SPIE.

Event: SPIE Smart Structures and Materials + Nondestructive Evaluation and Health Monitoring, 2016, Las Vegas, Nevada, United States

PROCEEDINGS OF SPIE

Behavior and Mechanics of Multifunctional Materials and Composites 2016

Nakhiah C. Goulbourne

Editor

21–23 March 2016

Las Vegas, Nevada, United States

Sponsored by
SPIE

Co-sponsored by
Polytec, Inc. (United States) • OZ Optics, Ltd. (United States) • APS Dynamics, Inc. (United States) • The Electroforce Systems Group of TA Electroforce Corporation (United States) • The Institute of Physics (United Kingdom) • American Elements (United States)

Cooperating Organizations
Intelligent Materials Forum (Japan)
Jet Propulsion Laboratory (United States)
National Science Foundation (United States)

SPIE

Volume 9800

Proceedings of SPIE 0277-786X, V. 9800

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Behavior and Mechanics of Multifunctional Materials and Composites 2016, edited by Nakhiah C. Goulbourne,
Proc. of SPIE Vol. 9800, 980001 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2241869

Proc. of SPIE Vol. 9800 980001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	Authors
ix	Conference Committee

SESSION 1	FERROELECTRICS
9800 03	Characterizing new compositions of [001] _c relaxor ferroelectric single crystals using a work-energy model [9800-2]
9800 04	Uncertainty analysis of continuum scale ferroelectric energy landscapes using density functional theory [9800-3]
9800 05	Development of ionic gels using thiol-based monomers in ionic liquid [9800-4]
SESSION 2	MAGNETORESTRICTIVE MATERIALS
9800 06	Creep behavior of magnetorheological elastomers under combined magnetic and mechanical loads [9800-5]
9800 08	Elimination of thermal instability in precise positioning of Galfenol actuators [9800-7]
9800 0A	Anisotropic thermal property of magnetically oriented carbon nanotube polymer composites [9800-9]
SESSION 3	SHAPE MEMORY MATERIALS
9800 0B	Analysis of shape memory alloy sensory particles for damage detection via substructure and continuum damage modeling [9800-10]
9800 0C	Fracture toughness of shape memory alloy actuators: effect of transformation-induced plasticity [9800-11]
9800 0D	Experimental characterization of shape memory alloy actuator cables (3rd Place SPIE Best Student Paper Award) [9800-12]
9800 0E	Actuator lifetime predictions for Ni ₆₀ Ti ₄₀ shape memory alloy plate actuators [9800-13]
SESSION 4	SHAPE MEMORY POLYMERS
9800 0H	Characterization of origami shape memory metamaterials (SMMM) made of bio-polymer blends [9800-16]
9800 0I	Durability of carbon fiber reinforced shape memory polymer composites in space [9800-17]

SESSION 5	ENERGY STORAGE AND HARVESTING
9800 OK	Layered conductive polymer on nylon membrane templates for high performance, thin-film supercapacitor electrodes [9800-19]
9800 OL	Development of multifunctional fiber reinforced polymer composites through ZnO nanowire arrays [9800-20]
SESSION 6	PIEZOELECTRICS MATERIALS
9800 ON	Experimental characterization of PZT fibers using IDE electrodes [9800-22]
9800 OO	Fabrication and characterization of β-poly(vinylidene fluoride)/silane-treated titanium dioxide dielectric nano-composites [9800-23]
9800 OP	Piezoelectric and dielectric properties of nanoporous polyvinylidene fluoride (PVDF) films [9800-24]
9800 OR	Development, fabrication, and modeling of highly sensitive conjugated polymer based piezoresistive sensors in electronic skin applications [9800-50]
SESSION 7	MULTIFUNCTIONAL COMPOSITES
9800 OS	Mechanical analysis of carbon fiber reinforced shape memory polymer composite for self-deployable structure in space environment [9800-26]
9800 OU	Improvement of fatigue life and prevention of internal crack initiation of chopped carbon fiber reinforced plastics modified with micro glass fibers [9800-28]
9800 OV	Self repair of cracks in brittle material systems [9800-29]
9800 OW	A thermally tunable periodic structure [9800-30]
9800 OX	Real time in-situ sensing of damage evolution in nanocomposite bonded surrogate energetic materials [9800-31]
SESSION 8	NANOCOMPOSITES MATERIALS I
9800 OZ	Self-sensing and thermal energy experimental characterization of multifunctional cement-matrix composites with carbon nano-inclusions [9800-34]
SESSION 9	NANOCOMPOSITES MATERIALS II
9800 11	Evaluation of progressive damage of nano-modified composite laminates under repeated impacts [9800-35]
9800 12	Strain analysis of nanowire interfaces in multiscale composites [9800-36]

