Proc. of SPIE Vol. 9578 957801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 LENS DESIGN METHODOLOGY

9578 02	Simulation of the optical performance of refractive elements to mimic the human eye focusing [9578-1]
9578 03	The point spread function in paraxial optics [9578-2]
9578 04	Fast robust non-sequential optical ray-tracing with implicit algebraic surfaces [9578-3]
9578 06	Comparison of geometrical and diffraction optical transfer functions (Invited Paper) [9578-5]

SESSION 2 APPLICATIONS AND ANALYSIS I

9578 07	Integration design of endoscope with different viewing angles (Invited Paper) [9578-6]
9578 08	Recent experience with design and manufacture of cine lenses [9578-7]
9578 09	Ultra-compact hourglass lens for integrated cameras [9578-8]
9578 0A	Landsat-swath imaging spectrometer design [9578-9]

SESSION 3 OPTICAL TESTING AND ANALYSIS

9578 0B	Testing and alignment of freeform based multi-mirror telescopes (Invited Paper) [9578-10]
9578 0C	Tolerancing an optical freeform surface: an optical fabricator's perspective [9578-11]
9578 0D	Manufacture and analysis of a refractive surface with variable asphericity to model the human cornea [9578-12]

SESSION 4 APPLICATIONS AND ANALYSIS II

9578 0I	Modeling and design of a multichannel chromatic aberration compensated imaging system [9578-17]
---------	--

SESSION 5	OPTICAL MATERIAL UNDER COLD CONDITIONS
9578 0J	Temperature-dependent refractive index measurements of L-BBH2 glass for the Subaru CHARIS integral field spectrograph [9578-18]
9578 0L	Cryogenic refractive indices of S-LAH55, S-LAH55V, S-LAH59, S-LAM3, S-NBM51, S-NPH2, S-PHM52, and S-TIH14 Glasses [9578-20]
9578 0M	Temperature-dependent refractive index measurements of CaF ₂ , Suprasil 3001, and S-FTM16 for the Euclid near-infrared spectrometer and photometer [9578-21]
SESSION 6	SOLID STATE LIGHTING
9578 0N	Laser-activated remote phosphor light engine for projection applications [9578-22]
9578 0O	Complex visible scene projection technology [9578-23]
9578 0Q	High-performance LED luminaire for sports hall [9578-25]
	POSTER SESSION
9578 0U	Design considerations for an unconventional infrared prism with a 90 degree ray deviation [9578-29]
9578 0V	Optical modeling with precise spatial-chromatic light distribution in phosphor-converted white LEDs [9578-30]
9578 0W	Analysis of three-element zoom systems for laser beam expanders with tunable-focus lenses [9578-31]
9578 11	Extending the depth-of-field for microscopic imaging by means of multifocus color image fusion [9578-36]
9578 12	Optical model of optical volume diffusion plate: BSDF measurement of polycarbonate plate doped with silicon dioxide micro particle [9578-37]
9578 13	Coaxial fundus camera for ophthalmology [9578-38]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

This year, we accepted 38 papers, including 13 poster papers, for our conference on Current Developments in Lens Design and Optical Engineering XVI, of which 28 were presented at the conference over a period of two days. The papers were organized into six sessions covering lens design methodology, applications and analysis, optical testing and analysis, optical material under cold conditions, and solid state lighting. A total of 28 papers were presented. Two were cancelled, and eight were no-shows. A total of 23 papers are presented in these proceedings, including two invited papers. Surprisingly, the manuscripts of 10 of the presented papers were either not submitted or were incomplete. Of the two invited papers, one is on comparison of geometrical and diffraction optical transfer functions, and the other is on testing and alignment of freeform-based multiple-mirror telescopes. There are nine papers from the United States, three each from Mexico, Taiwan, and China, and one each from Belgium, Brazil, Czech Republic, Germany, and Turkey.
