Volume 9795

Proceedings of SPIE 0277-786X, V. 9795

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Selected Papers of the Photoelectronic Technology Committee Conferences held June–July 2015, edited by
Shenggang Liu, Songlin Zhuang, Daren Lv, Lijun Wang, Guangjun Zhang, Michael I. Petelin, Libin Xiang,
Proc. of SPIE Vol. 9795, 97953N • © 2015 SPIE • CCC code: 0277-786X/15/\$18 • doi: 10.1117/12.2228275

Proc. of SPIE Vol. 9795 97953N-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

FRONTIERS IN OPTICAL IMAGING TECHNOLOGY AND APPLICATION

9795 01	Study on the technology of mutual alignment based on the four-quadrant photoelectric detector [9795-1]
9795 02	Pupil-resizing Fourier ptychography [9795-2]
9795 03	A calibration algorithm for the voltage-phase characteristic of a liquid crystal optical phased array [9795-3]
9795 04	Athermalization design of collimating lens system for space solar telescope [9795-5]
9795 05	Calibration method of focal plane for static multi-star simulator [9795-6]
9795 06	Numerical simulations on polarized photon scattering for classification of air pollutants [9795-8]
9795 07	A light properties quantification algorithm based on illumination and singular points [9795-9]
9795 08	Large aperture diffractive telescope design for space-based lidar receivers [9795-10]
9795 09	Infrared polarization image texture extraction via variational decomposition algorithm [9795-12]
9795 0A	The algorithm of image fusion for infrared polarization based on Contourlet transform and Teager operator [9795-13]
9795 0B	Feedback circuit design of an auto-gating power supply for low-light-level image intensifier [9795-15]
9795 0C	A portable swappable method scientific CMOS image data storage system [9795-16]
9795 0D	Vehicle-mounted real-time digital voice communication system based on visible light communication [9795-17]
9795 0E	Airborne laser communication technology and flight test [9795-18]

9795 0F	The index analysis and structure selection of LEO space laser communication terminal [9795-19]
9795 0G	Airborne space laser communication system and experiments [9795-20]
9795 0H	Imaging simulation and analysis for spot targets in space based optical sensors [9795-21]
9795 0I	Inter-satellite laser link simulation analysis [9795-27]
9795 0J	Ultraviolet irradiance calibration system based on standard detector [9795-28]
9795 0K	Study of the laser induced acoustic under water source aiming at imaging and detecting [9795-29]
9795 0L	Integrated condition monitoring of space information network [9795-30]
9795 0M	3D reconstruction of rotational video microscope based on patches [9795-31]
9795 0N	Research on the timing sequence control in large laser facility [9795-35]
9795 0O	Investigation of W-band dielectric constant of coals by free space method [9795-38]
9795 0P	Improved high order grating method to realize wide angle beam steering on Liquid Crystal Optical Phased Array [9795-55]
9795 0Q	Study of carrier lifetime of silicon by OPTP method [9795-57]
9795 0R	An integrated membrane sub-harmonic Schottky diode mixer at 340GHz [9795-61]
9795 0S	Compressive optical remote sensing via fractal classification [9795-65]
9795 0T	Research on the breakdown mechanism of photoconductive antenna [9795-66]
9795 0U	A terahertz confocal microscope for far-field thermal radiation detection and near-field sub-wavelength imaging [9795-72]
9795 0V	Accurate correction of eccentricity errors during microsphere interferometry [9795-74]
9795 0W	Optical tomography in the application of the surface feature extraction [9795-85]
9795 0X	Ultrahigh precise and sensitive measurement of optical rotation based on photo-elastic modulation [9795-86]
9795 0Y	A discussion of the effect of Spectral Band Width (SBW) on optical glass filter indication [9795-87]
9795 0Z	Optical tweezers and surface plasmon resonance combination system based on the high numerical aperture lens [9795-89]
9795 10	Improving transverse resolution of confocal microscopy through spatiotemporal modulation [9795-90]

