**Introduction**

### SUPERCONDUCTING PHOTON COUNTING I

9504 02  
A near-infrared 64-pixel superconducting nanowire single photon detector array with integrated multiplexed readout (Invited Paper) [9504-1]

9504 03  
Near-field single photon detection in a scattering SNOM [9504-2]

9504 04  
Dark counts in superconducting single-photon NbN/NiCu detectors [9504-3]

9504 05  
Superconducting and ferromagnetic properties of NbN/NiCu and NbTiN/NiCu bilayer nanostructures for photon detection [9504-4]

9504 06  
Y-Ba-Cu-O nanostripes for optical photon detection (Invited Paper) [9504-5]

### SUPERCONDUCTING PHOTON COUNTING II

9504 08  
Ultrafast superconducting single-photon detector with reduced-size active area coupled to a tapered lensed single-mode fiber [9504-7]

### SOLID STATE PHOTON COUNTING

9504 09  
Active quenching and gating circuit of the photon counting detector for laser time transfer with improved timing resolution and stability (Invited Paper) [9504-8]

9504 0A  
High-performance timing electronics for single photon avalanche diode arrays [9504-9]

9504 0B  
Single photon time transfer link model for GNSS satellites [9504-10]

9504 0C  
Aqueye+: a new ultrafast single photon counter for optical high time resolution astrophysics [9504-11]

### PHOTON COUNTING APPLICATIONS

9504 0J  
Enhancing the fill-factor of CMOS SPAD arrays using microlens integration (Invited Paper, Best Student Paper Award) [9504-18]

9504 0K  
Occurrence and characteristics of mutual interference between LIDAR scanners [9504-19]
**Superiorities of time-correlated single-photon counting against standard fluorimetry in exploiting the potential of fluorochromized oligonucleotide probes for biomedical investigation** \[9504-20\]

**POSTER SESSION**

- **Research and primary results of SLR experiment with 1064nm wavelength using Si detector** \[9504-22\]
- **Thin scintillators for ultrafast hard X-ray imaging** \[9504-23\]
- **Modeling of kinetic processes in thermoelectric single photon detectors** \[9504-24\]
- **Simultaneous detection of tissue autofluorescence decay distribution and time-gated photo-bleaching rates** \[9504-25\]
- **Evaluating the effectiveness of the extrafocal images method when observing low-orbiting space objects** \[9504-26\]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i. (Czech Republic)
Chris Edwards, Central Laser Facility, Science and Technology Facilities Council (United Kingdom)
Mike Dunne, SLAC National Accelerator Laboratory (United States) and Linac Coherent Light Source (United States)
Ivo Rendina, Istituto per la Microelettronica e Microsistemi, CNR (Italy)

Honorary Symposium Chair

Miroslav Miller, Institute of Photonics and Electronics of the ASCR, v.v.i. (Czech Republic)

Conference Chairs

Ivan Prochazka, Czech Technical University in Prague (Czech Republic)
Roman Sobolewski, University of Rochester (United States)
Ralph B. James, Brookhaven National Laboratory (United States)

Conference Programme Committee

Josef Blazej, Czech Technical University in Prague (Czech Republic)
Ulrich Schreiber, Technische Universität München (Germany)
Valery Zwiller, Technische Universiteit Delft (Netherlands)

Session Chairs

1 Superconducting Photon Counting I
   Roman Sobolewski, University of Rochester (United States)

2 Superconducting Photon Counting II
   Roman Sobolewski, University of Rochester (United States)

3 Solid State Photon Counting
   Ivan Prochazka, Czech Technical University in Prague (Czech Republic)

4 X-ray Photon Detection
   Nathan R. Gemmell, University of Glasgow (United Kingdom)

5 Photon Counting Applications
   Ralph B. James, Brookhaven National Laboratory (United States)
Introduction

This book contains the proceedings of the SPIE Conference on Photon Counting Applications. The conference was held 13–15 April, in Prague, Czech Republic as part of the 2015 SPIE Conference on Optics and Optoelectronics. The meeting was organized into technical sessions on superconducting photon counting, solid state photon counting, x-ray photon detection, and applications. A poster session was also provided.

The purpose of the conference was to provide a forum for scientists and engineers from the detector development and user communities to present and evaluate the most recent results on photon-counting detectors and to discuss the requirements for a variety of detection and imaging applications. A total of 26 presentations, including 6 posters, were provided at the conference. This book provides detailed documentation describing a portion of the presentations. The editors hope that it will serve as an important record of the meeting, providing an update on the status of photon-counting detectors and applications, and serving as a useful resource for those working in the field.

The Conference Chairs would like to thank the Session Chairs and members of the Conference Program Committee, who offered their time to enlist the involvement of researchers working in the field.

Ivan Prochazka
Roman Sobolewski
