The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

AUTOMATIC TARGET RECOGNITION AND NAVIGATION

9812 02	Ego-motion based on EM for bionic navigation [9812-35]
9812 03	The positioning algorithm based on feature variance of billet character [9812-56]
9812 04	A harbor background suppression approach [9812-16]
9812 05	A new method of extracting region of interest image area with L0 norm [9812-3]
9812 06	Road environment perception algorithm based on object semantic probabilistic model [9812-14]
9812 07	Facial symmetry assessment based on geometric features [9812-5]
9812 08	An improved Camshift algorithm for target recognition [9812-4]
9812 09	An ellipse detection algorithm based on edge classification [9812-9]
9812 0A	Small target detection using quantum genetic morphological filter [9812-12]
9812 0B	Contour detection based on brightness and contour completion [9812-38]
9812 0C	A research on ROI detection of linear object in SAR image [9812-44]
9812 0D	A long-term target detection approach in infrared image sequence [9812-13]
9812 0E	LiveWire interactive boundary extraction algorithm based on Haar wavelet transform and control point set direction search [9812-15]
9812 0F	Research on matching area selection based on multiple features fusion of full tensor gravity gradient [9812-19]
9812 0G	A set of measurement system for the dynamic laser scatter characteristics of target [9812-23]
9812 0H	A new method for aircraft detection and orientation estimation in remote sensing [9812-20]

9812 0I	GPS free navigation inspired by insects through monocular camera and inertial sensors [9812-47]
9812 0J	Building losses assessment for Lushan earthquake utilization multisource remote sensing data and GIS [9812-24]
9812 0K	Real-time detection of generic objects using objectness estimation and locally adaptive regression kernels matching [9812-28]
9812 0L	Pavement crack detection combining non-negative feature with fast LoG in complex scene [9812-30]
9812 0M	Interest area selection for navigation based on structured edge detection [9812-52]
9812 0N	Shape feature extraction using dual-tree complex wavelet moment invariants method [9812-62]
9812 0O	Solving the depth of the repeated texture areas based on the clustering algorithm [9812-63]
9812 0P	Aircraft recognition in low-resolution SAR imagery using peak feature matching [9812-65]
9812 0Q	A fast recognition method of warhead target in boost phase using kinematic features [9812-68]
9812 0R	A new target reconstruction method considering atmospheric refraction [9812-60]
9812 0S	A real-time target detection algorithm based on combination of intensity and edge for infrared search system [9812-40]
9812 0T	A line detection algorithm based on direction filter and regional growth [9812-43]
9812 0U	A fast method for vehicle speed extraction from single QuickBird imagery [9812-45]
9812 0V	DOA estimation of coherent wideband signals based on extended TOPS algorithm [9812-49]
9812 0W	Weak target extraction algorithm based on nonsubsampling contourlet transform [9812-74]
9812 0X	Ballistic missile precession frequency extraction based on the Viterbi and Kalman algorithm [9812-53]
9812 0Y	A new robust gradient-based method for detection of symmetry axis [9812-81]
9812 0Z	Super pixel density based clustering automatic image classification method [9812-71]
9812 10	Segmentation of touching mycobacterium tuberculosis from Ziehl-Neelsen stained sputum smear images [9812-79]
9812 11	Farmland parcels extraction from high-resolution remote sensing images based on the two-stage image classification [9812-77]

- 9812 12 **Effective 3D infrared image target tracking via framework of particle filter and FAST**
[9812-82]
- 9812 13 **A new method of pulse edge detection in low SNR** [9812-59]
- 9812 14 **Unsupervised multi-class co-segmentation via joint object detection and segmentation
with energy minimization** [9812-83]
- 9812 15 **A pseudo oversampling-based C3PC algorithm for close space objects detection and
localization** [9812-88]
- 9812 16 **A new design for SLAM front-end based on recursive SOM** [9812-61]
- 9812 17 **Spindle extraction method for ISAR image based on Radon transform** [9812-78]
- 9812 18 **A threshold selection method based on edge preserving** [9812-70]
- 9812 19 **Radar signal analysis of ballistic missile with micro-motion based on time-frequency
distribution** [9812-64]
- 9812 1A **Based on spatial-temporal multiframe association infrared target detection** [9812-89]
- 9812 1B **A novel monocular visual navigation method for cotton-picking robot based on horizontal
spline segmentation** [9812-90]
- 9812 1C **A method for extracting water objects from visible image** [9812-7]
- 9812 1D **Research of adaptive threshold edge detection algorithm based on statistics canny
operator** [9812-27]
- 9812 1E **A parallel multiple path tracing method based on OptiX for infrared image generation**
[9812-100]
- 9812 1F **Fast object tracking based on template matching and region information fusion extraction**
[9812-105]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Welcome to proceedings from the 9th International Symposium on Multispectral Image Processing and Pattern Recognition (MIPPR 2015), which was held in Enshi, Hubei, China, 31 October to 1 November 2015.

MIPPR 2015 is a biennial symposium which focuses mainly on the latest research in multispectral image processing and pattern recognition. The symposium had a broad charter. Multispectral was interpreted as not just multiple-wavelength in a narrow sense but also multi-sensor, multi-modal, and multimedia. The symposium covered many disciplines such as sensing, image processing, computer vision, and pattern recognition and involved the development of efficient processing algorithms and their optimization and implementation. The wide range of applications considered included automatic target recognition, autonomous navigation, medical image processing, remote sensing, geographic information systems, and many others.

The symposium provided a forum for scientists, professors, engineers, and graduate students from universities, industries, and government laboratories to meet and exchange ideas and discuss theories, techniques, algorithms, and applications in multispectral image processing and pattern recognition. As expected, there were ample discussions both inside and outside the lecture halls, and it was an exciting meeting.

In response to our call for papers, we received 326 submissions. Based on the reviews provided by an excellent program committee we accepted 245 papers covering many aspects of multispectral image processing and pattern recognition. To ensure a high-quality conference, all abstracts and proceedings of SPIE manuscripts were reviewed by peers for technical merit and English expression. The proceedings from MIPPR 2015 consist of the following five volumes, which are all included in the SPIE Digital Library:

- *MIPPR 2015: Multispectral Image Acquisition, Processing and Analysis (SPIE Volume 9811)*
- *MIPPR 2015: Automatic Target Recognition and Navigation (SPIE Volume 9812)*
- *MIPPR 2015: Pattern Recognition and Computer Vision (SPIE Volume 9813)*
- *MIPPR 2015: Parallel Processing of Images and Optimization; and Medical Imaging Processing (SPIE Volume 9814)*
- *MIPPR 2015: Remote Sensing Image Processing, Geographic Information Systems; and Other Applications (SPIE Volume 9815).*

The realization of a conference depends upon the hard work of many dedicated people. We thank all the members of the organizing committee who put together

MIPPR 2015 for the benefit of all the researchers and for making this conference a success. We hope the papers and the research results presented at this symposium will inspire new research in all the areas related to multispectral image processing and pattern recognition.

Bir Bhanu