- 9795 11 **T-SDN architecture for space and ground integrated optical transport network** [9795-93]
- 9795 12 **Calibration for single multi-mode fiber digital scanning microscopy imaging system**
[9795-94]
- 9795 13 **Multimode nondestructive detecting method for high-speed rail defects** [9795-103]
- 9795 14 **Control and measuring system of a two-dimensional scanning nanopositioning stage
based on LabVIEW** [9795-104]
- 9795 15 **The application of UV multispectral technology in extract trace evidence** [9795-105]
- 9795 16 **Nondestructive inspection for internal defects of rail based on photoacoustic elastography**
[9795-106]
- 9795 17 **Rayleigh-backscattering Doppler broadening correction for differential absorption lidar**
[9795-107]
- 9795 18 **A multi-scale registration of urban aerial image with airborne lidar data** [9795-108]
- 9795 19 **The method of cloud statistics measured with digital holographic imaging system**
[9795-109]
- 9795 1A **Primary mirror back surface shape research of GEO laser communication system**
[9795-110]
- 9795 1B **Can wavefront coding infrared imaging system achieve decoded images approximating
to in-focus infrared images?** [9795-115]
- 9795 1C **Compact spectrometer based on concave grating** [9795-123]
- 9795 1D **Calibration of Imaging Luminance Measuring Devices (ILMD)** [9795-124]
- 9795 1E **Evaluating the uncertainty of the fiber spectroradiometer** [9795-125]
- 9795 1F **Spectral-based inferential measurement of grey-body's temperature** [9795-126]
- 9795 1G **Optical tomographic scanning target-tracking system based on single pixel sensor**
[9795-128]
- 9795 1H **Research on motion model for the hypersonic boost-glide aircraft** [9795-129]
- 9795 1I **A new classification algorithm based on multi-kernel Support Vector Machine on infrared
cloud background image** [9795-130]
- 9795 1J **Parameter estimation of single cloud particle based on in-line digital holography**
[9795-131]
- 9795 1K **Intrinsic fluorescence spectra characteristics of vitamin B1, B2, and B6** [9795-132]
- 9795 1L **Research of laser echo signal simulator** [9795-133]

9795 1M	Optimal design of resonant enhanced quantum dot infrared photodetector based on metal-insulator-metal microcavity [9795-134]
9795 1N	The influence of SNR on MTF measurement [9795-135]
9795 1O	Fusion of infrared and visible images based on discrete wavelet transform [9795-136]
9795 1P	A detection method for infrared multi-target in aerospace background [9795-139]
9795 1Q	Improved optical flow motion estimation for digital image stabilization [9795-140]
9795 1R	Design and research of spectropolarimetric system based on Sagnac interferometer [9795-142]
9795 1S	Visible polarization image fusion with non-subsampled Shearlets [9795-145]
9795 1T	Optoelectronic data acquisition system based on FPGA [9795-147]
9795 1U	The extended depth of field microscope imaging system with the phase pupil mask [9795-148]
9795 1V	Study on evaluation of photoelectric jamming effectiveness on ranging lidar [9795-149]
9795 1W	Research on an imaging spectropolarimeter [9795-150]
9795 1X	Resolution characteristics of graded doping and graded composition reflection-mode AlGaAs/GaAs photocathodes [9795-151]
9795 1Y	The phase diversity and the phase retrieval [9795-152]
9795 1Z	Methods of generating a hollow spot for STED microscopy [9795-153]
9795 20	Luminescent sensing of dissolved oxygen based on Ru(II) complex embedded in sol-gel matrix [9795-154]
9795 21	Gas diffusion optic flow calculation and its applications in gas cloud infrared imaging [9795-155]
9795 22	Real-time color imaging system for NIR and visible based on neighborhood statistics lookup table [9795-157]
9795 23	3D profile measurement of micro-structured array with light field microscope [9795-158]
9795 24	Detection of optical properties in small region by diffuse reflectance [9795-160]
9795 26	Study on signal simulator for photon counting laser ranging [9795-162]
9795 27	Spectral radiance characterization and realization based on high temperature blackbody BB3500M [9795-164]
9795 29	Laser bistatic two-dimensional scattering imaging simulation of lambert cone [9795-166]

- 9795 2A **Temperature measurement error simulation of the pure rotational Raman lidar [9795-167]**
- 9795 2B **Multi-terminal remote monitoring and warning system using Micro Air Vehicle for dangerous environment [9795-168]**
- 9795 2C **Optical design of a kind of catadioptric system [9795-169]**
- 9795 2D **Design of off-axis four-mirror optical system without obscuration based on free-form surface [9795-170]**
- 9795 2E **Research on the detection capability of space camera [9795-171]**
- 9795 2F **Design and analysis of APD photoelectric detecting circuit [9795-173]**
- 9795 2G **Recent advances in telecommunication avalanche photodiodes with nano-sized multiplication region [9795-175]**
- 9795 2H **Structure release of silicon micro-channel based on wet etching [9795-176]**
- 9795 2I **Portable detection system of vegetable oils based on laser induced fluorescence [9795-179]**
- 9795 2J **Method of narcissus analysis in infrared system based on ASAP [9795-180]**
- 9795 2K **BOC(n,n) signal multipath mitigation using MEDLL technology [9795-181]**
- 9795 2L **Wavefront aberrations control for complex optical systems by compensation-surface [9795-182]**
- 9795 2M **Energy distribution in the quantum spectrum [9795-183]**
- 9795 2O **The application of ghost imaging in infrared imaging detection technology [9795-185]**
- 9795 2P **Modeling and simulation of blazed grating based on MEMS scanning micro-mirror for NIR micro-spectrometer [9795-187]**
- 9795 2Q **Research progress of airy beams and application prospect [9795-189]**
- 9795 2R **The nonlinear absorption of carbon quantum dots under the picosecond laser pulse [9795-190]**
- 9795 2S **Laser energy distribution on detector under the different incident angle [9795-191]**
- 9795 2T **Analysis on electromagnetic characteristics and military application of non-magnetized discharge plasma [9795-192]**
- 9795 2U **Design of camouflage material for visible and near infrared based on thin film technology [9795-193]**
- 9795 2V **A method for interference elimination of structured light cameras [9795-186]**
- 9795 2W **An evaluation methodology for long-range jammer to CCD [9795-188]**

