Proceedings of SPIE 0277-786X, V. 9660

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

SPECKLE 2015: VI International Conference on Speckle Metrology, edited by Fernando Mendoza Santoyo,
Eugenio R. Méndez, Proc. of SPIE Vol. 9660, 966001 · © 2015 SPIE · CCC code:
0277-786X/15/\$18 · doi: 10.1117/12.2206040

Proc. of SPIE Vol. 9660 966001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xiii	<i>Introduction</i>

SESSION I

9660 02	Comparison between thermographic and holographic techniques for nondestructive testing of composites: similarities, differences and potential cross-fertilization (Invited Paper) [9660-92]
9660 03	Quality assessment of de-noising algorithms in digital Fresnel holography [9660-43]
9660 04	Local strain field measurement using phase gradient estimation from holographic speckle correlation [9660-77]
9660 06	Bending moment evaluation of a long specimen using a radial speckle pattern interferometer in combination with relaxation methods [9660-11]
9660 07	Evaluation of the uncertainty of phase-difference measurements in (quasi-)Fourier transform digital holographic interferometry [9660-48]
9660 08	Optimal single beam wave-field reconstruction with application to speckle field recovery [9660-75]

SESSION II

9660 0A	Monitoring of cadmium influence on ultra short-term growth dynamics of plants using a highly sensitive interferometric technique, SIT [9660-73]
9660 0B	Proposal of a bio-speckle descriptor for computing machine take decisions [9660-66]
9660 0D	Analysis of the speckle pattern produced by mixtures of polystyrene microspheres: an attempt to explain fruits ripening process [9660-3]

SESSION III

9660 0F	Enhanced axial localization of rough objects using statistical fringe processing algorithm (Invited Paper) [9660-68]
9660 0G	Digital holographic interferometry as a tool to obtain shapes [9660-31]

- 9660 OH **A flexible method for residual stress measurement of spray coated layers by laser made hole drilling and SLM based beam steering** [9660-74]
- 9660 OI **Temperature measurement of axi-symmetric butane diffusion flame under the influence of upward decreasing gradient magnetic field using digital holographic interferometry** [9660-61]
- 9660 OJ **Combination of temporal phase unwrapping and long-wave infrared digital holographic interferometry for metrology of mosaic detector under space simulated conditions** [9660-36]

SESSION IV

- 9660 ON **Time-averaged phase-stepped ESPI with CO₂ laser and shearography in the visible for identification of vibration mode shapes** [9660-24]
- 9660 OO **Transient response of a plate convolved with a mechanical shaker using high speed optical interferometry** [9660-79]
- 9660 OR **Digital image correlation used to analyze a brick under compression test** [9660-65]
- 9660 OS **Analysis of alcohol-water diffusion process using digital holographic interferometry** [9660-64]

SESSION V

- 9660 OU **Speckle-based wavemeter** [9660-27]
- 9660 OV **Stimulated Raman scattering imaging for studying specific species** [9660-14]
- 9660 OW **Hybrid Young interferometer for high resolution measurement of dynamic speckle using high birefringence liquid crystal** [9660-7]
- 9660 OX **Real-time monitoring of corks' water absorption using laser speckle temporal correlation** [9660-20]
- 9660 OY **Generation of high-resolution dynamic wavefronts for speckle-based measurements of complex surface shapes** [9660-15]

SESSION VI

- 9660 OZ **Two configurations of miniature Mirau interferometry for swept-source OCT imaging: applications in dermatology and gastroendoscopy (Invited Paper)** [9660-78]
- 9660 IO **Observation of drying process of multilayered paint using fOCT based on dynamic speckles** [9660-72]

- 9660 11 **Measurement of elastic and thermal properties of composite materials using digital speckle pattern interferometry** [9660-60]
- 9660 12 **Non-destructive optical methods for the study of soft tissues** [9660-30]
- 9660 14 **Optimum beam ratio of speckle deformation interferometry using only two speckle patterns** [9660-1]

