SPIE

Volume 9552
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X
ISSN:1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B, ..., 0Z, followed by 10-12, 20-22, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.
## SESSION 1 SYNTHESIS AND CHARACTERIZATION I

<table>
<thead>
<tr>
<th>Title</th>

Nanoscale thermocapillarity enabled purification for horizontally aligned arrays of single walled carbon nanotubes (Invited Paper) [9552-38]

POSTER SESSION

Study of single walled carbon nanotube functionalization by means of surface enhanced Raman spectroscopy [9552-6]

Synthesis and characterization of covalently bound benzocaine graphite oxide derivative [9552-42]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs
Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Co-chairs
David L. Andrews, University of East Anglia (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs
Manijeh Razeghi, Northwestern University (United States)
miazar Ghazinejad, California State Univ., Fresno (United States)
Can Bayram, University of Illinois at Urbana-Champaign (United States)
Jae Su Yu, Kyung Hee University (Korea, Republic of)

Conference Program Committee
Seunghyun Baik, Sungkyunkwan University (Korea, Republic of)
Paolo Bondavalli, Thales Research & Technology (France)
Markus Buehler, Massachusetts Institute of Technology (United States)
Costel-Sorin Cojocaru, Ecole Polytechnique (France)
Ertugrul Cubukcu, University of Pennsylvania (United States)
Christos D. Dimitrakopoulos, University of Massachusetts Amherst (United States)
Charles M. Falco, College of Optical Sciences, The University of Arizona (United States)
Talia Gershon, IBM Thomas J. Watson Research Center (United States)
Kenji Hata, National Institute of Advanced Industrial Science and Technology (Japan)
Mark C. Hersam, Northwestern University (United States)
Seong Chan Jun, Yonsei University (Korea, Republic of)
Jeehwan Kim, IBM Thomas J. Watson Research Center (United States)
Horacio Lamela Rivera, Universidad Carlos III de Madrid (Spain)
Seung Hee Lee, Chonbuk National University (Korea, Republic of)
Young Hee Lee, Sungkyunkwan University (Korea, Republic of)
Xiuling Li, University of Illinois at Urbana-Champaign (United States)
Annick Loiseau, ONERA (France)
Jean-Pierre Luberton, University of Illinois at Urbana-Champaign (United States)
Masud Mansuripur, College of Optical Sciences, The University of Arizona (United States)
Ryan McClintock, Northwestern University (United States)
William I. Milne, University of Cambridge (United Kingdom)
Sedat Nizamoglu, Ozyegin University (Turkey)
Cengiz S. Ozkan, University of California, Riverside (United States)
Hongsik Park, Kyungpook National University (Korea, Republic of)
Philip W. T. Pong, The University of Hong Kong (Hong Kong, China)
Fengnian Xia, Yale University (United States)
Wenjuan Zhu, University of Illinois at Urbana-Champaign (United States)

Session Chairs

1 Synthesis and Characterization I
   Xiuling Li, University of Illinois at Urbana-Champaign (United States)

2 Devices I
   Ahmad E. Islam, Air Force Research Laboratory (United States)
   Jean-Pierre Leburton, University of Illinois at Urbana-Champaign (United States)

3 Emerging 2D Materials for Electronic and Photonic Devices
   Wenjuan Zhu, University of Illinois at Urbana-Champaign (United States)
   Zachary R. Robinson, U.S. Naval Research Laboratory (United States)

Keynote Session
Manijeh Razeghi, Northwestern University (United States)

4 Devices II
   Norma E. Sosa, IBM Thomas J. Watson Research Center (United States)
   Sung Hun Jin, Incheon National University (Korea, Republic of)

5 Synthesis and Characterization II
   Jacky Even, Institut National des Sciences Appliquées de Rennes (France)
   D. Bruce Burckel, Sandia National Laboratories (United States)
