SPIE

Volume 9573

Proceedings of SPIE 0277-786X, V. 9573

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optomechanical Engineering 2015, edited by Alson E. Hatheway, Proc. of SPIE Vol. 9573
957301 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2208518

Proc. of SPIE Vol. 9573 957301-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SYSTEM TESTING AND MATERIALS

9573 03	In-situ mitigation of radiation-induced attenuation in optical fiber used for sensing at nuclear facilities [9573-2]
9573 04	ZERODUR®: new stress corrosion data improve strength fatigue prediction [9573-3]
9573 05	Effect of major factors on damage threshold of optical rectification crystals [9573-5]

APPLICATIONS OF 3D PRINTING

9573 06	Optomechanical performance of 3D-printed mirrors with embedded cooling channels and substructures [9573-6]
9573 07	Extended volume and surface scatterometer for optical characterization of 3D-printed elements [9573-7]
9573 08	Optical fabrication of lightweighted 3D printed mirrors [9573-8]
9573 09	3D-additive manufactured optical mount [9573-9]

SYSTEM DESIGN

9573 0B	Elliptically framed tip-tilt mirror optimized for stellar tracking [9573-11]
9573 0C	Contamination and UV lasers: lessons learned [9573-12]

LOW COST SPACE OPTICS

9573 0E	Cost-optimized methods extending the solution space of lightweight monolithic ZERODUR® mirrors to larger sizes [9573-14]
9573 0F	Selection considerations between ZERODUR® and silicon carbide for dimensionally-stable spaceborne optical telescopes in two-earth-orbits [9573-15]
9573 0G	Evolving design criteria for very large aperture space-based telescopes and their influence on the need for integrated tools in the optimization process [9573-16]

- 9573 OH **Recent updates to the Arnold Mirror Modeler and integration into the evolving NASA overall design system for large space-based optical systems** [9573-17]

OPTOMECHANICAL ANALYSIS

- 9573 OI **Novel applications of active mirror analysis** [9573-18]
- 9573 OJ **Shear stresses in cemented and bonded optics due to temperature changes** [9573-19]
- 9573 OK **Unified optomechanical modeling: thermo-elastic stability of a fiber optic diffractive encoding system** [9573-20]
- 9573 OL **Light source heat absorption analysis of a Dyson-type lithography lens** [9573-21]

OPTICAL ELEMENT FABRICATION

- 9573 OM **Techniques for analyzing lens manufacturing data with optical design applications (Invited Paper)** [9573-22]
- 9573 ON **Dependency between removal characteristics and defined measurement categories of pellets** [9573-23]
- 9573 OO **Q-switched 1064nm laser source for photomechanical ablation in obsidianus lapis** [9573-24]
- 9573 OP **Residue stress analysis of molding aspherical plastic lens** [9573-25]
- 9573 OQ **A high contrast 400-2500 nm hyperspectral checkerboard consisting of Acktar material cut with a femto second laser** [9573-26]

COMPONENT MOUNTING

- 9573 OR **Unit moment analysis as a guide to mirror mount design** [9573-27]
- 9573 OS **Mechanical design of a precision linear flexural stage for 3D x-ray diffraction microscope at the Advanced Photon Source** [9573-28]
- 9573 OT **Pre-construction of giant steerable science mirror for TMT** [9573-29]

POSTER SESSION

- 9573 OU **Aligning and measuring the curvature and thickness of high-precision lens** [9573-4]
- 9573 OV **Analysis investigation of supporting and restraint conditions on the surface deformation of a collimator primary mirror** [9573-30]
- 9573 OW **Development of 1-m primary mirror for a spaceborne camera** [9573-31]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

H. Philip Stahl, NASA Marshall Space Flight Center (United States)

Conference Chair

Alson E. Hatheway, Alson E. Hatheway Inc. (United States)

Conference Program Committee

Anees Ahmad, Raytheon Missile Systems (United States)

Patrick A. Bournes, MicroMeasure, Inc. (United States)

James H. Burge, College of Optical Sciences, The University of Arizona (United States)

John M. Casstevens, Dallas Optical Systems, Inc. (United States)

Robert Gifford Chave, RCAP Inc. (United States)

Patrick A. Coronato, Raytheon Missile Systems (United States)

John G. Daly, Vector Engineering (United States)

Keith B. Doyle, MIT Lincoln Laboratory (United States)

Robert C. Guyer, BAE Systems (United States)

Mark J. Hegge, Ball Aerospace & Technologies Corporation (United States)

Tony Hull, University of New Mexico at Albuquerque (United States)

Frank W. Kan, Simpson Gumpertz & Heger Inc. (United States)

William Jeffrey Lees, Johns Hopkins University Applied Physics Laboratory (United States)

John J. Polizotti, BAE Systems (United States)

Santiago Royo Royo, Universidad Politècnica de Catalunya (Spain)

Ann F. Shipley, University of Colorado at Boulder (United States)

Deming Shu, Argonne National Laboratory (United States)

David M. Stubbs, Lockheed Martin Space Systems Company (United States)

Linda C. Usher, Executive Search Group (United States)

Daniel Vukobratovich, Raytheon Missile Systems (United States)

Paul R. Yoder Jr., Consultant (United States)

Carl H. Zweben, Consultant (United States)

Session Chairs

- 1 System Testing and Materials

Alson E. Hatheway, Alson E. Hatheway Inc. (United States)

- 2 Applications of 3D Printing
David M. Stubbs, Lockheed Martin Space Systems Company
(United States)
- 3 System Design
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 4 Optical Product Readiness
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 5 Low Cost Space Optics
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 6 Optomechanical Analysis
Anees Ahmad, Raytheon Missile Systems (United States)
- 7 Optical Element Fabrication
Mark J. Hegge, Ball Aerospace & Technologies Corporation
(United States)
- 8 Component Mounting
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
