Volume 9595

Proceedings of SPIE 0277-786X, V. 9595

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Radiation Detectors: Systems and Applications XVI, edited by Gary P. Grim, H. Bradford Barber,
Proc. of SPIE Vol. 9595, 959501 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2218088

Proc. of SPIE Vol. 9595 959501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Committee Page

X-RAY AND GAMMA-RAY SYSTEMS I

9595 02	Maximum likelihood source localization using elpasolite crystals as a dual gamma neutron directional detector [9595-1]
9595 04	Negative temporal cross covariance in $\text{SrI}_2:\text{Eu}$ [9595-23]
9595 05	Microsystem for remote sensing of high energy radiation with associated extremely low flux densities [9595-3]
9595 06	Measuring x-ray spectra of flash radiographic sources [9595-4]
9595 07	Auger compositional depth profiling of the metal contact-TlBr interface [9595-5]
9595 08	Design and optimization of a radiation detector for ground and spaced-based exposure [9595-6]

X-RAY AND GAMMA-RAY SYSTEMS II

9595 09	Detector blur associated with MeV radiographic imaging systems (Invited Paper) [9595-7]
9595 0A	Quantitative criteria for assessment of gamma-ray imager performance [9595-8]
9595 0B	Physical basis for signal separation for remote sensing of multiple high energy radiation sources [9595-9]

PARTICLE SYSTEMS

9595 0G	Spatial response characterization of He-4 scintillation detectors [9595-14]
9595 0J	Time gating for energy selection and scatter rejection: High-energy pulsed neutron imaging at LANSCE [9595-17]

POSTER SESSION

9595 0K	Evaluation of a gamma camera system for the RITS-6 accelerator using the self-magnetic pinch diode [9595-18]
9595 0L	Influence of tailed-current on UXO prospecting [9595-19]
9595 0M	An improved RF circuit for Overhauser magnetometer excitation [9595-20]
9595 0N	Stacked, filtered multi-channel X-ray diode array [9595-21]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chairs

Ali M. Khounsary, X-ray Optics, Inc. (United States) and Illinois Institute of Technology (United States)

Ralph B. James, Brookhaven National Laboratory (United States)

Conference Chairs

Gary P. Grim, Lawrence Livermore National Laboratory (United States)

H. Bradford Barber, The University of Arizona (United States)

Conference Program Committee

Stuart A. Baker, National Security Technologies, LLC (United States)

Patrick Feng, Sandia National Laboratories, California (United States)

Paul P. Guss, National Security Technologies, LLC (United States)

Khalid M. Hattar, Sandia National Laboratories (United States)

Ralph B. James, Brookhaven National Laboratory (United States)

Edward Steven Jimenez Jr., Sandia National Laboratories, (United States)

Will E. Johns, Vanderbilt University (United States)

Michael J. King, Rapiscan Systems Laboratories (United States)

Edward A. McKigney, Los Alamos National Laboratory (United States)

Wondwosen Mengesha, Physical Optics Corporation (United States)

Frank E. Merrill, Los Alamos National Laboratory (United States)

Michael R. Squillante, Radiation Monitoring Devices, Inc. (United States)

Session Chairs

- 1 X-Ray and Gamma-Ray Systems I
Daniel A. Lemieux, The University of Arizona (United States)
- 2 X-Ray and Gamma-Ray Systems II
Frank E. Merrill, Los Alamos National Laboratory (United States)
- 3 Target Diagnostics: Joint Session with Conferences 9591 and 9595
Gary P. Grim, Lawrence Livermore National Laboratory (United States)
- 4 Particle Systems
H. Bradford Barber, The University of Arizona (United States)
