Event: Applied Optics and Photonics China (AOPC2015), 2015, Beijing, China

PROCEEDINGS OF SPIE

AOPC 2015: Optical Test, Measurement, and Equipment

**Sen Han
Jonathan D. Ellis
Junpeng Guo
Yongcai Guo**
Editors

**5–7 May 2015
Beijing, China**

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)

Sponsored by
Chinese Society for Optical Engineering (China)

Technical Co-sponsor and Publisher
SPIE

Volume 9677

Proceedings of SPIE 0277-786X, V. 9677

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2015: Optical Test, Measurement, and Equipment, edited by Sen Han, Jonathan D. Ellis, Junpeng Guo, Yongcai Guo, Proc. of SPIE Vol. 9677, 967701 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2222192

Proc. of SPIE Vol. 9677 967701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Author Index</i>
xiii	<i>Conference Committee</i>
xv	<i>Introduction</i>

OPTICAL TEST, MEASUREMENT TECHNOLOGY, AND EQUIPMENT

9677 02	Automatic control system design of laser interferometer [9677-3]
9677 03	The focal length control method for optical remote sensor [9677-8]
9677 04	A new algorithm of MEMS displacement measurement based on gray scale [9677-10]
9677 05	Fast and precise dense grid size measurement method based on coaxial dual optical imaging system [9677-11]
9677 06	Design of the improved cascade ADRC and its application in photoelectric tracking system [9677-12]
9677 07	The research on thermal adaptability reinforcement technology for photovoltaic modules [9677-13]
9677 08	A light down conversion infrared scene projector [9677-15]
9677 09	Measurement and analysis of sky background spectra in passive ranging [9677-16]
9677 0A	Permanent magnet synchronous motor servo system control based on μC/OS [9677-18]
9677 0B	Backscattering analysis in optical micro-resonators with mode splitting based on COMSOL [9677-19]
9677 0C	Dual-frequency-moiré based absolute position sensing for lens focusing [9677-20]
9677 0D	Design and implementation of spaceborne high resolution infrared touch screen [9677-21]
9677 0E	Research on the system of energy fluctuation for the nanosecond laser [9677-23]
9677 0F	Study and application of non-contact coordinate measuring system [9677-25]
9677 0G	Modeling Fizeau interferometer based on ray tracing with Zemax [9677-26]
9677 0H	A new three-dimensional shape measurement method based on double-frequency fringes [9677-27]

- 9677 OI **Ultrasensitive and selective detection of mercury (II) in serum based on the gold film sensor using a laser scanning confocal imaging-surface plasmon resonance system in real time** [9677-28]
- 9677 OJ **A non-linearity correction method of charge-coupled device array spectrometer** [9677-30]
- 9677 OK **Thickness measurement of low reflectance optical thin film with transparent substrate** [9677-31]
- 9677 OL **Non-contact FBG sensing based steam turbine rotor dynamic balance vibration detection system** [9677-33]
- 9677 OM **Bidirectional phase-shifting point diffraction interferometer for wavefronts testing** [9677-34]
- 9677 ON **The difference of detecting water mist and smoke by electromagnetic wave in simulation experiments** [9677-35]
- 9677 OO **A method to quickly test the emissivity with an infrared thermal imaging system within a small distance** [9677-36]
- 9677 OP **How to ensure the accuracy of the specification of UV-VIS-NIR spectrophotometers** [9677-37]
- 9677 OQ **Accurate time delay technology in simulated test for high precision laser range finder** [9677-40]
- 9677 OR **Detection of micro-sized air bubble defects in optical glass based on Mie theory** [9677-42]
- 9677 OS **Light scattering to investigate the surface quality of silicon substrates** [9677-45]
- 9677 OT **A measurement methodology for dynamic angle of sight errors in hardware-in-the-loop simulation** [9677-46]
- 9677 OU **A new technique for contact lenses measuring based on digital image processing** [9677-53]
- 9677 OV **Videometrics technology of flyers' pose** [9677-54]
- 9677 OW **Distributed deformation measurement of large space deployable mechanism based on FBG sensors** [9677-55]
- 9677 OX **Laser measurement and analysis of reposition error in polishing systems** [9677-57]
- 9677 OY **A novel scanning system using an industrial robot and the workspace measurement and positioning system** [9677-58]
- 9677 OZ **Optimal performance receiving ranging system model and realization using TCSPC technique** [9677-59]
- 9677 IO **Multiangle dynamic light scattering analysis using an improved recursion algorithm** [9677-60]

