Event: Seventh International Conference on Digital Image Processing (ICDIP15), 2015, Los Angeles, United States

PROCEEDINGS OF SPIE

Seventh International Conference on Digital Image Processing (ICDIP 2015)

**Charles M. Falco
Xudong Jiang**
Editors

**9–10 April 2015
Los Angeles, California, United States**

Organized by
Wuhan University (China)
IACSIT—International Association of Computer Science and Information Technology
Nanyang Technological University (Singapore)

Published by
SPIE

Volume 9631

Proceedings of SPIE 0277-786X, V.9631

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Seventh International Conference on Digital Image Processing: ICDIP 2015, edited
by Charles M. Falco, Xudong Jiang, Proc. of SPIE Vol. 9631, 963101 · © 2015 SPIE
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2197946

Proc. of SPIE Vol. 9631 963101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

ix	<i>Authors</i>
xiii	<i>Conference Committee</i>
xv	<i>Introduction</i>

SESSION 1 IMAGE PROCESSING TECHNOLOGY

9631 02	A moving foreground objects extraction method under camouflage effect [9631-10]
9631 03	A novel iterative algorithm to text segmentation for web born-digital images [9631-50]
9631 04	A passive technique for detecting copy-move forgery with rotation based on polar complex exponential transform [9631-33]
9631 05	An image stitching method based on eigenvalues search [9631-61]
9631 06	An improved peer group method to filter impulsive noise for color images [9631-32]
9631 07	An improved sparse LS-SVR for estimating illumination [9631-62]
9631 08	Application of multi-scale singular vector decomposition to vessel classification in overhead satellite imagery [9631-18]
9631 09	Binary image segmentation based on optimized parallel K-means [9631-41]
9631 0A	Detect ships using saliency in infrared images with sea-sky background [9631-40]
9631 0B	Detecting of copy-move forgery in digital images using fractional Fourier transform [9631-88]
9631 0C	Efficient threshold for volumetric segmentation [9631-121]
9631 0D	Image compression based on GPU encoding [9631-59]
9631 0E	Image processing and applications based on visualizing navigation service [9631-29]
9631 0F	Image thresholding based on Adjusted Rand Index [9631-38]
9631 0G	Improved image de-noising algorithm based on the direction of diffusion [9631-58]
9631 0H	Improvement and implementation for Canny edge detection algorithm [9631-60]
9631 0I	Infrared and visible image fusion based on shearlet transform and image enhancement [9631-65]

- 9631 OJ **IR radiative properties modeling and feature extraction method on ballistic target** [9631-87]
- 9631 OK **Local surface curvature analysis based on reflection estimation** [9631-21]
- 9631 OL **Pattern characterization and connectivity analysis for edge feature extraction** [9631-112]
- 9631 OM **Research of image matching algorithm based on local features** [9631-91]
- 9631 ON **Research on non-rigid registration algorithm of DCE-MRI based on mutual information and optical flow** [9631-104]
- 9631 OO **Saliency detection based on multi-instance images learning** [9631-49]
- 9631 OP **The trigonometric interpolation spline surface and its application in image zooming** [9631-63]
- 9631 OQ **Unsupervised segmentation of soil x-ray microtomography images** [9631-54]
- 9631 OR **Weighted bilateral filtering using relative difference between pixels** [9631-85]
- 9631 OS **Multi-view object co-segmentation based on the mixture of links model** [9631-122]
- 9631 OT **A robust global linear method for structure from motion** [9631-123]

SESSION 2 IMAGE ANALYSIS AND APPLICATION

- 9631 OU **Color constancy technology based on detail description** [9631-35]
- 9631 OV **Computer image analysis in caryopses quality evaluation as exemplified by malting barley** [9631-45]
- 9631 OW **Design and implementation of semantics-based image retrieval system** [9631-110]
- 9631 OX **Design of a multifunction astronomical CCD camera** [9631-73]
- 9631 OY **Different methods of image segmentation in the process of meat marbling evaluation** [9631-55]
- 9631 OZ **Genre-based image classification using ensemble learning for online flyers** [9631-83]
- 9631 10 **Identification of column edges of DNA fragments by using K-means clustering and mean algorithm on lane histograms of DNA agarose gel electrophoresis images** [9631-107]
- 9631 11 **Image acquisitions, processing, and analysis in the process of obtaining characteristics of horse navicular bone** [9631-17]
- 9631 12 **Light source design for double reflection transmission-type visibility meter** [9631-96]
- 9631 13 **Marbling classification of lamb carcasses with the artificial neural image analysis** [9631-42]

