Event: XXI International Symposium Atmospheric and Ocean Optics. Atmospheric Physics, 2015, Tomsk, Russian Federation

PROCEEDINGS OF SPIE

21st International Symposium On Atmospheric and Ocean Optics: Atmospheric Physics

**Gennadii G. Matvienko
Oleg A. Romanovskii**
Editors

**22–26 June 2015
Tomsk, Russian Federation**

Organized by
V.E. Zuev Institute of Atmospheric Optics SB RAS, Tomsk (Russian Federation)
Institute of Solar-Terrestrial Physics SB RAS, Irkutsk (Russian Federation)

Sponsored by
Russian Foundation for Basic Research (Russian Federation)
Siberian Branch of Russian Academy of Sciences (Russian Federation)

Volume 9680
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 9680

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

21st International Symposium on Atmospheric and Ocean Optics: Atmospheric Physics,
edited by G. G. Matvienko, O. A. Romanovskii, Proc. of SPIE Vol. 9680, 968001
© 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2228324

Proc. of SPIE Vol. 9680 968001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xix	<i>Authors</i>
xxv	<i>Conference Committee</i>
xxix	<i>Introduction</i>

Part One

SESSION 1	MOLECULAR SPECTROSCOPY AND ATMOSPHERIC RADIATIVE PROCESSES
9680 02	Continuum water vapor absorption in the 4000–8000cm⁻¹ region [9680-75]
9680 03	On the ck-correlation in the 9.6μm O₃ band [9680-79]
9680 04	The D₂O absorption spectra in SiO₂ aerogel pores: technical features of treatment [9680-82]
9680 05	Calculation of the water vapor line intensities for rotational transitions between high-excited energy levels [9680-86]
9680 06	Spectral structure of the water vapour continuum absorption in 2.7 and 6.25 μm bands [9680-88]
9680 07	Estimation of self-broadening for SO₂ lines [9680-112]
9680 08	High-temperature spectral dependences of ¹⁴N¹⁶O₂ in the range of pure rotational and vibrational-rotational transitions [9680-115]
9680 09	A systematization of spectral data on the methanol molecule [9680-117]
9680 0A	Linewidths and temperature exponents of CH₃CN-N₂ [9680-118]
9680 0B	Dependence of H₂O-N₂ broadening coefficients on the vibrational quantum numbers [9680-134]
9680 0C	H₂O self-broadening coefficients of rotation-vibration lines in the 15 500 – 16 000 cm⁻¹ region [9680-135]
9680 0D	Investigation of interaction of carbon dioxide with aerogel's nanopores [9680-138]
9680 0E	He-broadening and shift coefficients of water vapor lines in infrared spectral region [9680-139]
9680 0F	Investigation of porous structure of SiO₂/Al₂O₃ aerogel by the method of low-temperature adsorption of nitrogen and high-resolution spectroscopy [9680-141]

- 9680 OG **Light-emitting-diode Fourier-transform spectroscopy of HD¹⁶O between 11200 and 12400 cm⁻¹** [9680-146]
- 9680 OH **To the selection of heat flux parameterization models at the water-air interface for the study of the spring thermal bar in a deep lake** [9680-168]
- 9680 OI **Verification of H₂O lines from the HITRAN database for remote sensing of the water vapour isotopic composition** [9680-175]
- 9680 OJ **Architecture of scalability file system for meteorological observation data storing** [9680-190]
- 9680 OK **Simulation of the atmospheric transfer of the solar radiation in water vapor absorption bands** [9680-220]
- 9680 OL **Highly excited vibrational states of ¹⁸O₃ as a test of the ozone potential energy surface** [9680-266]
- 9680 OM **Simulation of the LMR spectra in the 0–1 band of NO molecule** [9680-268]
- 9680 ON **Development of an Internet accessible software: optics and spectroscopy of gas-aerosol media** [9680-280]
- 9680 OO **Study (301) – (000) D₂O band in 10200 – 10450 cm⁻¹ spectral region** [9680-285]