- 9677 11 **Stray light analysis and suppression method of dynamic star simulator based on LCOS splicing technology [9677-61]**
- 9677 12 **Analyses and experiments of background sunlight's effects on laser detection system [9677-62]**
- 9677 13 **Improvement of specular gloss instrumentation and standard [9677-63]**
- 9677 14 **Compound simulator IR radiation characteristics test and calibration [9677-65]**
- 9677 15 **Error analysis and optimization design of wide spectrum AOTF's optical performance parameter measuring system [9677-66]**
- 9677 16 **A new design of filter system in streak camera [9677-67]**
- 9677 17 **White light phase-stepping interferometry based on insensitive algorithm to periodic systematic error [9677-68]**
- 9677 18 **Multi-pass gas cell designed for VOCs analysis by infrared spectroscopy system [9677-69]**
- 9677 19 **Research on the traceability of absolute optical fiber power to cryogenic radiometer [9677-70]**
- 9677 1A **Use test system of 100GHz photodetector waveform calibrate rise time of oscilloscope [9677-71]**
- 9677 1B **Determination of the chromatic dispersion of liquids based on the liquid-prism SPR configuration in angular and spectral interrogations [9677-72]**
- 9677 1C **Focal length and radius of curvature measurement using wavefront difference method [9677-73]**
- 9677 1D **An accurate projector gamma correction method for phase-measuring profilometry based on direct optical power detection [9677-77]**
- 9677 1E **Design of double-group IR zoom lens [9677-78]**
- 9677 1F **The design of aerial camera focusing mechanism [9677-80]**
- 9677 1G **Demountable dual-FOV zooming optical design for IR system [9677-82]**
- 9677 1H **Approaches on calibration of bolometer and establishment of bolometer calibration device [9677-83]**
- 9677 1I **Laser differential reflection-confocal lens thickness measurement [9677-84]**
- 9677 1J **Overall non-linear correction of phase shifting mechanism in white light interferometry system based on displacement feedback control combined with fuzzy PID control [9677-85]**
- 9677 1K **An algorithm based on carrier squeezing interferometry for multi-beam phase extraction in Fizeau interferometer [9677-86]**

- 9677 1L **Beat frequency nonlinearity compensation based on fiber reference channel in laser frequency scanning interferometer** [9677-89]
- 9677 1M **Iterative algorithm for reconstructing rotationally asymmetric surface deviation with pixel-level spatial resolution** [9677-90]
- 9677 1N **Development of an underwater laser imaging system for micro-bubbles** [9677-92]
- 9677 1O **Optical system design for the aerial camera with dual band, common optical path, long focal, oblique view and focusing** [9677-93]
- 9677 1P **Comparisons between real and complex Gauss wavelet transform methods of three-dimensional shape reconstruction** [9677-97]
- 9677 1Q **Design, assembly and calibration of white-light microscopy interferometer** [9677-99]
- 9677 1R **Moiré fringe method for roll angular displacement measurement** [9677-101]
- 9677 1S **High precision measurement for asymmetry of backscattering coupling coefficient in square passive ring cavity** [9677-103]
- 9677 1T **Study on the shipboard radar reconnaissance equipment azimuth benchmark method** [9677-104]
- 9677 1U **Impact analysis of particulate loss on folded mirror surface in folded cavity ring-down spectrometer** [9677-106]
- 9677 1V **Research on the method of establishing the total radiation meter calibration device** [9677-108]
- 9677 1W **Design of a three-axis magnetic field measurement system for the magnetic shield of the ring laser gyroscope** [9677-109]
- 9677 1X **Study on the measurement system of the target polarization characteristics and test** [9677-110]
- 9677 1Y **Analysis of optical flat flatness measuring method with phase-shifting laser interferometer** [9677-111]
- 9677 1Z **A new single-station wMPS measurement method with distance measurement** [9677-112]
- 9677 20 **The interferometric method for measuring the generatrix straightness of high precision cone** [9677-113]
- 9677 21 **Theoretical model of adaptive fiber tip positioner based on flexible hinges and levers** [9677-114]
- 9677 22 **In-orbit test, verification and surveillance of the laser communication system (Invited Paper)** [9677-115]
- 9677 23 **Analysis and measurement about atmospheric turbulent outer scale** [9677-117]

