Suijian Xue**
Editors

**5–7 May 2015
Beijing, China**

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)

Sponsored by
Chinese Society for Optical Engineering (China)

Technical Co-sponsor and Publisher
SPIE

Volume 9678

Proceedings of SPIE 0277-786X, V. 9678

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2015: Telescope and Space Optical Instrumentation, edited by Bin Xiangli, Dae Wook Kim, Suijian Xue,
Proc. of SPIE Vol. 9678, 967801 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2222193

Proc. of SPIE Vol. 9678 967801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Author Index</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

TELESCOPE AND SPACE OPTICAL INSTRUMENTATION

9678 02	Research radiometric calibration quantitative transfer methods between internal and external [9678-1]
9678 03	Low velocity tracking control based ADRC for large-scale telescope system [9678-6]
9678 04	Galvanometer control system design of aerial camera motion compensation [9678-9]
9678 05	A method to improve the precision of measuring focusing system [9678-10]
9678 06	Influence of phase function approximation on the scattering-intensity calculation [9678-11]
9678 07	Annular force based variable curvature mirror aiming to realize non-moving element optical zooming [9678-13]
9678 08	Construction of pre-slit system of Chinese SONG spectrograph [9678-15]
9678 09	Thermal design and flight validation for high precision camera [9678-16]
9678 0A	Selection of UV double grating monochromator parameters of a rotational Raman lidar detection atmospheric temperature [9678-17]
9678 0B	Optical technologies for space sensor [9678-19]
9678 0C	Improving noiseless linear amplification for long baseline optical interferometers with squeezing operator [9678-20]
9678 0D	Study on the infrared radiation characteristics of the sky background [9678-21]
9678 0E	Space-borne imager of mesospheric gravity waves [9678-24]
9678 0F	A novel method of wide searching scope and fast searching speed for image block matching [9678-25]
9678 0G	Research on the influence of satellite instrument index on retrieval accuracy of XCO₂ using near infrared bands [9678-26]

9678 OH	Detection ability of space-based optical observation system to space debris [9678-29]
9678 OI	The influence of aerosol scattering on XCO₂ retrieval accuracy from near-infrared satellite spectra [9678-37]
9678 OJ	Scintillation reduction by multiple phase-locked beams with different polarization angles [9678-38]
9678 OK	The design of an advanced CCD timing generator [9678-39]
9678 OL	Optical design of 400-1000nm spectral imaging system based on a single freeform mirror [9678-49]
9678 OM	A new ground-based differential absorption sunphotometer for measuring atmospheric columnar CO₂ and preliminary applications [9678-50]
9678 ON	A design of optical measurement laboratory for space-based illumination condition emulation [9678-54]
9678 OO	Retina-inspired redundant dictionary for infrared small target detection based on sparse representation [9678-56]
9678 OP	A concept design of deployable space membrane diffractive telescope [9678-59]
9678 OQ	Design and verification of focal plane assembly thermal control system of one space-based astronomy telescope [9678-60]
9678 OR	Hyperspectral imaging system for UAV [9678-62]
9678 OS	An automated 3D reconstruction method of UAV images [9678-63]
9678 OT	Retrieval of absorptive gas columnar amounts using atmospheric hyper-spectral irradiance measurements within visible spectrum [9678-64]
9678 OU	Thermal design and simulation of an attitude-varied space camera [9678-65]
9678 OV	A sensitivity study of atmospheric reflectance to aerosol layer height based on multi-angular polarimetric measurements [9678-66]
9678 OW	Design and analysis of supporting structure between the primary mirror and the secondary mirror on a space telescope [9678-67]
9678 OX	Research on ground-based LWIR hyperspectral imaging remote gas detection [9678-68]
9678 OY	Optimization analysis of primary mirror in large aperture telescope based on workbench [9678-69]
9678 OZ	Study the polarization and depolarization properties of atmospheric aerosol multiple scattering based on the successive order of scattering [9678-70]
9678 10	Three-dimension scanning micro pulse lidar for detecting haze space distribution [9678-71]

- 9678 11   **A noise error estimation method for Shack-Hartmann wavefront sensor [9678-76]**
- 9678 12   **The study of control methods in opto-electronic tracking technology for fast object with horizontal gimbal [9678-77]**
- 9678 13   **Conceptual design of a hybrid parallel mechanism for mask exchanging of TMT [9678-78]**
- 9678 14   **Serial robot for the trajectory optimization and error compensation of TMT mask exchange system [9678-79]**
- 9678 15   **Study of absolute detection technique with the rotational Raman lidar for atmospheric temperature [9678-80]**
- 9678 16   **Automatic focusing system of BSST in Antarctic [9678-83]**
- 9678 17   **The infrared spectral transmittance of Aspergillus niger spore aggregated particle swarm [9678-85]**
- 9678 18   **Grating exchange system of independent mirror supported by floating rotary stage [9678-86]**
- 9678 19   **Analysis on the structure of the TMT's Atmospheric Dispersion Corrector [9678-88]**
- 9678 1A   **A study on typical aerosol extinction profile under clear sky condition in Beijing measured by ground-based Lidar [9678-89]**
- 9678 1B   **A Monte Carlo simulation for predicting photon return from sodium laser guide star [9678-91]**

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

- 3 **Suijian Xue**, National Astronomical Observatories, CAS (China)
- 4 **Zhong Liu**, Yunnan Observatories, CAS (China)

Introduction

Applied Optics and Photonics, China (AOPC2015) is the annual conference of the Chinese Society for Optical Engineering, and it is also the largest academic and industrial event in the field of optical and optoelectronic technology in China. The AOPC2015 organization committee intended to build a cohesive platform for academic exchanges, industry exhibitions, and corporate negotiations. The conference had 7 themes, which included 22 technical conferences and 600 technical presentations. We sincerely hope that the research and development of optoelectronic technology was promoted, and that the international cooperation of the optical and optoelectronic industry was enhanced.

AOPC2015 was sponsored by the Chinese Society for Optical Engineering; SPIE, the Optical Society, the European Optical Society, and the Optical Society of Korea were technical co-sponsors. There were also 28 cooperating organizations that supported the conference. We received a total of 1,219 contributions from more than 15 countries, including: the United States, the United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, Republic of Korea, Thailand, Singapore, Russian Federation, and China. Nearly 700 submissions were accepted for the *Proceedings of SPIE*, and over 150 invited talks and papers were suggested to be published in Journals indexed by SCI and Ei. After careful discussion, we selected five plenary speeches, which were presented by famous scientists from the United States, the United Kingdom, Republic of Korea, Japan, and China. There were 205 invited talks in 12 of the technical conferences. On behalf of the organization committee of AOPC, I express thanks to all of the invited speakers and authors for their contributions to and support of the conference.

To celebrate the International Year of Light 2015, we set up 12 display boards highlighting IYL in the exhibition area on the first level. These display boards were to educate the public about light and the applications of light in society.

Finally, on behalf of Prof. Songlin Zhuang, the other co-chairs, and the organization committee of AOPC, I would like to heartily thank our sponsors and cooperating organizations for all they have done for the conference. I thank all of the participants and friends for their interest and efforts in helping us make the conference a success. I also thank the program committee for their effective work and valuable advice—especially the AOPC2015 secretariat and the SPIE staff for their tireless effort and outstanding services in preparing the conference and publishing the proceedings.

Again, we extend our warmest greetings to you and hope you had a pleasant and exciting stay in Beijing!

Guofan Jin