SESSION 2 OPTICAL RADIATION PROPAGATION IN THE ATMOSPHERE AND OCEAN

- 9680 OP **Orbital angular momentum of laser beam in the turbulent medium: asymptotic estimates and numerical simulation (Invited Paper)** [9680-156]
- 9680 OQ **Approximations of the synoptic spectra of atmospheric turbulence by sums of spectra of coherent structures** [9680-8]
- 9680 OR **Turbulence structure over inhomogeneous heated surface** [9680-13]
- 9680 OS **About temporary autocorrelation function of fluctuations of the scattered radiation of the focused laser beam (0.63 mm) in the surface atmosphere in rain, drizzle and fog** [9680-21]
- 9680 OT **Photosynthetically available radiation on surface of the Black Sea based on ocean color data** [9680-22]
- 9680 OU **Phase reconstruction strategies in phase-locking system based on multi-aperture wave front sensors** [9680-34]
- 9680 OV **Influence of the spatial shape of nonspherical symmetric dielectric microparticles on morphology of photonic jets** [9680-39]
- 9680 OW **Modeling of microphysical characteristics for fractal-like soot aggregates: the effective heat conductivity** [9680-41]

9680 0X	Characteristics of photonic nanojets from dielectric microparticles of various spatial shapes [9680-45]
9680 0Y	Image processing of cloud fields based on satellite data [9680-49]
9680 0Z	Micropulse lidar for detection of backscatter amplification in the turbulent atmosphere [9680-52]
9680 10	Lidar measurements of backscatter amplification in a surface atmosphere [9680-53]
9680 11	Estimate of effect of initial field distribution using streamlines of the average Poynting vector on the change of the effective spot size of the laser beam propagating in the turbulent atmosphere [9680-63]
9680 12	Numerical investigation of energy density fluctuation of pulsed Laguerre-Gaussian beams [9680-64]
9680 13	Features of formation of sea surface slicks video images [9680-65]
9680 14	Cloud elements detection on the panoramic images of the sky [9680-69]
9680 15	Multiple filamentation Ti:Sapphire-laser pulses in water [9680-70]
9680 16	An estimation of the LF-MF high latitude communication radio lines range on surface electromagnetic waves [9680-72]
9680 17	Space-time transformation sky brightness at a horizontal position of the sun [9680-81]
9680 18	Coherence of sonic waves at short near-surface paths [9680-83]
9680 19	Computer simulation of scalar vortex beams LG_{0L} in time-varying random inhomogeneous media [9680-91]
9680 1A	Multiple filamentation of laser pulses in the glass [9680-93]
9680 1B	Multiple filamentation of laser beams with different diameters in the air at a 100-meter path [9680-102]
9680 1C	Experimental setup for investigation of narrow IR laser beam propagation along horizontal 1300m urban path [9680-107]
9680 1D	Correction for atmospheric distortion of multichannel laser radiation with the use of phase-conjugation algorithm [9680-108]
9680 1E	Diurnal and annual variation of time delay of pulse signal at long distance [9680-116]
9680 1F	Modeling of multiple filamentation of terawatt laser pulses on a hundred-meter air path [9680-120]
9680 1G	Automatic complex for modeling and forecasting atmospheric processes [9680-124]

- 9680 1H **Influence of regular refraction on the statistical properties of the fluctuations of the amplitude level of wave in random-inhomogeneous medium** [9680-129]
- 9680 1I **Urban heat island influence on refraction index fluctuations from the data of spatially separated GPS-GLONASS receivers** [9680-132]
- 9680 1J **Analysis of correlation properties of Shack-Hartmann sensor measurements depending on the characteristics of the intensity distribution in the laser beam** [9680-133]
- 9680 1K **Coherence of the vortex Bessel beam reflected from the rough surface** [9680-140]
- 9680 1L **Parameters of the ring dislocation of a degree of coherence of the vortex Bessel beam in turbulent atmosphere** [9680-142]
- 9680 1M **Random displacement of the fundamental Bessel beam in turbulent atmosphere** [9680-143]
- 9680 1N **Photon mean free path in the metal nanoparticle system** [9680-149]
- 9680 1O **Investigations of parameters of image quality for adaptive optical systems of BSVT** [9680-151]
- 9680 1P **On the efficiency of algorithms of Monte Carlo methods** [9680-153]
- 9680 1Q **Estimation of the error of the algorithm for reconstructing the reflection coefficient of the Earth surface on the example of images with the low atmospheric turbidity** [9680-157]
- 9680 1R **The modeling of frequency Doppler shift in multibeam weakly non-stationary radio channels** [9680-186]
- 9680 1S **Influence of vortex phase on random wandering of the modified Bessel-Gaussian laser beam propagating in the atmosphere with weak turbulence** [9680-187]
- 9680 1T **Estimation of the path-averaged wind velocity by cross-correlation of the received power and the shift of laser beam centroid** [9680-188]
- 9680 1U **The correlation of the displacements of the images of point sources in the turbulent atmosphere** [9680-194]
- 9680 1V **Estimation of the influence of cloudiness on the Earth observation from space through a gap in a cloudy field** [9680-199]
- 9680 1W **Adaptive correction of turbulent distortions by MEMS flexible mirror** [9680-203]
- 9680 1X **Filamentation of focused and collimated laser beams in liquids** [9680-216]
- 9680 1Y **Absorption of laser radiation by femtosecond laser-induced plasma of air and its emission characteristics** [9680-217]
- 9680 1Z **Dynamical anisotropy of the optical propagation paths** [9680-221]
- 9680 20 **Influence of the outer scales of temperature and dynamic turbulence on the characteristics of transmitted acoustic radiation** [9680-222]

