xv Introduction

SELECTED PAPERS FROM CONFERENCES OF THE PHOTOELECTRONIC TECHNOLOGY COMMITTEE OF THE CHINESE SOCIETY OF ASTRONAUTICS 2014, PART II

9522 02  An extraction method of the tank characteristic quantities in infrared thermal images [9522-1]
9522 03  Effect of residual gas on cathode photoelectric emission life in generation III L-L-L tube [9522-5]
9522 05  Design of an infrared four-mirror optical system with large relative aperture [9522-10]
9522 06  Simulation of surface deformation for the lithographic object lens by Zernike polynomials [9522-11]
9522 07  Geometric correction method of rotary scanning hyperspectral image in agriculture application [9522-16]
9522 08  High precision digital control LED spot light source used to calibrate camera [9522-17]
9522 09  Effect of random phase errors on coherent beam combining based on liquid crystal phased array [9522-18]
9522 0A  A fiber DBR laser based vector hydrophone for ultrasonic medical applications [9522-22]
9522 0B  Concept and realization of measuring spatial structure of atmospheric optical turbulence by the fiber optical turbulence sensor array [9522-23]
9522 0C  Integrated multi-channel receiver for a pulsed time-of-flight laser radar [9522-26]
9522 0D  Test and analysis of the infrared characteristic of the plume-smoke [9522-29]
9522 0E  Directional force measurement technology based on fiber optical laser heterodyning demodulation [9522-31]
9522 0F  The signal detection technology of photoconductive detector with lock-in amplifier [9522-33]
9522 0G  Research on mechanical vibration impacts of GaAs photocathode photoemission performance [9522-35]

Proc. of SPIE Vol. 9522 952201-5
On simulation and verification of the atmospheric turbulent phase screen with Zernike polynomials [9522-111]

Simulation of hyperspectral imaging based on tunable Fabry-Pérot interferometer [9522-112]

Fabrication and surface profile simulation of sapphire microlens array [9522-113]

The integrated platform of controlling and digital video processing for underwater range-gated laser imaging system [9522-114]

Research on dual spectrum solar-blind ultraviolet corona detection system [9522-115]

Research and experiment of InGaAs shortwave infrared imaging system based on FPGA [9522-116]

Study on damage of K9 glass under 248nm ultraviolet pulsed laser irradiation [9522-117]

Dual cameras acquisition and display system of retina-like sensor camera and rectangular sensor camera [9522-119]

Discussion of beam quality of semiconductor lasers [9522-120]

Study on the relationship of dark current characteristics and materials surface defects of extended wavelength InGaAs photodiodes [9522-122]

Performance of four-stage thermoelectric cooler for extended wavelength InGaAs detectors [9522-123]

Spectroscopic properties of Nd³⁺/Yb³⁺ co-doped in lithium aluminum silicate glass for 1.0 μm fiber laser [9522-125]

Photo-and-dark-current-voltage characteristics of normal-incidence GaAs photodetectors with two types of electrode configurations [9522-126]

Electroluminescence of cubic boron nitride single crystal flakes with color-zoning [9522-127]

Measurement and analysis of aircraft and vehicle LRCS in outfield test [9522-128]

High performance InAs/GaSb superlattice long wavelength photodetectors based on barrier enhanced structures [9522-131]

Noise characteristic of AlGaN-based solar-blind UV avalanche photodiodes [9522-133]

Analysis of pixel circuits in CMOS image sensors [9522-136]

The field distribution in a finite number of nanostructured metal waveguide arrays [9522-139]

