Proc. of SPIE Vol. 9560 956001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

SESSION 2

- 9560 05 **In-situ/operando soft x-ray spectroscopy characterization of interfacial phenomena in energy materials and devices (Keynote Paper) [9560-4]**
- 9560 06 **Metal-complex/semiconductor hybrids for carbon dioxide fixation (Invited Paper) [9560-5]**

SESSION 5

- 9560 0G **Synchrotron-based spectroscopy for solar energy conversion (Keynote Paper) [9560-14]**

SESSION 6

- 9560 0M **Preparation of Cu₂O/TiO₂ nanotube arrays and their photoelectrochemical properties as hydrogen-evolving photoanode [9560-20]**

SESSION 9

- 9560 0W **Effect of potential on the conductivity of electrodeposited Cu₂O film [9560-30]**

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