- 9680 21 **The dispersion of surface plasmon-polaritons in the metal-nanocomposite system** [9680-224]
- 9680 22 **Testing forward model against OCO-2 and TANSO-FTS/GOSAT observed spectra in near infrared range** [9680-225]
- 9680 23 **Neural network technologies for image classification** [9680-239]
- 9680 24 **On atmospheric turbulence structure constant measurement by a passive optical method** [9680-240]
- 9680 25 **A computer-based simulator of the atmospheric turbulence** [9680-241]
- 9680 26 **Phase functions, glories, fogbows and coronas for clouds with mirror-transformed gamma- and bimodal-distributions** [9680-249]
- 9680 27 **Threshold characteristics cavityless lasing in composites with agglomerated metal and dielectric nanoparticles** [9680-250]
- 9680 28 **Atmospheric channel for bistatic optical communication: simulation algorithms** [9680-251]
- 9680 29 **Spectral shaping of lasing active medium with agglomerated nanoparticles of metals and dielectrics** [9680-258]
- 9680 2A **Clustering of filament in air** [9680-260]
- 9680 2B **Spectral image fusion based on multi-scale wavelet analysis** [9680-265]
- 9680 2C **Statistical numerical simulation of polarized terahertz radiation propagation in a cloud layer** [9680-267]
- 9680 2D **Characterization of vortex beams synthesized on the basis of a fiber laser array** [9680-289]
- 9680 2E **Filtration of optical image distortions for retrieving the drift velocity of atmospheric turbulence inhomogeneities** [9680-290]
- 9680 2F **Numerical research of measurements of Shack-Hartmann wavefront sensor according to the parameters of its optical parts and the intensity of turbulent distortions** [9680-148]

SESSION 3 OPTICAL INVESTIGATION OF ATMOSPHERE AND OCEAN

- 9680 2G **To the technique of determination of phase matrices of high-level clouds with a polarization lidar (Invited Paper)** [9680-247]
- 9680 2H **Retrieval of the aerosol microstructure parameters from sun photometer data measured in a limited spectral range (Invited Paper)** [9680-227]
- 9680 2I **Algorithm of retrieval of aerosol microstructure from sun photometry data based on a hybrid model (Invited Paper)** [9680-262]

- 9680 2J **Application of thermography in experimental studies of plasma jets (Invited Paper)**
[9680-95]
- 9680 2K **Estimation of the turbulence scale in flame using the method of IR diagnostics**
(Invited Paper) [9680-96]
- 9680 2L **Measuring the characteristics of stratospheric aerosol layer and total ozone concentration**
at Siberian Lidar Station in Tomsk [9680-5]
- 9680 2M **Comparison of the physical optics code with the GOIE method and the direct solution of**
Maxwell equations obtained by FDTD [9680-6]
- 9680 2N **Granulometry of atmospheric suspension of Norsk State Reserve**
(Amur Region, Russian Federation) [9680-14]
- 9680 2O **Granulometry of atmospheric suspension of Zeysky State Reserve**
(Amur region, Russian Federation) [9680-15]
- 9680 2P **Temporal dynamics of optical-microphysical characteristics of atmospheric aerosol at the**
Spitsbergen Archipelago in 2011–2014 [9680-16]
- 9680 2Q **Development of photodetectors for recording lidar signals in the photon counting and**
analog modes [9680-23]
- 9680 2R **Testing the algorithms for taking into account relative humidity of air in the model of optical**
characteristics of absorbing aerosol [9680-24]
- 9680 2S **Summary of long-term data on latitudinal dependence of the near-water aerosol**
microphysical characteristics in eastern Atlantic [9680-25]
- 9680 2T **Spatial variability of aerosol and black carbon concentrations in the troposphere of the**
Russian Arctic [9680-26]
- 9680 2U **Polarization lidars with conical scanning for retrieving the microphysical characteristics of**
cirrus clouds [9680-28]
- 9680 2V **Interference phenomena at backscattering by ice crystals of irregular shape** [9680-29]
- 9680 2W **Spatial distribution of atmospheric aerosol optical depth over Atlantic Ocean along the**
route of Russian Antarctic expeditions [9680-30]
- 9680 2X **Coherent and incoherent additions of light beams at solutions of the light scattering**
problem by use the beam tracing method within the framework of physical optics
[9680-33]
- 9680 2Y **Assessment of changes in the qualitative composition and properties of dissolved organic**
matter on hydro-optical characteristics when fractional filtration of natural water [9680-35]
- 9680 2Z **Determination of concentration and size distribution of black carbon in submicron aerosol**
from data of nephelometric measurements of angular scattering coefficients [9680-36]

