-chair

Ming C. Wu, University of California, Berkeley (United States)

Conference Chair

Harold H. Szu, U.S. Army Research Office (United States)

Conference Co-chairs

Liyi Dai, U.S. Army Research Office (United States)
Yufeng Zheng, Alcorn State University (United States)

Conference Program Committee

Shun-ichi Amari, RIKEN (Japan)
Richard G. Baraniuk, Rice University (United States)
John J. Benedetto, University of Maryland, College Park
(United States)
Henry Chu, University of Louisiana at Lafayette (United States)
Ronald R. Coifman, Yale University (United States)
John Daugman, University of Cambridge (United Kingdom)
David Donohoe, Stanford University (United States)
Ronald G. Driggers, St. Johns Optical Systems (United States)
Jide FAMILONI, U.S. Army Night Vision & Electronic Sensors Directorate
(United States)
Fredric M. Ham, Florida Institute of Technology (United States)
Yutaka Hata, University of Hyogo (Japan)
Charles C. Hsu, Trident Systems Inc. (United States)
Tzyy-Ping Jung, University of California, San Diego (United States)
Marc W. Kirschner, Harvard Medical School (United States)
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Horacio Lamela, Universidad Carlos III de Madrid (Spain)
Joseph S. Landa, BriarTek, Inc. (United States)
Douglas A. Lauffenburger, Massachusetts Institute of Technology
(United States)
Soo-Young Lee, KAIST (Korea, Republic of)

Kevin W. Lyons, National Institute of Standards and Technology
(United States)

Anke D. Meyer-Bäse, The Florida State University (United States)

Uwe Meyer-Bäse, The Florida State University (United States)

Francesco Carlo Morabito, Università Mediterranea di Reggio
Calabria (Italy)

Hiroshi Nakajima, OMRON Corporation (Japan)

Hyung-Min Park, Sogang University (Korea, Republic of)

Kitt C. Reinhardt, Air Force Office of Scientific Research
(United States)

Zuowei Shen, National University of Singapore (Singapore)

Metin Sitti, Carnegie Mellon University (United States)

Jan-Olov Stromberg, Royal Institute of Technology (Sweden)

John Tangney, Office of Naval Research (United States)

Emmanuel Vincent, IRISA / INRIA Rennes (France)

Nadarajen A. Vydelingum, National Institutes of Health (United States)

Lipo Wang, Nanyang Technological University (Singapore)

Olaf Wolkenhauer, Universität Rostock (Germany)

Donald C. Wunsch II, Missouri University of Science and Technology
(United States)

Ning Xi, Michigan State University (United States)

Takeshi Yamakawa, Fuzzy Logic Systems Institute (Japan)

Yiping Zhao, The University of Georgia (United States)

Xiaowei Zhuang, Harvard University (United States)

Introduction

This year's exciting conference Proceedings features frontier sensor and technology research in human science components: independent component analyses, compressive sampling, large data analyses (LDA), neural networks, biosystems, and nanoengineering. This research is increasingly important as the baby-boomer generation continues to age. These components are increased yearly according to the community's need. For example, the Adaptive Wavelet Pioneer Award was folded into a new and emerging category called Large Data Analysis which is slightly different in computational intelligence (CI) from a brute force law enforcement need of big data analyses. Through the tremendous contributions from authors, presenters, and attendees, new ideas and technologies can be carried to the world and serve the aging global village.

Historically, our section has been part of the SPIE Defense, Security and Sensing Symposium, and is now highlighted in the Sensing Technology + Applications (STA) section. These conference Proceedings serve as a wonderful reflection of the work presented this year, but nothing can replace physically attending and interacting with our talented scientists and investigators. The Pioneer Awardees for this year were selected by past recipients, and the nomination and selection committee was chaired by the recipients listed below. The 2015 recipients and 2014 former recipients will serve as the nomination and selection committee chair and co-chair for the next year's 2016 conference:

- Large Data Analysis Pioneer Award: Ronald Coifman, Yale University (United States), "Automatic organization and signal processing of databases"
- Biomedical Wellness Pioneer Award: John Hossack, University of Virginia (United States), "Catheter ultrasound for cross-sectional imaging and drug delivery to vessel wall"
- Unsupervised Learning ICA Pioneer Award: Nobutaka Ono, National Institute of Informatics (Japan), "Auxiliary function approach to independent component analysis and independent vector analysis"
- Compressive Sampling Pioneer Award: Joel Tropp, California Institute of Technology (United States), "Sampling theorems for structured signals"
- System Biology Pioneer Award: Andrew Ewald, Johns Hopkins University (United States), "Quantitative real-time analysis of collective cancer invasion and dissemination"
- Nanoengineering Pioneer Award: Michael McAlpine, Princeton University (United States), "3D printed bionic nano-material"
- Leadership Award: Paul Werbos, The University of Memphis (United States), "Computational Intelligence from AI to BI and NI."

We thank you for making 2015 a successful and memorable year, and encourage past, present, and future associates to participate in the knowledge discovery and sharing through SPIE. A tangible measure of the success of annual conferences is how much collaboration results from the former conferences. Thus, it is the duty and obligation of Chairs to facilitate dialogue among presenters and audiences.
