Front Matter: Volume 9597

, "Front Matter: Volume 9597," Proc. SPIE 9597, Wavelets and Sparsity XVI, 959701 (29 September 2015); doi: 10.1117/12.2217870

SPIE.

Event: SPIE Optical Engineering + Applications, 2015, San Diego, California, United States

PROCEEDINGS OF SPIE

Wavelets and Sparsity XVI

Manos Papadakis
Vivek K. Goyal
Dimitri Van De Ville
Editors

10–12 August 2015
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 9597

Proceedings of SPIE 0277-786X, V. 9597

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Wavelets and Sparsity XVI, edited by Manos Papadakis, Vivek K. Goyal, Dimitri Van De Ville,
Proc. of SPIE Vol. 9597, 959701 · © 2015 SPIE · CCC code: 0277-786X/15/\$18
doi: 10.1117/12.2217870

Proc. of SPIE Vol. 9597 959701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Wavelets and Sparsity XVI*, edited by Manos Papadakis, Vivek K. Goyal, Dimitri Van De Ville, Proceedings of SPIE Vol. 9597 (SPIE, Bellingham, WA, 2015) Six-digit Article CID Number.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Author Index</i>
ix	<i>Conference Committee</i>

SPARSE REPRESENTATIONS IN MRI I

9597 03	Learning sparsifying filter banks [9597-2]
9597 04	Advanced image reconstruction strategies for 4D prostate DCE-MRI: steps toward clinical practicality [9597-3]
9597 05	Imaging industry expectations for compressed sensing in MRI [9597-4]

VARIATIONAL TECHNIQUES AND OPTIMIZATION FOR COMPRESSED SENSING

9597 06	A PDE-free variational model for multiphase image segmentation [9597-5]
9597 07	Dictionary learning for compressive parameter mapping in magnetic resonance imaging [9597-6]
9597 08	Semi-supervised high-dimensional clustering by tight wavelet frames [9597-7]
9597 09	Smooth affine shear tight frames: digitization and applications [9597-8]
9597 0A	A fast algorithm for reconstruction of spectrally sparse signals in super-resolution [9597-9]

FRAME THEORY AND APPLICATIONS

9597 0B	Algebraic and geometric spread in finite frames [9597-10]
9597 0C	Learning Boolean functions with concentrated spectra [9597-11]
9597 0D	Gabor fusion frames generated by difference sets [9597-12]
9597 0E	Tightness of stability bounds by null space property [9597-13]
9597 0F	Quasi-symmetric designs and equiangular tight frames [9597-14]

SPARSE AND DIRECTIONAL REPRESENTATIONS IN NEUROIMAGING

9597 0H	Image registration using the shearlet transform [9597-16]
---------	--

- 9597 OI **Shearlet-domain task-driven post-processing and filtering of CT noise** [9597-17]
- 9597 OJ **Geometry and dimensionality reduction of feature spaces in primary visual cortex** [9597-18]
- 9597 OK **Shearlet-based regularized ROI reconstruction in fan beam computed tomography** [9597-19]
- 9597 OL **Directional ratio based on parabolic molecules and its application to the analysis of tubular structures** [9597-20]
- 9597 OM **Investigating the impact of blood pressure increase to the brain using high-resolution serial histology and image processing** [9597-21]
- 9597 ON **Estimating brain's functional graph from the structural graph's Laplacian** [9597-58]

FRAME THEORY AND SPARSE APPROXIMATIONS

- 9597 OO **Phase retrieval** [9597-22]
- 9597 OP **Deterministic compressed sensing and quantization** [9597-23]
- 9597 OQ **Scalable filter banks** [9597-24]
- 9597 OS **Perturbations of fusion frames and the effect on their canonical dual** [9597-26]

COMPUTATIONAL BIOIMAGING

- 9597 OV **Fast live cell imaging at nanometer scale using annihilating filter-based low-rank Hankel matrix approach** [9597-29]
- 9597 OX **Image denoising by adaptive Compressed Sensing reconstructions and fusions** [9597-31]

SPARSE REPRESENTATIONS IN MRI II

- 9597 10 **Low-rank modeling of local k-space neighborhoods: from phase and support constraints to structured sparsity** [9597-34]
- 9597 11 **Sparse methods for Quantitative Susceptibility Mapping** [9597-35]
- 9597 13 **Data-driven adaptation of a union of sparsifying transforms for blind compressed sensing MRI reconstruction** [9597-37]

FRAME THEORY AND APPLICATIONS

- 9597 16 **The unconditional constants of frame expansions and cross-frame expansions** [9597-40]

9597 17 **A Bayesian approach to estimation of a statistical change-point in the mean parameter for high dimensional non-linear time series** [9597-41]

9597 18 **Fast angular synchronization for phase retrieval via incomplete information** [9597-42]

FRAME THEORY AND SPARSE APPROXIMATIONS

9597 19 **Detailing the equivalence between real equiangular tight frames and certain strongly regular graphs** [9597-43]