- 9677 24 **Al-Li alloy AA2198's very high cycle fatigue crack initiation mechanism and its fatigue thermal effect** [9677-118]
- 9677 25 **Prediction trajectory of moving target based on parameter identify in RLS filtering with forget factor** [9677-120]
- 9677 26 **The coating curing properties study using terahertz time domain spectroscopy** [9677-121]
- 9677 27 **Measurement of super large radius optics in the detection of gravitational waves** [9677-126]
- 9677 28 **Rotation angle system of bidirectional reflectance distribution function measurement device** [9677-127]
- 9677 29 **Approach to the measurement accuracy of laser wavelength in air** [9677-128]
- 9677 2A **Study of space spectral characteristics of the BRDF diffuse standard plate in visible and infrared bands** [9677-130]
- 9677 2B **Design and implementation of reliability evaluation of SAS hard disk based on RAID card** [9677-131]
- 9677 2C **Reassure on accuracy of laser tracker based on single point measurement model** [9677-132]
- 9677 2D **Resolution improvement of grating spectrometer by using a tunable Fabry-Perot filter** [9677-133]
- 9677 2E **A new 3D shape measurement method using digital fringe projection technique** [9677-135]
- 9677 2F **The correction of vibration in frequency scanning interferometry based absolute distance measurement system for dynamic measurements** [9677-136]
- 9677 2G **A nuclear spin-based ^{129}Xe and ^{131}Xe using optical polarization** [9677-137]
- 9677 2H **Measurement and analysis on optical characteristics of *Aspergillus oryzae* spores in infrared band** [9677-139]
- 9677 2I **Arrayed optical switches based on integrated liquid crystal microlens arrays** [9677-140]
- 9677 2J **Analysis of the super-sensitivity of N00N and M&M' states under atmospheric influence** [9677-141]
- 9677 2K **Application of MEMS gyroscopes and accelerometers in FSM stabilization** [9677-142]
- 9677 2L **3D micro profile measurement with the method of spatial frequency domain analysis** [9677-143]
- 9677 2M **Accuracy of spectral response measurement for large area solar cells using filter method** [9677-145]
- 9677 2N **Improvement of the performance evaluation for solar simulators** [9677-146]

- 9677 2O **Research on test technology of high sensitivity and high frame rate of far ultraviolet spectroscopy** [9677-147]
- 9677 2P **The research on influence of star sensors' calibration accuracy caused by spectrum unmatched** [9677-149]
- 9677 2Q **Vertical coordinates measurement based on intersection laser screens** [9677-153]
- 9677 2R **Design of refocusing system for a high-resolution space TDICCD camera with wide-field of view** [9677-154]
- 9677 2S **Analysis of focusing accuracy for multispectral CCD camera based on satellite** [9677-156]
- 9677 2T **The research on measurement technology of high dynamic range laser focal spot** [9677-22]
- 9677 2U **The design and research of distributed cooling type high concentrated photovoltaic module** [9677-152]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Guangjun Zhang, Beihang University (China)
Byounggho Lee, Seoul National University (Korea, Republic of)

Conference Co-Chairs

Desheng Jiang, Wuhan University of Technology (China)
Hequan Wu, Chinese Academy of Engineering (China)
Huitao Fan, Aviation Key Laboratory of Science and Technology on Infrared Detector (China)
Junhao Chu, Shanghai Institute of Technical Physics, CAS (China)
Jannick Rolland, University of Rochester (United States)
Lin Li, The University of Manchester (United Kingdom)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Min Gu, Swinburne University of Technology (Australia)
Qiming Wang, Institute of Semiconductors, CAS (China)
Wei Wang, Beijing Institute of Aerospace Control Devices of CASC (China)
Yue Hao, Xidian University (China)
Zheng You, Tsinghua University (China)

Program Committee

Andreas Tünnermann, Friedrich-Schiller-Universität Jena (Germany)
Baiou Guan, Jinan University (China)
Bin Xiangli, Shanghai Engineering Center for Microsatellites (China)
Byounggho Lee, Seoul National University (Korea, Republic of)
Buwen Cheng, Institute of Semiconductors, CAS (China)
Chun Tang, Institute of Applied Electronics, CAEP (China)
Chunhua Shen, The University of Adelaide (Australia)
Chueh Ting, Tianjin Jinhang Institute of Technical Physics (China)
Daniel Jaque, Universidad Autónoma de Madrid (Spain)
Dae Wook Kim, The University of Arizona (United States)
Dawei Zhang, University of Shanghai for Science and Technology (China)
Honghai Liu, University of Portsmouth (United Kingdom)
Haimei Gong, Shanghai Institute of Technical Physics, CAS (China)
Jannick Rolland, University of Rochester (United States)
Jinxue Wang, SPIE
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)