- 9680 30 **Variability of condensation properties of mixed smoke at different stages of its long evolution** [9680-37]
- 9680 31 **Dynamics of optical-microphysical properties of atmospheric haze at stepwise change of air humidity** [9680-38]
- 9680 32 **Results of SPM sun photometer measurements at Mirny Antarctic station (58–60th RAE)** [9680-40]
- 9680 33 **Finely and coarsely dispersed components of atmospheric aerosol optical depth in the region of Tomsk: interannual and seasonal variations** [9680-42]
- 9680 34 **Long path DOAS measurements of atmospheric pollutants concentration** [9680-43]
- 9680 35 **Comparison of the effectiveness of optic atmosphere investigation tasks distribution techniques in local network** [9680-44]
- 9680 36 **Lidar sensing of clouds from under the water** [9680-46]
- 9680 37 **Estimation of aircraft wake vortex parameters from data measured by a Stream Line lidar** [9680-54]
- 9680 38 **Specifics of the hail parameter measurements using the optical precipitation gauge** [9680-56]
- 9680 39 **Lidar investigation of the atmospheric boundary layer dynamics in the coastal zone of Lake Baikal** [9680-57]
- 9680 3A **Optical characteristics of aerosol trioxide dialuminum at the IR wavelength range** [9680-61]
- 9680 3B **Atmospheric correction of satellite data** [9680-67]
- 9680 3C **Raman gas analyzer applicability to monitoring of gaseous air pollution** [9680-74]
- 9680 3D **Portable mercury gas analyzer with a lamp filled with natural mercury isotope mixture** [9680-77]
- 9680 3E **Remote detection of gas markers of artificial explosives** [9680-80]
- 9680 3F **Cr²⁺:ZnSe laser for mid-IR remote sensing of atmospheric gases** [9680-84]
- 9680 3G **Measurement of ozone concentration in the lower stratosphere and upper troposphere** [9680-85]
- 9680 3H **Justification of choice of the spectral range for the study of combustion processes with the use of thermography in the middle IR range** [9680-94]
- 9680 3I **Laboratory investigation of fire exposure on wood by thermal imagery and thermocouple approach** [9680-97]
- 9680 3J **Remote detection of traces of high energetic materials** [9680-101]

- 9680 3K **Mathematical model of a two-stage process of laser fragmentation of nitrocompound molecules and subsequent laser-induced fluorescence of characteristic fragments** [9680-111]
- 9680 3L **The formation of the sky brightness with horizon position of the sun** [9680-113]

Part Two

- 9680 3M **Comparison of one-parameter and two-parameter models of aerosol extinction for experimental data of the arid zone of Kazakhstan** [9680-121]
- 9680 3N **Generation and parametric amplification of femtosecond radiation up to terawatt power in the mid-infrared** [9680-123]
- 9680 3O **Enhancement of the Raman lidar sensitivity using overtones of vibrational-rotational Raman bands of oxygen or nitrogen as the reference signals** [9680-127]
- 9680 3P **Simulation of firebrands transport generated by the seat of fire** [9680-128]
- 9680 3Q **Gas-analytic measurement complexes of Baikal atmospheric-limnological observatory** [9680-130]
- 9680 3R **Crosswind and turbulence estimations from analysis of the images of light sources and topographical objects** [9680-136]
- 9680 3S **Quantitative comparison of the absorption spectra of the gas mixtures in analogy to the criterion of Pearson** [9680-152]
- 9680 3T **Mapping of the concentration of carbonaceous gases and fluorescent characteristics in the surface water of Southern Baikal** [9680-158]
- 9680 3U **Calculation of lidar echo signals during N₂O and NO₂ sounding along tropospheric paths in the 3-4 μ m range** [9680-162]
- 9680 3V **OPO-laser system for atmospheric sounding in the mid-IR range** [9680-164]
- 9680 3W **Informative wavelengths for trace atmospheric gas sounding with an opo-lidar in the 3-4 μ m spectral region** [9680-165]
- 9680 3X **Solving the inverse problem and estimation of H₂O sensing possibility on short paths using a femtosecond laser source** [9680-167]
- 9680 3Y **Estimation of the ozone formation rate in the atmospheric boundary layer over a background region of Western Siberia** [9680-169]
- 9680 3Z **Joint observations of the dynamics of atmospheric aerosol by means of aerosol and Doppler lidars on the coast of Lake Baikal** [9680-170]
- 9680 40 **Boundary layer of the troposphere of Western Siberia from the data of lidar measurements in Tomsk** [9680-171]