SESSION VII

- 9660 15 **Signal formation in depth-scanning 3D interference microscopy at high numerical apertures (Invited Paper)** [9660-84]
- 9660 17 **Dynamic speckle interferometry of microscopic processes in solid state and thin biological objects** [9660-41]
- 9660 18 **Instantaneous phase-shifting Fizeau interferometry with high-speed pixelated phase-mask camera** [9660-63]
- 9660 19 **Synthetic aperture double exposure digital holographic interferometry for wide angle measurement and monitoring of mechanical displacements** [9660-44]
- 9660 1A **Interferometric comparison of the performance of a CMOS and sCMOS detector** [9660-33]

SESSION VIII

- 9660 1B **Speckle fields polarimetry: statistical analysis and polarization singularities measurements** [9660-26]
- 9660 1D **Coherence and polarization of polarization speckle generated by depolarizers and their changes through complex ABCD matrix** [9660-18]
- 9660 1E **Single-shot dual-polarization holography: measurement of the polarization state of a magnetic sample** [9660-17]
- 9660 1F **Single-shot common-path polarization holographic interferometer for studying flows** [9660-47]

POSTER SESSION

- 9660 1I **3D optical phase reconstruction within PMMA samples using a spectral OCT system** [9660-25]
- 9660 1J **Finding small displacements of recorded speckle patterns: revisited** [9660-28]
- 9660 1M **Application of dynamic speckle interferometry for diagnosis of metabolism change in cultured cells** [9660-40]

- 9660 1O **Visualization of deep blood vessels in speckle imaging using homogeneity measurement of the co-occurrence matrix** [9660-49]
- 9660 1P **Metaxial Talbot effect in free space** [9660-50]
- 9660 1Q **Dynamic speckle study of microbial growth** [9660-51]
- 9660 1S **Interference of speckle patterns projected by multimode fibers** [9660-56]
- 9660 1U **Ex-vivo assessment of tissue viability using dynamic laser speckle** [9660-58]
- 9660 1V **Portable equipment for determining ripeness in Hass avocado using a low cost color sensor** [9660-67]
- 9660 1X **Implementation of focusing and redirecting light through highly scattering media** [9660-91]
- 9660 1Y **A simple and efficient algorithm to reconstruct digital color holograms** [9660-46]
- 9660 1Z **Evaluation of activity images in dynamics speckle in search of objective estimators** [9660-89]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Welcome to Mexico and the colonial city of Guanajuato, a UNESCO-designated World Heritage Site. This historical city, with its colors and its network of winding streets, has been chosen as the venue of the Sixth International Conference on Speckle Metrology (SPECKLE 2015). With participants coming from more than 20 different countries, the conference is a truly international event that forms part of Mexico's celebrations for the International Year of Light (IYL).

The conference is the latest of a series of meetings devoted to speckle phenomena and their wide range of applications. The goal of this conference is to gather scientists, engineers and students who work in the field of speckle metrology and related techniques, and provide a stimulating environment for discussions. We believe that the conference will provide a good picture of the state of the field and indicate new directions for future research. In this sense, the Conference Chairs encouraged the submission of papers on topics that were not included in the past, like the use of the speckle in spectroscopy, imaging through scattering media and biological sciences. The works will be presented in eight oral sessions and one poster session, for a total of 71 papers that cover subjects like speckle statistics, speckle interferometry, digital techniques in speckle, dynamic laser speckle, interaction of light with random media, and imaging and spectroscopic techniques involving speckle.

We encourage you to contribute to the exchange of up-to-date information in your fields of expertise and share your latest achievements with your colleagues. The meeting should be an opportunity to discuss with old friends and establish new contacts. Hopefully, it will be the starting point of many new joint ventures and research projects. Your active participation will contribute to the atmosphere that we are trying to promote.

We hope you enjoy the meeting.

Fernando Mendoza Santoyo