Jianping Chen, Shanghai Jiaotong University (China)
Junpeng Guo, The University of Alabama in Huntsville (United States)
Kevin P. Thompson, Synopsys, Inc. (United States)
Lan Jiang, Beijing Institute of Technology (China)
Lin Li, Beijing Institute of Technology (China)
Ligong Zheng, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Lin Li, The University of Manchester (United Kingdom)
Min Gu, Swinburne University of Technology (Australia)
Minghui Hong, National University of Singapore (Singapore)
Minlin Zhong, Tsinghua University (China)
Nanjian Wu, Institute of Semiconductors, CAS (China)
Satoshi Kawata, Osaka University (Japan)
Shibin Jiang, AdValue Photonics, Inc. (United States)
Sen Han, University of Shanghai for Science and Technology (China)
Suijian Xue, National Astronomical Observatories, CAS (China)
Tsutomu Shimura, The University of Tokyo (Japan)
Weibiao Chen, Shanghai Institute of Optics and Fine Mechanics, CAS (China)
Wei Wang, Beijing Institute of Aerospace Control Devices of CASC (China)
Weiping Yang, National University of Defense Technology (China)
Xiaocong Yuan, Shenzhen University (China)
Yang Ni, New Imaging Technologies (France)
Yanbiao Liao, Tsinghua University (China)
Yongcai Guo, Chongqing University, Ministry of Education (China)
Yongchun Xie, China Academy of Space Technology (China)
Yong Bi, Academy of Opto-electronics, CAS (China)
Yong Cheng, Wuhan Ordnance Non-Commissioned Officers Academy (China)
Zhiping Zhou, Peking University (China)

Session Chairs

- 1 **Sen Han**, University of Shanghai for Science and Technology (China)
- 2 **Junpeng Guo**, The University of Alabama in Huntsville (United States)
- 3 **Jonathan D. Ellis**, University of Rochester (United States)
- 4 **Hexin Wang**, Carl Zeiss AG (Germany)

Introduction

Applied Optics and Photonics, China (AOPC2015) is the annual conference of the Chinese Society for Optical Engineering, and it is also the largest academic and industrial event in the field of optical and optoelectronic technology in China. The AOPC2015 organization committee intended to build a cohesive platform for academic exchanges, industry exhibitions, and corporate negotiations. The conference had 7 themes, which included 22 technical conferences and 600 technical presentations. We sincerely hope that the research and development of optoelectronic technology was promoted, and that the international cooperation of the optical and optoelectronic industry was enhanced.

AOPC2015 was sponsored by the Chinese Society for Optical Engineering; SPIE, the Optical Society, the European Optical Society, and the Optical Society of Korea were technical co-sponsors. There were also 28 cooperating organizations that supported the conference. We received a total of 1,219 contributions from more than 15 countries, including: the United States, the United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, Republic of Korea, Thailand, Singapore, Russian Federation, and China. Nearly 700 submissions were accepted for the *Proceedings of SPIE*, and over 150 invited talks and papers were suggested to be published in Journals indexed by SCI and Ei. After careful discussion, we selected five plenary speeches, which were presented by famous scientists from the United States, the United Kingdom, Republic of Korea, Japan, and China. There were 205 invited talks in 12 of the technical conferences. On behalf of the organization committee of AOPC, I express thanks to all of the invited speakers and authors for their contributions to and support of the conference.

To celebrate the International Year of Light 2015, we set up 12 display boards highlighting IYL in the exhibition area on the first level. These display boards were to educate the public about light and the applications of light in society.

Finally, on behalf of Prof. Songlin Zhuang, the other co-chairs, and the organization committee of AOPC, I would like to heartily thank our sponsors and cooperating organizations for all they have done for the conference. I thank all of the participants and friends for their interest and efforts in helping us make the conference a success. I also thank the program committee for their effective work and valuable advice—especially the AOPC2015 secretariat and the SPIE staff for their tireless effort and outstanding services in preparing the conference and publishing the proceedings.

Again, we extend our warmest greetings to you and hope you had a pleasant and exciting stay in Beijing!

Guofan Jin
