, "Front Matter: Volume 9500," Proc. SPIE 9500, Quantum Information and Computation XIII, 950001 (19 June 2015); doi: 10.1117/12.2201029

Event: SPIE Sensing Technology + Applications, 2015, Baltimore, MD, United States

PROCEEDINGS OF SPIE

Quantum Information and Computation XIII

**Eric Donkor
Andrew R. Pirich
Michael Hayduk**
Editors

**22–24 April 2015
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 9500

Proceedings of SPIE 0277-786X, V. 9500

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Information and Computation XIII, edited by Eric Donkor, Andrew R. Pirich,
Michael Hayduk, Proc. of SPIE Vol. 9500, 950001 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2201029

Proc. of SPIE Vol. 9500 950001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

SESSION 1	QKD AND QUANTUM CRYPTOGRAPHY
9500 03	Performance limits for single-photons, correlated-photons, and entangled photons for quantum key distribution over fiber optics network topologies [9500-2]
9500 04	A continuous-variable quantum key distribution using correlated photons [9500-3]
9500 05	Quantum teleportation for keyless cryptography [9500-4]
9500 06	Implementing Diffie-Hellman key exchange using quantum EPR pairs [9500-5]
9500 07	Provably secure time distribution for the electric grid [9500-6]
9500 08	Secret key generation via a modified quantum secret sharing protocol [9500-7]
9500 09	Analysis of the secrecy of the running key in quantum encryption channels using coherent states of light [9500-8]
SESSION 2	QUANTUM IMAGING AND SENSING
9500 0D	Complementary imaging with compressive sensing [9500-12]
9500 0E	Sensors based on quantum hyper-entanglement: efficiency and performance in the presence of other photon sources [9500-13]
9500 0F	Finding analytical solution for mirror inverse gate operations in quantum systems with diagonal interactions [9500-14]
SESSION 3	QUANTUM GATES, CIRCUITS, AND NETWORKS I
9500 0J	Towards scalable quantum information processing with cold atoms and Rydberg blockade [9500-18]
9500 0K	Scalable quantum computing architecture with mixed species ion chains [9500-19]
SESSION 4	QUANTUM GATES, CIRCUITS AND NETWORKS II
9500 0M	Superconducting metamaterials and qubits [9500-21]

- 9500 OP **Induced dipole-dipole forbidden transitions in rare-earth elements and their prospects for quantum information processing** [9500-24]

SESSION 5 QUANTUM MEASUREMENTS AND ERROR CORRECTION

- 9500 OQ **How often must we apply syndrome measurements?** [9500-25]
- 9500 OT **Demonstrating continuous-variable Einstein-Podolsky-Rosen steering with a finite number of measurements** [9500-28]
- 9500 OU **Considerations on collapse of the wavefunction** [9500-29]

SESSION 6 QUANTUM INFORMATION SCIENCE

- 9500 OV **Staged quantum energy teleportation** [9500-59]
- 9500 OW **Diagrammatic quantum mechanics** [9500-31]
- 9500 OX **Principal fiber bundle description of number scaling for scalars and vectors: application to gauge theory** [9500-32]
- 9500 OY **Clocking in the face of unpredictability beyond quantum uncertainty** [9500-33]
- 9500 OZ **Topological and geometrical quantum computation in cohesive Khovanov homotopy type theory** [9500-34]
- 9500 10 **Heterotic quantum and classical computing on convergence spaces** [9500-35]
- 9500 11 **Quantum probabilistic logic programming** [9500-36]
- 9500 12 **Theoretical analysis of on-chip linear quantum optical information processing networks** [9500-37]

SESSION 7 QUANTUM STATES AND QUANTUM ENTANGLEMENT I

- 9500 14 **A bright PPKTP waveguide source of polarization entangled photons** [9500-39]
- 9500 15 **High spectral purity silicon ring resonator photon-pair source** [9500-40]
- 9500 16 **High heralding-efficiency of near-IR fiber coupled photon pairs for quantum technologies** [9500-41]
- 9500 18 **High-purity single-mode photon source for integrated quantum photonics** [9500-43]

SESSION 8 QUANTUM STATES AND QUANTUM ENTANGLEMENT II

- 9500 1D **Superconducting circuitry for quantum electromechanical systems** [9500-48]

- 9500 1E **Analog quantum computing (AQC) by revisiting the underlying physics** [9500-53]
- 9500 1F **A CNOT gate in a glass chip** [9500-54]
- 9500 1G **Characterizing a four-qubit planar lattice for arbitrary error detection** [9500-55]

INTERACTIVE POSTER SESSION

- 9500 1H **A novel quantum random number generation algorithm used by smartphone camera**
[9500-49]
- 9500 1J **Calculation of key reduction for B92 QKD protocol** [9500-52]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Wolfgang Schade, Clausthal University of Technology and Fraunhofer Heinrich-Hertz Institute (Germany)

Symposium Co-chair

Ming C. Wu, University of California, Berkeley (United States)

Conference Chairs

Eric Donkor, University of Connecticut (United States)

Andrew R. Pirich, ACP Consulting (United States)

Michael Hayduk, Air Force Research Laboratory (United States)

Conference Co-chairs

Michael R. Frey, Bucknell University (United States)

Samuel J. Lomonaco Jr., University of Maryland, Baltimore County (United States)

John M. Myers, Harvard University (United States)

Conference Program Committee

Paul M. Alsing, Air Force Research Laboratory (United States)

Chip Brig Elliott, Raytheon BBN Technologies (United States)

Reinhard K. Erdmann, Advanced Automation Corporation (United States)

Michael L. Fanto, Air Force Research Laboratory (United States)

Louis H. Kauffman, University of Illinois at Chicago (United States)

Vladimir E. Korepin, Stony Brook University (United States)

Alexander V. Sergienko, Boston University (United States)

Tai Tsun Wu, Harvard University (United States)

Session Chairs

1 QKD and Quantum Cryptography

Michael J. Hayduk, Air Force Research Laboratory (United States)

Michael L. Fanto, Air Force Research Laboratory (United States)

- 2 Quantum Imaging and Sensing
Samuel J. Lomonaco Jr., University of Maryland, Baltimore County
(United States)
Reinhard Erdmann, Advanced Automation Corporation
(United States)
- 3 Quantum Gates, Circuits, and Networks I
Eric Donkor, University of Connecticut (United States)
Samuel J. Lomonaco Jr., University of Maryland, Baltimore County
(United States)
- 4 Quantum Gates, Circuits and Networks II
Reinhard Erdmann, Advanced Automation Corporation
(United States)
John M. Myers, Harvard University (United States)
- 5 Quantum Measurements and Error Correction
Michael R. Frey, Bucknell University (United States)
Louis H. Kauffman, University of Illinois at Chicago (United States)
- 6 Quantum Information Science
Michael L. Fanto, Air Force Research Laboratory (United States)
- 7 Quantum States and Quantum Entanglement I
John M. Myers, Harvard University (United States)
- 8 Quantum States and Quantum Entanglement II
Louis H. Kauffman, University of Illinois at Chicago (United States)
Michael R. Frey, Bucknell University (United States)