- 9631 14 **Minimalist identification system based on venous map for security applications** [9631-53]
- 9631 15 **Neural classifier in the estimation process of maturity of selected varieties of apples** [9631-43]
- 9631 16 **The recognition of potato varieties using neural image analysis method** [9631-46]
- 9631 17 **The use of image analysis to investigate C:N ratio in the mixture of chicken manure and straw** [9631-51]
- 9631 18 **Use of neural image analysis methods in the process to determine the dry matter content in the compost** [9631-48]
- 9631 19 **Use of the self-organizing feature map to diagnose abnormal engineering change** [9631-82]

SESSION 3 MACHINE VISION AND PATTERN RECOGNITION

- 9631 1A **3D face recognition algorithm of alignment and fitting** [9631-94]
- 9631 1B **A method of face detection with deep models for patrol videos** [9631-36]
- 9631 1C **A spatiotemporal feature-based approach for facial expression recognition from depth video** [9631-57]
- 9631 1D **Binary adaptive semi-global matching based on image edges** [9631-23]
- 9631 1E **Design and implementation of face recognition system based on Windows** [9631-12]
- 9631 1F **Enhancing the performance of cooperative face detector by NFGS** [9631-5]
- 9631 1G **Human action recognition based on GMM-UBM supervector using SVM with non-linear GMM KL and GUMI** [9631-115]
- 9631 1H **Human action recognition by extracting motion trajectories** [9631-20]
- 9631 1I **KD-tree based clustering algorithm for fast face recognition on large-scale data** [9631-31]
- 9631 1J **Path planning for mobile robots based on visibility graphs and A* algorithm** [9631-52]
- 9631 1K **Play estimation with motions and textures with automatic generation of template space-time map** [9631-44]
- 9631 1L **Research on fingerprint identification algorithm based on embedded system** [9631-124]
- 9631 1M **Fast and scale-adaptive target tracking via keypoint matching** [9631-78]
- 9631 1N **Maneuvering target tracking algorithm based on current statistical model in three dimensional space** [9631-89]

- 9631 1O **The analysis of frequency domain characteristics of emotional images in eye-tracking experiment** [9631-9]

SESSION 4 COMPUTERS AND SIGNAL PROCESSING TECHNOLOGY

- 9631 1P **A framework for extracting and representing project knowledge contexts using topic models and dynamic knowledge maps** [9631-6]
- 9631 1Q **A multi-stage noise adaptive switching filter for extremely corrupted images** [9631-25]
- 9631 1R **A new machine learning algorithm for removal of salt and pepper noise** [9631-79]
- 9631 1S **A novel murmur-based heart sound feature extraction technique using envelope-morphological analysis** [9631-75]
- 9631 1T **A real-time camera calibration system based on OpenCV** [9631-114]
- 9631 1U **A review of contrast pattern based data mining** [9631-117]
- 9631 1V **A steady tracking technology adopted to fast FH/BPSK signal under satellite channel** [9631-119]
- 9631 1W **An adaptive method to detect weak signal utilizing duffing oscillator** [9631-101]
- 9631 1X **An energy saving mechanism of EPON networks for real time video transmission** [9631-39]
- 9631 1Y **A maximally stable extremal region based scene text localization method** [9631-34]
- 9631 1Z **Application of clustering for customer segmentation in private banking** [9631-105]
- 9631 20 **Application of text mining for customer evaluations in commercial banking** [9631-103]
- 9631 21 **Continuous speech recognition based on convolutional neural network** [9631-90]
- 9631 22 **Design and realization of a weak signal acquisition system for optical spectrum analysis** [9631-37]
- 9631 23 **Emitter frequency refinement based on maximum likelihood** [9631-71]
- 9631 24 **Filter ensemble regularized common spatial pattern for EEG classification** [9631-97]
- 9631 25 **Implementation of weighted summation type fractional Fourier transform on FPGA** [9631-77]
- 9631 26 **Improving MAP arithmetic decoding of H.264 intra modes using residual redundancy** [9631-26]
- 9631 27 **Improving ontology matching with propagation strategy and user feedback** [9631-98]
- 9631 28 **Introduction to fast indexing method for images in database** [9631-102]