THZ TECHNOLOGY AND APPLICATION

- 9795 2X Research on the shape error from the Gaussian moth-eye antireflection microstructure elements made by the laser interference lithography technology [9795-23]
- 9795 2Y Topology optimization design of a space mirror [9795-24]
- 9795 2Z A new method of equalizing the optical power by a liquid crystal-based tunable encoder/decoder in SAC-OCDMA PON [9795-25]
- 9795 30 Qualitative identification of group composition in crude oil from different oil fields using terahertz time-domain spectroscopy [9795-36]
- 9795 31 Vertical coupling and polarization-independent subwavelength grating beam splitter based on silicon-on-insulator [9795-37]
- 9795 32 Optical properties of traditional ceramic with different sintering temperatures in terahertz range [9795-40]
- 9795 33 Micro-antennas for the phase and amplitude modulation of terahertz wave [9795-41]
- 9795 34 Non-invasive detection of murals with pulsed terahertz reflected imaging system [9795-42]
- 9795 35 The technology and development trend of special optical fiber applied on the sea [9795-43]
- 9795 37 Pattern conversion prediction about low water content water-oil flow based on terahertz time domain spectroscopy [9795-48]
- 9795 38 Lifetime of photo-excited carriers in GaAs studied with optical-pump terahertz-probe method [9795-50]
- 9795 39 Electrically tunable liquid-crystal Fabry-Perot device for terahertz radiation [9795-52]
- 9795 3A 0.3THz wireless communication systems for space applications [9795-54]
- 9795 3B Influence on the characteristics of THz radiation from the inductance of photoconductive antenna circuit [9795-56]
- 9795 3C Application of threshold estimation for terahertz digital holography image denoising based on stationary wavelet transform [9795-64]
- 9795 3D The meat freshness detection based on terahertz wave [9795-69]
- 9795 3E Blind spectral unmixing in terahertz domain using nonnegative matrix factorization [9795-76]
- 9795 3F The research on the optimum working conditions of photoconductive antenna [9795-78]
- 9795 3G Analysis of high voltage dielectric insulation materials of XLPE by THz-TDS system [9795-88]

- 9795 3H **The design, test, and application of the front end in 0.3THz wireless communication systems**
[9795-95]
- 9795 3I **Classification and identification of amino acids based on THz spectroscopy** [9795-96]
- 9795 3J **Detection of iron corrosion by terahertz time-domain spectroscopy** [9795-100]
- 9795 3K **Polarization-dependent focusing of terahertz surface plasmon polaritons** [9795-102]
- 9795 3L **Terahertz metrology on power, frequency, spectroscopy, and pulse parameters** [9795-113]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Shenggang Liu, University of Electronic Science and Technology of China (China)
Songlin Zhuang, University of Shanghai for Science and Technology (China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Guangjun Zhang, Beihang University (China)
Huilin Jiang, Changchun University of Science and Technology (China)
Jing Ma, Harbin Institute of Technology (China)
Michael Petelin, Institute of Applied Physics of the Russian Academy of Sciences (Russia)
Tony Wilson, University of Oxford (United Kingdom)
De Ben, The 14th Research Institute of China Electronics Technology Group Corporation (China)
You He, Naval Aeronautical Engineering Academy (China)
Jung Han, Yale University (United States)
Libin Xiang, Shanghai Engineering Center for Microsatellites (China)
Weibiao Chen, Shanghai Institute of Optics and Fine Mechanics, CAS (China)