- 9680 41 **Experimental study of the interaction of THz radiation FEL with the atmosphere and water droplet aerosol** [9680-172]
- 9680 42 **Thermal lens response in the two-component liquid layer** [9680-181]
- 9680 43 **Investigation of features of processes Raman and fluorescence sea water depending on the time characteristics of the excitation radiation** [9680-182]
- 9680 44 **Statistical approach to the analysis of the composition of multicomponent gas mixtures using absorption laser spectroscopy** [9680-189]
- 9680 45 **Concentration of nutrients in the water of Southern Baikal in summer** [9680-193]
- 9680 46 **Relative contributions of regional, urban, and local sources of atmospheric aerosol pollution in regions with different levels of anthropogenic load** [9680-195]
- 9680 47 **Behavior of trends of total ozone content according to data of ground-based (Tomsk: 56.48°N, 85.05°E) and satellite measurements** [9680-197]
- 9680 48 **Investigation of the spectra of luminescence and Raman scattering in water and chlorophyll "a" excited by femtosecond laser pulses** [9680-202]
- 9680 49 **Comparison of classification methods used for analysis of complex biological gas mixtures by means of laser spectroscopy** [9680-206]
- 9680 4A **Influence of laser pulse energy on emission lines intensity in the femtosecond laser-induced breakdown spectroscopy of iron in aqua solution** [9680-207]
- 9680 4B **Inter-annual and seasonal variability of the diurnal behavior of aureole scattering phase function at the aerosol monitoring station of LOA IAO SB RAS in 2010-2014** [9680-208]
- 9680 4C **Analysis of the component composition of exhaled air using laser spectroscopy and canonical correlation analysis** [9680-214]
- 9680 4D **Detection of aerosol plumes from associated gas flaring by laser sensing** [9680-218]
- 9680 4E **Spatiotemporal dynamics of the wind velocity variance from the data of acoustic sounding of the atmospheric boundary layer** [9680-219]
- 9680 4F **Collision broadening effect upon tropospheric temperature calibration functions for pure rotational Raman lidars** [9680-226]
- 9680 4G **Software for processing of experimental data on polarization laser sensing of high-level clouds** [9680-230]
- 9680 4H **Using satellite radiometric and ground based lidar measurements for detection of cirrus clouds, containing ensembles of preferred oriented ice particles** [9680-231]
- 9680 4I **Space-borne remote sensing of CO₂ by IPDA lidar with heterodyne detection: random error estimation** [9680-232]

- 9680 4J **The chemical and disperse composition of atmospheric aerosol in different layers of the troposphere background area of south of Western Siberia and its seasonal features on result of airborne sounding by Tupolev-134 “Optik”** [9680-233]
- 9680 4K **Sensing of low-contrast inhomogeneities in above-water atmosphere** [9680-235]
- 9680 4L **Structure of lidar return from cloud layer taking into account the double scattering** [9680-236]
- 9680 4M **Influence of droplet cloud water content on the polarization characteristics of the double scattering lidar signal** [9680-238]
- 9680 4N **Method of estimation of cloud base height using ground-based digital stereophotography** [9680-243]
- 9680 4O **On determination of formaldehyde content in atmospheric boundary layer for overcast using DOAS technique** [9680-244]
- 9680 4P **Experimental research of fluorescence spectra of watercress stressed by lack or excess of watering** [9680-245]
- 9680 4Q **Measurements of formaldehyde total content in troposphere using DOAS technique in Moscow Region** [9680-246]
- 9680 4R **Mobile hyper spectral optical complex for under satellite ocean research** [9680-254]
- 9680 4S **Expedition automated flow fluorometer** [9680-255]
- 9680 4T **Element composition of insoluble fraction of aerosols in snow in the vicinity of oil chemistry refinery (Pavlodar City, Kazakhstan) and petrochemical plant (Tomsk City, Russia)** [9680-259]
- 9680 4U **Optical properties of natural phenols in aqueous media** [9680-264]
- 9680 4V **Calibration and verification portable ceilometer** [9680-269]
- 9680 4W **Comparison of different approaches to separate analysis of phytoplankton and CDOM contributions to ocean color forming** [9680-270]
- 9680 4X **Dust pollution of the atmosphere in the vicinity of coal-fired power plant (Omsk City, Russia)** [9680-271]
- 9680 4Y **Multi-wavelength metal vapor laser systems for solving applied problems of atmospheric spectroscopy** [9680-272]
- 9680 4Z **Investigation of the lasing characteristics of a barium vapor laser with pulse repetition frequencies up to 320 kHz for navigation** [9680-273]
- 9680 50 **Detection of crude oil emulsions in the Bering Sea by the analysis of seawater color** [9680-274]
- 9680 51 **Calibration compact meteorological visibility sensor** [9680-275]