- 9800 13 **On the continuum mechanics approach for the analysis of single walled carbon nanotubes** [9800-37]

SESSION 10 MODELING OF MULTIFUNCTIONAL MATERIALS

- 9800 16 **Simulation of controllable permeation in PNIPAAm coated membranes** [9800-41]
- 9800 17 **Investigation of piezoresistivity in CNT nano-composites under damage** [9800-42]
- 9800 19 **Homogenization and improvement in energy dissipation of nonlinear composites** [9800-44]

POSTER SESSION

- 9800 1A **Experimental investigation on dependency of Terfenol-D transducers performance on working conditions** [9800-45]
- 9800 1B **A physics model of the multi-degree freedom ionic polymer-metal composite cylinder actuator** [9800-47]
- 9800 1C **Creation of smart composites using an embroidery machine** [9800-48]
- 9800 1D **Finite element analysis of the dynamic behavior of radially polarized Functionally Graded Piezoelectric (FGP) structures** [9800-49]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Theodore E. Matikas, University of Ioannina (Greece)

Symposium Co-chairs

Tribikram Kundu, The University of Arizona (United States)
Gregory W. Reich, Air Force Research Laboratory (United States)

Conference Chair

Nakhiah C. Goulbourne, University of Michigan (United States)

Conference Co-chair

Hani E. Naguib, University of Toronto (Canada)

Conference Program Committee

Abhijit Bhattacharyya, University of Arkansas at Little Rock (United States)
Gregory P. Carman, University of California, Los Angeles (United States)
Pavel M. Chaplya, Sandia National Laboratories (United States)
Constantin Ciocanel, Northern Arizona University (United States)
Marcelo J. Dapino, The Ohio State University (United States)
Sergio Luis dos Santos e Lucato, Teledyne Scientific Company (United States)
LeAnn E. Faidley, Wartburg College (United States)
Darren J. Hartl, Texas A&M University (United States)
Daniel J. Inman, University of Michigan (United States)
Marc Kamlah, Karlsruher Institut für Technologie (Germany)
Haluk E. Karaca, University of Kentucky (United States)
Kwang Jin Kim, University of Nevada, Las Vegas (United States)
Dimitris C. Lagoudas, Texas A&M University (United States)
Chad M. Landis, The University of Texas at Austin (United States)
Kam K. Leang, University of Nevada, Reno (United States)
Donald J. Leo, Virginia Polytechnic Institute and State University (United States)
Jiangyu Li, University of Washington (United States)
Christopher S. Lynch, University of California, Los Angeles (United States)

Karla M. Mossi, Virginia Commonwealth University (United States)
Robert C. O'Handley, Massachusetts Institute of Technology
 (United States)
Zoubeida Ounaies, The Pennsylvania State University (United States)
Etienne Patoor, Université Metz (France)
Ralph C. Smith, North Carolina State University (United States)
Jonghwan Suhr, University of Delaware (United States)
Vishnu Baba Sundaesan, The Ohio State University (United States)

Session Chairs

- 1 Ferroelectrics
Nakhiah C. Goulbourne, University of Michigan (United States)
Kwang Jin Kim, University of Nevada, Las Vegas (United States)
- 2 Magnetorestrictive Materials
Hani E. Naguib, University of Toronto (Canada)
John A. Gallagher, Merrimack College (United States)
- 3 Shape Memory Materials
Dimitris C. Lagoudas, Texas A&M University (United States)
Darren J. Harl, Texas A&M University (United States)
- 4 Shape Memory Polymers
Filippo Ubertini, Università degli Studi di Perugia (Italy)
- 5 Energy Storage and Harvesting
Zoubeida Ounaies, The Pennsylvania State University (United States)
Jiangyu Li, University of Washington (United States)
- 6 Piezoelectrics Materials
Henry A. Sodano, University of Michigan (United States)
Gary D. Seidel, Virginia Polytechnic Institute and State University
 (United States)
- 7 Multifunctional Composites
Ralph C. Smith, North Carolina State University (United States)
Alireza Bayat, University of Nevada, Reno (United States)
- 8 Nanocomposites Materials I
Constantin Ciocanel, Northern Arizona University (United States)

- 9 Nanocomposites Materials II
Carolyn M. Dry, Natural Process Design, Inc. (United States)
- 10 Modeling of Multifunctional Materials
William S. Oates, Florida State University (United States)
Woong-Ryeol Yu, Seoul National University (Korea, Republic of)
