Volume 9515

Proceedings of SPIE 0277-786X, V. 9515

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Research Using Extreme Light: Entering New Frontiers with Petawatt-Class Lasers II, edited
by Georg Korn, Luis O. Silva, Proc. of SPIE Vol. 9515, 951501 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2197753

Proc. of SPIE Vol. 9515 951501-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

EXTREME LIGHT SOURCES AND FACILITIES I

9515 06	Extreme Light Infrastructure-Nuclear Physics (ELI-NP): status and perspectives (Invited Paper) [9515-6]
---------	--

SECONDARY SOURCES GENERATED BY HIGH POWER LASERS

9515 0B	High field physics at ALLS (Invited Paper) [9515-10]
9515 0C	High-order harmonics from relativistic laser plasmas [9515-11]

HIGH-POWER INTENSE LASER SOURCES WITH ENHANCED REPETITION RATES

9515 0F	ELI-Beamlines: development of next generation short-pulse laser systems (Invited Paper) [9515-14]
9515 0I	Focal spot of femtosecond laser pulse under tight focusing condition [9515-17]
9515 0J	Final EDP Ti: sapphire amplifiers for ELI project [9515-18]

HIGH-FIELD PHYSICS AND SIMULATIONS I

9515 0L	Spin dynamics in relativistic light-matter interaction [9515-20]
9515 0M	Gamma-ray generation in the interaction of two tightly focused laser pulses with a low-density target composed of electrons (Best Student Paper Award) [9515-21]
9515 0N	The non-linear Compton scattering in plasma obtained using a novel analytical solution of the strong-field Klein-Gordon [9515-22]
9515 0O	Proposal for an LSW experiment (light shining through walls) at ELI-Beamlines [9515-23]

EXTREME LIGHT SOURCES AND FACILITIES II

9515 0S	World's largest high-energy petawatt laser LFEX as a user's facility (Invited Paper) [9515-27]
---------	---

- 9515 0U **Research activities on high-intensity laser and high field physics at APRI-GIST (Invited Paper) [9515-29]**

HIGH-FIELD PHYSICS AND SIMULATIONS II

- 9515 0W **Robust signatures of quantum radiation reaction with an electron beam in a focused laser pulse [9515-31]**
- 9515 10 **Motion of a charge in a superstrong electromagnetic standing wave [9515-36]**

ACCELERATION OF PARTICLES USING HIGH-POWER PW CLASS LASERS I

- 9515 18 **Petawatt laser pulses for proton-boron high gain fusion with avalanche reactions excluding problems of nuclear radiation (Invited Paper) [9515-44]**
- 9515 19 **Design and development of the HELL user station: beam transport, characterization, and shielding [9515-45]**

ACCELERATION OF PARTICLES USING HIGH-POWER PW CLASS LASERS II

- 9515 1C **Photonuclear and radiography applications of narrowband, multi-MeV all-optical Thomson x-ray source (Invited Paper) [9515-48]**
- 9515 1D **Laser-driven multicharged heavy ion beam acceleration [9515-49]**
- 9515 1E **Numerical investigations on a compact magnetic fusion device for studying the effect of external applied magnetic field oscillations on the nuclear burning efficiency of D-T and p-¹¹B fuels [9515-50]**
- 9515 1F **Reduction of angular divergence of laser-driven ion beams during their acceleration and transport [9515-51]**
- 9515 1G **Enhanced ion acceleration by using femtosecond laser pulses at the third harmonic frequency [9515-52]**

POSTER SESSION

- 9515 1H **Magnetic reconnection research with petawatt-class lasers [9515-53]**
- 9515 1I **Evolution of relativistic solitons in underdense plasmas [9515-54]**
- 9515 1J **Radiochromic film diagnostics for laser-driven ion beams [9515-55]**
- 9515 1K **First experimental test of quadrupole lens-free multiple profile monitor technique for electron beam emittance measurement with a PW laser system [9515-56]**

9515 1L **Towards the effect of transverse inhomogeneity of electromagnetic pulse on the process of ion acceleration in the RPDA regime** [9515-57]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jiri Homola, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)
Chris Edwards, Central Laser Facility, Science and Technology
Facilities Council (United Kingdom)
Mike Dunne, SLAC National Accelerator Laboratory (United States)
and Linac Coherent Light Source (United States)
Ivo Rendina, Istituto per la Microelettronica e Microsistemi, CNR (Italy)

Honorary Symposium Chair

Miroslav Miller, Institute of Photonics and Electronics of the ASCR,
v.v.i. (Czech Republic)

Conference Chairs

Georg Korn, Institute of Physics of the ASCR, v.v.i. (Czech Republic)
Luis O. Silva, Universidade Técnica de Lisboa (Portugal)

Conference Programme Committee

Sergei V. Bulanov, Japan Atomic Energy Agency (Japan)
Thomas E. Cowan, Helmholtz-Zentrum Dresden-Rossendorf e. V.
(Germany)
Todd Ditmire, The University of Texas at Austin (United States)
Dimitrios Charalambidis, Foundation for Research and Technology-
Hellas (Greece) and ELI Alps (Hungary)
Cristina Hernandez-Gomez, Rutherford Appleton Laboratory
(United Kingdom)
Nelson C. Lopes, Universidade Técnica de Lisboa (Portugal)
Mattias Marklund, Umeå University (Sweden)
Nikolay Narozhny, National Research Nuclear University MEPhI
(Russian Federation)
David Neely, Rutherford Appleton Laboratory (United Kingdom)
Johann Rafelski, The University of Arizona (United States)
Bedřich Rus, Institute of Physics of the ASCR, v.v.i. (Czech Republic)
and ELI Beamlines (Czech Republic)
Stefan Weber, ELI Beamlines (Czech Republic)
Matthew Zepf, Queen's University Belfast (United Kingdom)
Victor Zamfir, Horia Hulubei National Institute of Physics and Nuclear
Engineering (Romania)