- 9631 29 **Maximum matching initial selection for adaptive Gaussian chirplet decomposition** [9631-69]
- 9631 2A **Method and simulation for spacecraft clock correction based on x-ray pulsars signal** [9631-92]
- 9631 2B **Moiré fringe center determination using artificial neural network** [9631-64]
- 9631 2C **Nonlinear estimation of coherent phase vibrations for statistical signals through multivariable analyses** [9631-30]
- 9631 2D **NoSQL: collection document and cloud by using a dynamic web query form** [9631-67]
- 9631 2E **Panel labels extraction from multi-panel figures for facilitating multi-modal information retrieval** [9631-81]
- 9631 2F **Research on micro-blog character analysis based on Naïve Bayes** [9631-109]
- 9631 2G **Robust hand tracking with on-line and off-line learning** [9631-47]
- 9631 2H **SAR raw data compression based on geometric characteristic of Gaussian curve** [9631-16]
- 9631 2I **Signal recognition and parameter estimation of BPSK-LFM combined modulation** [9631-72]
- 9631 2J **Statistical process control based chart for information systems security** [9631-66]
- 9631 2K **Stock price forecasting using secondary self-regression model and wavelet neural networks** [9631-13]
- 9631 2L **Multitaper spectral estimator based on a cost minimization approach** [9631-125]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

The International Conference on Digital Image Processing is initiated by Wuhan University, China, and the International Association of Computer Science and Information Technology and assisted by Nanyang Technological University, Singapore, and many other universities and institutes every year. This year's ICDIP 2015 was held 9–10 April in Los Angeles, California, United States and marks the seventh year of this annual conference. Previous conferences included: ICDIP 2009 (Bangkok, Thailand), ICDIP 2010 (Singapore), ICDIP 2011 (Chengdu, China), ICDIP 2012 (Kuala Lumpur, Malaysia), ICDIP 2013 (Beijing, China) and ICDIP 2014 (Athens, Greece). The 2015 Conference Chair was Charles M. Falco, University of Arizona, United States.

The conference was organized to gather members of our international community of scientists so that researchers from around the world could present their cutting edge work and expand our community's knowledge and insight into the significant challenges currently being addressed by that research. The conference program committee was quite diverse and truly international, with members from the Americas, Europe, Asia, Africa and Oceania.

This proceedings volume contains fully referenced papers presented at ICDIP 2015. The conference theme this year was Digital Image Processing. The main goal of the conference was to provide international scientific forums for the exchange of new ideas and in-depth interaction through discussions with peers from around the world. The conference solicited and gathered technical research submissions related to all aspects of digital image processing. All of the submitted papers in these proceedings have been peer reviewed by members of the scientific committee, external reviewers, and editorial board members, depending on the subject matter of the paper. Review and initial selection was conducted electronically. After the rigorous peer-review process, the submitted papers were selected on the basis of originality, significance, and clarity for the purpose of the conference. The selected papers and additional late-breaking contributions presented as lectures made for an exciting technical program. The high quality of the program, which was guaranteed by the presence of an unparalleled number of internationally recognized top experts, can be assessed when reading the program contents. The conference was a unique event, where attendees were able to appreciate the latest results in their fields of expertise, as well as acquire additional knowledge in other fields.

We are grateful to all those who contributed to the success of ICDIP 2015. We would like to thank the program chairs, organization staff, and the members of the program committees for their work. Thanks also go to the staff of SPIE for their great support in publishing the proceedings. We hope that all participants and other interested readers benefit scientifically from these proceedings and find them stimulating, as well.

Finally, we hope that you had a unique, rewarding, and enjoyable week at ICDIP 2015 in Los Angeles.
