Volume 9514

Proceedings of SPIE 0277-786X, V. 9514

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Acceleration of Electrons, Protons, and Ions III; and Medical Applications of Laser-Generated Beams of Particles III,
edited by Kenneth W. D. Ledingham, Eric Esarey, Klaus Spohr, Carl B. Schroeder, Paul McKenna, Florian J. Grüner,
Paul R. Bolton, Proc. of SPIE Vol. 9514, 951401 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2197749

Proc. of SPIE Vol. 9514 951401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

Part A Laser Acceleration of Electrons, Protons, and Ions

ELECTRON ACCELERATION I

9514 05	Independent control of laser wakefield-accelerated electron-beam parameters [9514-4]
---------	---

ELECTRON ACCELERATION II

9514 08	Ultra-low emittance beam generation using two-color ionization injection in laser-plasma accelerators [9514-7]
---------	---

ION ACCELERATION I

9514 09	Laser accelerated ions from near critical gaseous targets (Invited Paper) [9514-9]
9514 0B	Longitudinal laser ion acceleration in low density targets: experimental optimization on the Titan laser facility and numerical investigation of the ultra-high intensity limit [9514-11]
9514 0C	Observation of monoenergetic protons from a near-critical gas target tailored by a hydrodynamic shock [9514-12]

ION ACCELERATION II

9514 0G	Maximum attainable ion energy in the radiation pressure acceleration regime [9514-16]
---------	--

ELECTRON ACCELERATION III

9514 0P	Emittance control of electron and positron beams in laser plasma accelerators [9514-25]
---------	--

LASER-DRIVEN ACCELERATION

9514 0Q	Laser generation of ultra-short neutron bursts from high atomic number converters (Invited Paper) [9514-26]
---------	--

- 9514 0R **Enhanced electron acceleration via ultra-intense laser interaction with structured targets (Best Student Paper)** [9514-27]

RADIATION AND PARTICLE SOURCES

- 9514 0W **Laser-driven Thomson scattering for the generation of ultra-bright multi-MeV gamma-ray beams (Invited Paper)** [9514-32]
- 9514 0X **Betatron radiation from laser plasma accelerators (Invited Paper)** [9514-33]
- 9514 0Z **Analysis of electron injection in laser wakefield acceleration using betatron emission in capillary tubes** [9514-35]
- 9514 10 **X-Ray imaging of ultrafast magnetic reconnection driven by relativistic electrons** [9514-36]

Part B Medical Applications of Laser-Generated Beams of Particles: Review of Progress and Strategies for the Future

LASER-DRIVEN PROTON ACCELERATION I

- 9514 12 **Solid hydrogen target for laser driven proton acceleration (Invited Paper)** [9514-50]

LASER ACCELERATORS FOR MEDICAL IMAGING

- 9514 17 **Laser-wakefield accelerators for medical phase contrast imaging: Monte Carlo simulations and experimental studies** [9514-55]

POSTER SESSION

- 9514 1B **Spectra of plasmas of Ru, Rh, Pd and Mo produced with nanosecond and picosecond laser pulses** [9514-38]
- 9514 1D **Simulations of ion acceleration from ultrathin targets with the VEGA petawatt laser** [9514-40]
- 9514 1E **Bunch modulation in LWFA blowout regime** [9514-41]
- 9514 1F **High-repetition rate relativistic electron beam generation from intense laser solid interactions** [9514-42]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)

Chris Edwards, Central Laser Facility, Science and Technology
Facilities Council (United Kingdom)

Mike Dunne, SLAC National Accelerator Laboratory (United States)
and Linac Coherent Light Source (United States)

Ivo Rendina, Istituto per la Microelettronica e Microsistemi (Italy)

Part A Laser Acceleration of Electrons, Protons, and Ions

Conference Chairs

Eric Esarey, Lawrence Berkeley National Laboratory (United States)

Carl B. Schroeder, Lawrence Berkeley National Laboratory
(United States)