- 9680 52 **Optimization parameters of ceilometer** [9680-276]
- 9680 53 **On the effect of cloud microstructure on the polarization characteristics of double scattering lidar return** [9680-279]
- 9680 54 **Numerical simulation of infrared radiation absorption for diagnostics of gas-aerosol medium by remote sensing data** [9680-283]
- 9680 55 **Lidar measurements of upper and middle atmospheric temperatures based on new configuration of multifunctional lidar of altitude sounding** [9680-288]
- 9680 56 **The special features of tree ring gas chronologies** [9680-2]

SESSION 4 ATMOSPHERIC PHYSICS AND CLIMATE

- 9680 57 **Main physical processes and mechanisms responsible for the observable climate changes in the 20-21st centuries (Invited Paper)** [9680-185]
- 9680 58 **Numerical model of the urban heat island in a calm and stably stratified environment (Invited Paper)** [9680-4]
- 9680 59 **Spatial distribution of total column ozone and total column water vapor over European Russia during the spring and summer atmospheric blocks in 2010** [9680-1]
- 9680 5A **Advanced radiometric complex for detection of radioactive release from Siberian chemical combine** [9680-3]
- 9680 5B **Relation of tropical cyclone structure with thundersorm activity** [9680-9]
- 9680 5C **Statistical structure of low stratiform clouds over the Siberian region** [9680-10]
- 9680 5D **Long-term changes of low stratiform clouds over the Siberian region** [9680-11]
- 9680 5E **The near real-time diagnostics of ionosphere parameters at the middle point of the radio path on the base of oblique sounding data** [9680-17]
- 9680 5F **The modeling of HF radio wave propagation characteristics during the periods of solar flares** [9680-18]
- 9680 5G **The effects of space weather for HF propagation in the period of solar flare on 25 February 2014** [9680-19]
- 9680 5H **The disturbances of ionospheric radio channel during magnetic storm on March 17-19, 2015** [9680-20]
- 9680 5I **VLF station signals and radio noise intensity variations depending on solar activity registrated in Yakutsk during 2009-2014** [9680-27]
- 9680 5J **Variations of the amplitude of lighting electromagnetic signals passing over epicenters of deep-focus earthquakes** [9680-31]

- 9680 5K **Numerical simulation of vertical and oblique ionospheric sounding** [9680-32]
- 9680 5L **Mathematical modeling for the forest fuel layer ignition caused by focused solar radiation flux** [9680-47]
- 9680 5M **Dynamic effects of steep orography on cold front propagation in a stratified atmosphere** [9680-48]
- 9680 5N **Height of layer of intense turbulent heat exchange under conditions of stable atmospheric stratification** [9680-51]
- 9680 5O **The influence of natural magnetic field inhomogeneity areas of active geological faults on the dynamics of functional state of human brain** [9680-55]
- 9680 5P **The effect of variations of geomagnetic activity changing rate on trunk objects** [9680-58]
- 9680 5Q **Predictive map of geoelectric sections of North China and its application for the radiofields calculations** [9680-59]
- 9680 5R **Using rank distributions in the study of perennial changes for monthly average temperatures** [9680-62]
- 9680 5S **Spatial distribution of lightning strikes over North Asia** [9680-66]
- 9680 5T **Wind-stress effect on the relationships between sea surface temperature and geomagnetic activity** [9680-68]
- 9680 5U **Method for automatic absolute calibration of sodar measurement channels** [9680-73]
- 9680 5V **Search and tracking method of cloud fields on image** [9680-89]
- 9680 5W **Remote sensing of seismic disturbances in the lower ionosphere according to observations of lightning electromagnetic signals in Yakutsk** [9680-90]
- 9680 5X **The correlation of the maximum intensity of fluorescence with pigment characteristics of leaves of *Betula pendula*** [9680-92]
- 9680 5Y **Simulation of impact assessment of crown forest fires on boundary layer of atmosphere using software PHOENICS** [9680-98]
- 9680 5Z **Pilot project of measuring and computing system for mesoscale monitoring of atmospheric boundary layer** [9680-99]
- 9680 60 **Profiles of the structure characteristic of temperature in the atmospheric surface layer** [9680-100]
- 9680 61 **Precipitation water stable isotope measurements and analyses in Middle and Polar Ural** [9680-104]
- 9680 62 **Large eddy simulation of turbulent flow and of pollutant transport in a street canyon** [9680-105]