Research on micro-deformation of beam splitting mirror in holographic system by laser speckle method [9522-145]
| 9522 29 | Dark-current characteristics of GaN-based UV avalanche photodiodes [9522-147] |
| 9522 2A | A 15-bit incremental sigma-delta ADC for CMOS image sensor [9522-148] |
| 9522 2B | Blind image deblurring with edge enhancing total variation regularization [9522-151] |
| 9522 2C | A limb atmospheric radiance inversion method based on a sun-synchronous orbit satellite [9522-153] |
| 9522 2D | The application of IR detector with windowing technique in the small and dim target detection [9522-155] |
| 9522 2F | New design of a hybrid plasmonic waveguide [9522-161] |
| 9522 2G | Blind image deblurring based on trained dictionary and curvelet using sparse representation [9522-162] |
| 9522 2H | Defect structure and optical damage resistance of Zr:Ce:Fe:LiNbO$_3$ crystals [9522-166] |
| 9522 2I | Growth and photorefractive properties of Zr:Cu:Fe:LiNbO$_3$ crystals with various Li/Nb ratios [9522-167] |
| 9522 2J | A fast and practical calibration method for the phase measuring profilometry [9522-168] |
| 9522 2K | Discuss on the two algorithms of line-segments and dot-array for region judgement of the sub-satellite purview [9522-169] |
| 9522 2L | Polarization of focal spot for high numerical aperture radially polarized beam [9522-171] |
| 9522 2N | Visual saliency detection based on modeling the spatial Gaussianity [9522-175] |
| 9522 2O | Interaction of pulsed laser energy with bow shock in Mach 5 flow [9522-179] |
| 9522 2P | A non-destructive readout circuit of the linear array image sensor with over 90dB dynamic range and 190k fps for radar system [9522-182] |
| 9522 2Q | Modeling and simulation of time-gated FLIM SPAD image sensors [9522-186] |
| 9522 2R | Probability-based saliency detection approach for multi-features integration [9522-187] |
| 9522 2S | Automatic target locating system through cooperative dual-field imaging [9522-188] |
| 9522 2T | Backscattering metal gratings in QWIPs to increase the long wavelength infrared light absorption [9522-189] |
| 9522 2V | An infrared image non-uniformity correction algorithm based on pixels’ equivalent integral capacitance [9522-193] |
| 9522 2X | Surface morphology of LPE-growth GaSb quantum dots [9522-196] |
| 9522 2Y | A hyperspectral image optimizing method based on sub-pixel MTF analysis [9522-197] |
9522 22  Quality evaluation of adaptive optical image based on DCT and Rényi entropy  [9522-200]
9522 30  Terahertz digital holography image denoising using stationary wavelet transform  [9522-202]
9522 31  Strategies to improve system resolution in multiple configuration sensors  [9522-203]
9522 32  Integrated optics to improve resolution on multiple configuration  [9522-205]
9522 33  Fabrication of super-hydrophobic duo-structures  [9522-208]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing The Second International Seminar on High-power Laser Interaction with Matter and Application, The International Seminar on Space Surveillance Technology, and The Second Symposium on Combustion Diagnostics in Suzhou. It was truly a great pleasure for us to greet more than 600 participants from many different countries attending the three conferences. We firmly believe these conferences will become important international events in the field of optical technology.

The Second International Seminar on High-power Laser Interaction with Matter and Application was sponsored by the Chinese Society of Astronautics, and organized by the Photoelectronic Technology Committee, Chinese Society of Astronautics. The International Seminar on Space Surveillance Technology was sponsored by the Chinese Society of Astronautics, and organized by the Photoelectronic Technology Committee, Chinese Society of Astronautics. The Second Symposium on Combustion Diagnostics was sponsored by the Chinese Society of Astronautics, and organized by the China Aerodynamics Research and Development Center and State Key Laboratory of Laser Propulsion and Applications.

The purpose of the three conferences was to provide a forum for the participants to report and review innovative ideas, up-to-date progress and developments, and to discuss novel approaches to application in the optical field. We sincerely hope that research and development in the optical field will be promoted and because of international cooperation and sharing, so common interest will be enhanced.

On behalf of other co-chairmen, and the Organization Committee of the three conferences, we would like to genuinely thank our sponsors and cooperation organizers for all they have done for the conferences. Thanks also to all the authors for their contributions to the Proceedings, to all of the participants and friends for their interest and efforts in helping us to make the conferences possible, to the Program Committee for their effective work and valuable advice, and especially the Secretariat and the editors in SPIE for their tireless effort and outstanding services in preparing the conferences and publishing the Proceedings.