Florian J. Grüner, Ludwig-Maximilians-Universität München (Germany)

Conference Programme Committee

Sergei V. Bulanov, Japan Atomic Energy Agency (Japan)

Min Chen, Shanghai Jiao Tong University (China)

Thomas E. Cowan, Helmholtz-Zentrum Dresden-Rossendorf e.V.
(Germany)

Brigitte Cros, Université Paris-Sud 11 (France)

Antonio Giulietti, Consiglio Nazionale delle Ricerche (Italy)

Florian J. Grüner, Ludwig-Maximilians-Universität München (Germany)

Björn Manuel Hegelich, Los Alamos National Laboratory
(United States)

Simon M. Hooker, University of Oxford (United Kingdom)

Stefan Karsch, Max-Planck-Institut für Quantenoptik (Germany)

Karl M. Krushelnick, University of Michigan (United States)

Wim Leemans, Lawrence Berkeley National Laboratory
(United States)

Victor Malka, Ecole Nationale Supérieure de Techniques Avancées
(France)

Zulfikar Najmudin, Imperial College London (United Kingdom)

Zheng-Ming Sheng, Shanghai Jiao Tong University (China)

Luis O. Silva, Universidade Técnica de Lisboa (Portugal)

Vladimir T. Tikhonchuk, Université de Bordeaux 1 (France)

Antonio C. Ting, U.S. Naval Research Laboratory (United States)
Claes-Goran Wahlström, Lund University (Sweden)
Matthew Zepf, Queen's University Belfast (United Kingdom)

Session Chairs

Electron Acceleration I
Carl B. Schroeder, Lawrence Berkeley National Laboratory
(United States)

Electron Acceleration II
Eric H. Esarey, Lawrence Berkeley National Laboratory (United States)

Ion Acceleration I
Anatoly M. Maksimchuk, University of Michigan (United States)

Ion Acceleration II
Sven Steinke, Lawrence Berkeley National Laboratory (United States)

Electron Acceleration III
Florian J. Grüner, Ludwig-Maximilians-Universität München (Germany)

Laser-driven Acceleration
Michael Helle, U.S. Naval Research Laboratory (United States)

Radiation and Particle Sources
Tomonao Hosokai, Osaka University (Japan)

**Part B Medical Applications of Laser-Generated Beams of
Particles: Review of Progress and Strategies for the Future**

Conference Chairs

Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)
Klaus Spohr, University of the West of Scotland (United Kingdom)
Paul McKenna, University of Strathclyde (United Kingdom)
Paul R. Bolton, Japan Atomic Energy Agency (Japan)

Conference Programme Committee

Sergei V. Bulanov, Japan Atomic Energy Agency (Japan)
Thomas E. Cowan, Helmholtz-Zentrum Dresden-Rossendorf e.V.
(Germany)
Wolfgang Enghardt, Technische Universität Dresden (Germany)
Jean-Claude Kieffer, Institut National de la Recherche Scientifique
(Canada)

Chang-Ming C. Ma, Fox Chase Cancer Center (United States)
Victor Malka, Ecole Nationale Supérieure de Techniques Avancées
(France)
Franz Pfeiffer, Technische Universität München (Germany)
Markus Roth, Kiepenheuer-Institut für Sonnenphysik (Germany)
Akifumi Yogo, Japan Atomic Energy Agency (Japan)

Session Chairs

Laser-driven Proton Acceleration I
Paul McKenna, University of Strathclyde (United Kingdom)

Laser-driven Proton Acceleration II
Klaus Spohr, University of the West of Scotland (United Kingdom)

Laser Accelerators for Medical Imaging
Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)

Laser Accelerated Electron Beams and Applications
Paul R. Bolton, Japan Atomic Energy Agency (Japan)

Open Discussion on Laser-driven Medical Applications
Kenneth W. D. Ledingham, University of Strathclyde (United Kingdom)