- 9680 63 **Using weather prediction data for simulation of mesoscale atmospheric processes** [9680-106]
- 9680 64 **Investigation of snow cover dust pollution by contact and satellite observations** [9680-109]
- 9680 65 **Structure of extreme precipitation field in Western Siberia** [9680-110]
- 9680 66 **Measurements of methane and carbon dioxide fluxes on the Bakchar bog in warm season** [9680-137]
- 9680 67 **Fluorescence parameters of leaves of trees and shrubs during period of adverse weather conditions in Krasnoyarsk** [9680-144]
- 9680 68 **Use of satellite information for analysis of aerosol substance propagation** [9680-145]
- 9680 69 **Using WRF mesoscale model to restore temperature profile in atmosphere boundary layer in Tomsk** [9680-147]
- 9680 6A **Coherence of heart rate variability and local physical fields in monitoring studies** [9680-150]
- 9680 6B **Climate modeling for Yamal territory using supercomputer atmospheric circulation model ECHAM5-wiso** [9680-154]
- 9680 6C **The research of the soil moisture satellite measurements accuracy depending on the underlying surface characteristics** [9680-155]
- 9680 6D **Variations in vertical temperature profile of extratropical cyclones under different environmental conditions** [9680-159]
- 9680 6E **Variability of the atmospheric turbulence in the region lake of Baykal** [9680-160]
- 9680 6F **Methodology of monitoring the temperature and wind stratification in the atmospheric boundary layer based on multilevel ultrasonic measurements** [9680-173]
- 9680 6G **Possible electron precipitation effects in the night time mid-latitude atmosphere** [9680-174]
- 9680 6H **Polarization characteristics of the Schumann resonance modes in Tomsk** [9680-176]
- 9680 6I **Variations of the electric field of the monitoring data in the city of Tomsk** [9680-177]
- 9680 6J **Statistical assessment of characteristics of acoustic signals from land explosions** [9680-178]
- 9680 6K **Calculation of the Siberian subarctic rivers runoff in the XXI century** [9680-179]
- 9680 6L **Study of atmospheric surface layer electrical processes in case of varying intensity rain** [9680-180]
- 9680 6M **Results of magnetic measurements of ELF fields in Tomsk for the period 2013-2014** [9680-184]

- 9680 6N **Lidar observations and transfer of stratospheric aerosol over Tomsk in summer period**
[9680-192]
- 9680 6O **Climate changes in the Southern Hemisphere subtropical jet stream during the second half of the XX century and the beginning of the XXI century** [9680-196]
- 9680 6P **Comparative analysis of the dynamics of biogenic elements and direction of carbon dioxide fluxes between the atmosphere and the water surface in Lake Baikal and in bays of the Sea of Japan** [9680-198]
- 9680 6Q **Remote sensing of potential aircraft icing areas** [9680-200]
- 9680 6R **Results of temperature measurements in the upper troposphere and the middle atmosphere by means of a lidar using the channels of Rayleigh and Raman scattering**
[9680-201]
- 9680 6S **Modernization of the Small Lidar Station of IAO SB RAS** [9680-204]
- 9680 6T **Forecast of extreme weather conditions that promote aircraft icing during take-off or landing** [9680-205]
- 9680 6U **Studying the variations in background aerosol loading of the stratosphere in 2014**
[9680-209]
- 9680 6V **Filtration and assimilation of soil moisture satellite data** [9680-252]
- 9680 6W **Development of a software for control of the lidar complex at the IAO SB RAS small lidar station** [9680-211]
- 9680 6X **Influence of atmospheric turbulence scales** [9680-212]
- 9680 6Y **Lidar studies of specific manifestation features of stratospheric warming in winter of 2014-2015** [9680-213]
- 9680 6Z **Analysis of observations and results of numerical modeling of meteorological parameters and atmospheric air pollution under weak wind conditions in the city of Tomsk** [9680-228]
- 9680 70 **A method for direct variational data assimilation from various observing systems**
[9680-234]
- 9680 71 **Levenberg-Marquardt method with simultaneous calculations of averaging kernels and errors for methane retrieval from IASI spectra** [9680-248]
- 9680 72 **Health risk assessment of urban population exposure to contaminants in the soils of the Southern Kuzbass** [9680-253]
- 9680 73 **Resonance scattering at excited atoms and ions of the upper atmosphere as a possible mechanism for ionosphere investigations** [9680-256]
- 9680 74 **The study of turbulence and optical instability in stably stratified Earth atmosphere**
[9680-277]

