Volume 9509

Proceedings of SPIE 0277-786X, V. 9509

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Relativistic Plasma Waves and Particle Beams as Coherent and Incoherent Radiation Sources
edited by Dino A. Jaroszynski, Proc. of SPIE Vol. 9509, 950901 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2199308

Proc. of SPIE Vol. 9509 950901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. the six-digit CID number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

RADIATION REACTION, ELECTRON BEAM MANIPULATION, AND DETECTION

9509 05	Cooling of relativistic electron beams in chirped laser pulses (Invited Paper) [9509-4]
---------	--

THOMSON AND COMPTON SCATTERING FOR IMAGING

9509 07	Characterization of the in-line x-ray phase contrast imaging beam line developed at ALLS and based on laser driven betatron radiation (Invited Paper) [9509-7]
9509 08	High-energy gamma-ray beams from nonlinear Thomson and Compton scattering in the ultra-intense regime (Invited Paper) [9509-8]
9509 0A	Narrow bandwidth and tunable hard x-rays from an all-laser-driven Thomson light source (Invited Paper) [9509-10]

RAMAN AMPLIFICATION IN PLASMA

9509 0G	High intensity regimes for resonant Raman compression (Invited Paper) [9509-16]
9509 0H	Applicability of the envelope model (Invited Paper) [9509-17]

COHERENT EMISSION FROM LASER-DRIVEN PLASMA

9509 0K	Undulator radiation driven by laser-wakefield accelerator electron beams (Invited Paper) [9509-21]
9509 0L	Practical considerations for the ion channel free-electron laser (Invited Paper) [9509-22]

TRANSITION AND CHERENKOV EMISSION FROM PLASMA

9509 0O	Intense terahertz pulses from SPARC_LAB coherent radiation source [9509-25]
9509 0P	New opportunities for strong-field LPI research in the mid-IR [9509-26]
9509 0Q	Coherent effects in backward EUV and x-ray transition radiation of a bunch of electrons from thin wires [9509-27]

9509 OR **XUV Cherenkov and diffraction radiation from femtosecond electron bunch (Best Student Paper Award)** [9509-28]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)

Chris Edwards, Central Laser Facility, Science and Technology
Facilities Council (United Kingdom)

Mike Dunne, SLAC National Accelerator Laboratory (United States)
and Linac Coherent Light Source (United States)

Ivo Rendina, Istituto per la Microelettronica e Microsistemi (Italy)

Honorary Symposium Chair

Miroslav Miller, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)

Conference Chair

Dino A. Jaroszynski, University of Strathclyde (United Kingdom)

Conference Programme Committee

Christoph H. Keitel, Max-Planck-Institut für Kernphysik (Germany)

Alexander Pukhov, Heinrich-Heine-Universität Düsseldorf (Germany)

Antoine Rousse, Ecole Nationale Supérieure de Techniques
Avancées (France)

Zheng-Ming Sheng, Shanghai Jiao Tong University (China)

Luis O. Silva, Universidade Técnica de Lisboa (Portugal)

Toshiki Tajima, Japan Atomic Energy Research Institute (Japan) and
University of California, Irvine (United States)

Mark Wiggins, University of Strathclyde (United Kingdom)

Victor Zamfir, Horia Hulubei National Institute of Physics and Nuclear
Engineering (Romania)

Matthew Zepf, Queen's University Belfast (United Kingdom)

Session Chairs

- 1 Radiation Reaction, Electron Beam Manipulation, and Detection
Jean-Claude Kieffer, Institut National de la Recherche Scientifique
(Canada)
- 2 Thomson and Compton Scattering for Imaging
Mohammad R. Islam, University of Strathclyde (United Kingdom)

- 3 Betatron Radiation and High Harmonic Generation in Plasma
Stefan Karsch, Ludwig-Maximilians-Universität München (Germany)
- 4 Raman Amplification in Plasma
Min Sup Hur, Ulsan National Institute of Science and Technology
(Korea, Republic of)
- 5 Coherent Emission from Laser-Driven Plasma
Igor Andriyash, Laboratoire d'Optique Appliquée (France)
- 6 Transition and Cherenkov Emission from Plasma
S. Mark Wiggins, University of Strathclyde (United Kingdom)