Conference Committee

Guixing Cao, China Academy of Space Technology (China)
Chengwu Chang, Beijing Space Information Relay and Transmission (China)
Zhihong Wang, Science and Technology on Low-light-level Night Vision Laboratory (China)
Yiming Zhu, University of Shanghai for Science and Technology (China)
Juncheng Cao, Shanghai Institute of Microsystem and Information Technology (China)
Jian Liu, Harbin Institute of Technology (China)
Baoli Yao, Xi'an Institute of Optics and Precision Mechanics, CAS (China)
Jian Meng, The 29th Research Institute of China Electronics Technology Group Corporation (China)
Jianqi Wu, The 38th Research Institute of China Electronics Technology Group Corporation (China)
Huilin Jiang, Changchun University of Science and Technology (China)

Nianjiang Chen, North China Research Institute of Electro-optics
(China)
Shensheng Han, The Shanghai Institute of Optics and Fine
Mechanics (China)
Zhongyang Wang, Shanghai Advanced Research Institute, CAS
(China)

Program Committee

Xiuhua Yuan, Huazhong University of Science and Technology (China)
Jian Wu, Beijing University of Posts and Telecommunications (China)
Weisheng Hu, Shanghai Jiao Tong University (China)
Hongxi Yin, Dalian University of Technology (China)
Deying Chen, Harbin Institute of Technology (China)
Yuan Zhao, Harbin Institute of Technology (China)
Dengxin Hua, Xi'an University of Technology (China)
Wei Gong, Wuhan University (China)
Wei qi Jin, Beijing Institute of Technology (China)
Feng Shi, Science and Technology on Low-light-level Night Vision
Laboratory (China)
Ye Li, Changchun University of Science and Technology (China)
Qiang Sun, Changchun Institute of Optics, Fine Mechanics and
Physics of CAS (China)
Chao Zhang, School of Physics, University of Wollongong (Australia)
Shengcai Shi, Purple Mountain Observatory, CAS (China)
Yan Zhang, Capital Normal University (China)
Hua Qin, Key Laboratory of Nano Device and Application, CAS
(China)
Wei Shi, Xi'an University of Technology (China)
Peng Xi, Peking University (China)
Richard Leach, University of Nottingham (UK)
Sijin Wu, Beijing Information Science and Technology University
(China)
Sitian Gao, National Institute of Metrology (China)
Yi Luo, Tsinghua University (China)
Minghua Chen, Tsinghua University (China)
Jianping Chen, Shanghai Jiao Tong University (China)
Xiangfei Chen, Nanjing University (China)
Zhiyi Wei, Institute of Physics, CAS (China)
Yong Cheng, Wuhan Mechanical College
Cheng Cheng, Zhejiang University of Technology (China)
Xiaojun Wang, Institute of Applied Electronics, CAS (China)
Shensheng Han, Nanjing University of Science and Technology
(China)

Pingxing Chen, National University of Defense Technology (China)
Qionghai Dai, Tsinghua University (China)
Chunlei Du, Chongqing Institute of Green and Intelligent Technology
(China)

Introduction

We had the great honor of organizing the International Conference on Frontiers in Optical Imaging Technology and Applications, the International Symposium on Terahertz Technology and Applications, and the International Symposium on Surface Topography and Optical Microscopy. It was truly a great pleasure for us to greet the more than 600 participants from many different countries who attended these three conferences! We firmly believe these conferences will become important international events in the field of optical technology.

The International Conference on Frontiers in Optical Imaging Technology and Application was sponsored by the Chinese Society for Optical Engineering, the Chinese Academy of Engineering, and the National Natural Science Foundation of China, and was organized by the Chinese Society for Optical Engineering. The International Symposium on Terahertz Technology and Applications was sponsored by the Chinese Society for Optical Engineering, and was organized by the University of Shanghai for Science and Technology. The International Symposium on Surface Topography and Optical Microscopy was sponsored by the Chinese Society for Optical Engineering and Harbin Institute of Technology, and was organized by the Chinese Society for Optical Engineering.

The purpose of these three conferences is to provide a forum for participants to report and review innovative ideas and up-to-date progress and developments, and discuss novel approaches to application in the optical field. It is sincerely hoped that research and development in the optical field will continue to be promoted and international cooperation and sharing for the common interest will be enhanced.

On behalf of the Co-chairs and the Organizing Committee of these three conferences, we would like to heartily thank our sponsors and cooperating organizations for their contributions.

We also thank the authors for their contributions to the proceedings, the participants and friends for their interest and efforts in helping us to make the

conferences possible, the Program Committee members for their effective work and valuable advice, the Secretariat, and the SPIE staff for their tireless efforts and outstanding services preparing and publishing the conference proceedings.