- 9680 75 **Modeling of hydrodynamics of water-methane heterogeneous system** [9680-278]
- 9680 76 **Direct variational data assimilation algorithm for atmospheric chemistry data with transport and transformation model** [9680-282]
- 9680 77 **The long-term variations of critical frequency in the F2 region of ionosphere and solar activity** [9680-286]
- 9680 78 **Mathematical modeling of the receiving antennas of Ionosonde "TOMION"** [9680-287]
- 9680 79 **History of Tomsk Ionospheric Station development** [9680-291]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

In accordance with the schedule of meeting and conferences approved by the Presidium of the Siberian Branch of the Russian Academy of Sciences (SB RAS) for 2015, the V.E. Zuev Institute of Atmospheric Optics SB RAS and Institute of Solar-Terrestrial Physics SB RAS organized the Twenty-first International Symposium titled "Atmospheric and Ocean Optics: Atmospheric Physics" in Tomsk, Russian Federation, 22–26 June 2015.

We wish to thank our sponsors for their contribution to the success of the symposium: Siberian Branch of the Russian Academy of Sciences and the Russian Foundation for Basic Research.

English and Russian were the working languages of the symposium. All poster presentations were in English and oral presentations were made in English and Russian (using synchronous translation via personal audio-equipment).

We conducted four conferences titled:

1. Molecular Spectroscopy and Atmospheric Radiative Processes
2. Optical Radiation Propagation in the Atmosphere and Ocean
3. Optical Investigation of Atmosphere and Ocean
4. Atmospheric Physics and Climate

The main topics of the Twenty-first International Symposium on Atmospheric and Ocean Optics/Atmospheric Physics included:

- Molecular spectroscopy of atmospheric gases
- Absorption of radiation in atmosphere and ocean
- Radiative regime and climate problems
- Models and databases for atmospheric optics and physics
- Wave propagation in random inhomogeneous media
- Adaptive optics
- Nonlinear effects at radiation propagation in atmosphere
- Multiple scattering in optical remote sensing
- Image transfer and processing
- Optical and microphysical properties of atmospheric aerosol and suspension in water media
- Transport and transformation of aerosol and gas components in the atmosphere
- Laser and acoustic sounding of atmosphere and ocean
- Diagnostics of state and functioning of plants bio systems
- Structure and dynamics of the lower and middle atmosphere
- Dynamics of the atmosphere and climate of the Asian region
- Physical processes and phenomena in the atmosphere
- Optic techniques for probing the atmosphere

History: A symposium on Atmospheric and Ocean Optics has been held annually since 1994 by the Institute of Atmospheric Optics SB RAS. From 1971 to 2014 the IAO SB RAS organized more than 60 conferences on different scientific topics. Current symposium is the only one in Russia where fundamental problems of propagation in inhomogeneous media and the scattering and absorption radiation are considered. Very few conferences in the world have such a spectrum of interest. It is very attractive for participants from former 16 countries that the official languages of symposium are Russian and English.

In the field listed here, the Siberian scientific schools are leaders in our country and well known in the world. This fact can be attributed to the interest in symposium from the scientists of Russian Federation and other countries of the former.

Present: The Twenty-first International Symposium "Atmospheric and Ocean Optics: Atmospheric Physics" was successfully held in Tomsk, Russian Federation, 22–26 June 2015.

The program of the symposium included 12 invited and plenary papers, 193 oral presentations, and more than 180 poster presentations during four poster sessions.

Gennadii G. Matvienko