9597 1A **Connectivity of spaces of finite unit-norm tight frames** [9597-44]

MULTISCALE AND RANDOMIZED ALGORITHMS FOR LARGE DATA I

9597 1C **Geometric multi-resolution analysis for dictionary learning** [9597-46]

9597 1D **Geometric multi-resolution analysis and data-driven convolutions** [9597-47]

9597 1E **Higher-order graph wavelets and sparsity on circulant graphs** [9597-48]

KEYNOTE SESSION

9597 1F **Applied and computational harmonic analysis on graphs and networks (Keynote Paper)** [9597-49]

SPARSE ANALYSIS AND GRAPH MODELS IN NEUROIMAGING

9597 1I **Innovation-based sparse estimation of functional connectivity from multivariate autoregressive models** [9597-53]

9597 1L **Statistical methods for comparing brain connectomes at different scales** [9597-56]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Khan M. Iffekharuddin, Old Dominion University (United States)

Conference Chairs

Manos Papadakis, University of Houston (United States)

Vivek K. Goyal, Boston University (United States)

Dimitri Van De Ville, École Polytechnique Fédérale de Lausanne (Switzerland) and Université de Genève (Switzerland)

Conference Program Committee

Sophie Achard, Gipsa-lab (France)

Radu V. Balan, University of Maryland, College Park (United States)

Bernhard G. Bodmann, University of Houston (United States)

Peter G. Casazza, University of Missouri-Columbia (United States)

Fabrizio De Vico Fallani, Institut National de Recherche en Informatique et en Automatique (France)

Bin Dong, Peking University (China)

Jalal M. Fadili, ENSICAEN (France)

Matthew Fickus, Air Force Institute of Technology (United States)

Mathews Jacob, The University of Iowa (United States)

Gitta Kutyniok, Technische Universität Berlin (Germany)

Demetrio Labate, University of Houston (United States)

Fernanda Laezza, The University of Texas Medical Branch (United States)

Michael Liebling, Idiap Research Institute (Switzerland)

Yue M. Lu, Harvard University (United States)

Mauro Maggioni, Duke University (United States)

Jean-Christophe Olivo-Marin, Institut Pasteur (France)

Naoki Saito, University of California, Davis (United States)

Joshua D. Trzasko, Mayo Clinic (United States)

Michael Unser, École Polytechnique Fédérale de Lausanne (Switzerland)

Yves Wiaux, École Polytechnique Fédérale de Lausanne (Switzerland)

Rebecca M. Willett, University of Wisconsin-Madison (United States)

Session Chairs

1 Sparse Representations in MRI I

Mathews Jacob, The University of Iowa (United States)

Joshua D. Trzasko, Mayo Clinic (United States)

- 2 Variational Techniques and Optimization for Compressed Sensing
Bin Dong, Peking University (China)

- 3 Frame Theory and Applications
Peter G. Casazza, University of Missouri (United States)
Matthew Fickus, Air Force Institute of Technology (United States)

- 4 Sparse and Directional Representations in Neuroimaging
Demetrio Labate, University of Houston (United States)
Fernanda Laezza, The University of Texas Medical Branch
(United States)

- 5 Frame Theory and Sparse Approximations
Radu V. Balan, University of Maryland, College Park (United States)
Bernhard G. Bodmann, University of Houston (United States)
Gitta Kutyniok, Technische Universität Berlin (Germany)

- 6 Computational Bioimaging
Jean-Christophe Olivo-Marin, Institut Pasteur (France)
Michael Liebling, Idiap Research Institute (Switzerland)

- Keynote Session I
Vivek K. Goyal, Boston University (United States)

- 7 Sparse Representations in MRI II
Mathews Jacob, The University of Iowa (United States)
Joshua D. Trzasko, Mayo Clinic (United States)

- 8 Frame Theory and Applications
Peter C. Casazza, University of Missouri (United States)
Matthew Fickus, Air Force Institute of Technology (United States)

- 9 Frame Theory and Sparse Approximations
Radu V. Balan, University of Maryland, College Park (United States)
Bernhard G. Bodmann, University of Houston (United States)
Gitta Kutyniok, Technische Universität Berlin (Germany)

- 10 Multiscale and Randomized Algorithms for Large Data I
Yue M. Lu, Harvard University (United States)
Mauro Maggioni, Duke University (United States)

Keynote Session II

Dimitri Van De Dalle, École Polytechnique Fédérale de Lausanne
(Switzerland)

- 11 Multiscale and Randomized Algorithms for Large Data II
Yue M. Lu, Harvard University (United States)
Mauro Maggioni, Duke University (United States)
- 12 Sparse Analysis and Graph Models in Neuroimaging
Sophie Achard, Gipsa-lab (France)
Fabrizio De Vico Fallani, Institut National de Recherche en
Informatique et en Automatique (France)
