, "Front Matter: Volume 9820," Proc. SPIE 9820, Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXVII, 982001 (2 July 2016); doi: 10.1117/12.2244359

Event: SPIE Defense + Security, 2016, Baltimore, MD, United States

PROCEEDINGS OF SPIE

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXVII

**Gerald C. Holst
Keith A. Krapels**
Editors

**19–21 April 2016
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 9820

Proceedings of SPIE 0277-786X, V. 9820

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXVII,
edited by Gerald C. Holst, Keith A. Krapels, Proc. of SPIE Vol. 9820, 982001
2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2244359

Proc. of SPIE Vol. 9820 982001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. the six-digit CID number.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 MODELING I

- 9820 02 **Investigating binocular summation in human vision using complementary fused external noise** [9820-1]
- 9820 03 **Method and tool for generating and managing image quality allocations through the design and development process** [9820-2]
- 9820 04 **Modeling threshold detection and search for point and extended sources** [9820-3]
- 9820 06 **Reflective band image generation in the night vision integrated performance model** [9820-5]

SESSION 2 MODELING II

- 9820 07 **Measured system component development for the night vision integrated performance model (NV-IPM)** [9820-6]
- 9820 08 **Comparison of relative effectiveness of video with serial visual presentation for target reconnaissance from UASs** [9820-7]
- 9820 09 **Modeling demosaicing of color corrected cameras in the NV-IPM** [9820-51]
- 9820 0A **Comparing and contrasting 2D versus 1D performance modeling in NV-IPM v1.6** [9820-9]

SESSION 3 MODELING III

- 9820 0B **Model development and system performance optimization for staring infrared search and track (IRST) sensors** [9820-10]
- 9820 0C **Is there an optimum detector size for digital night vision goggles?** [9820-11]
- 9820 0D **Efficient polarimetric BRDF transformations** [9820-52]
- 9820 0E **A wavelet contrast metric for the targeting task performance metric** [9820-13]

SESSION 4	MODELING IV
9820 0F	Performance assessment of a single-pixel compressive sensing imaging system [9820-14]
9820 0G	Unified characterization of imaging sensors from VIS through LWIR [9820-15]
SESSION 5	MODELING V
9820 0I	NIR sensitivity analysis with the VANE [9820-17]
9820 0J	Foot's Law and its application to cameras [9820-18]
9820 0K	Spatially resolved 3D noise [9820-19]
SESSION 6	MODELING VI
9820 0M	Hyperhemispheric multifunction sensors for ground combat vehicles: concept evaluation using virtual prototyping (Invited Paper) [9820-21]
9820 0N	HIL range performance of notional hyperspectral imaging sensors [9820-23]
9820 0O	Scenario-based analysis of binning in MWIR detectors for missile applications [9820-25]
SESSION 7	MODELING VII
9820 0Q	An imaging system detectivity metric using energy and power spectral densities [9820-27]
9820 0R	The analysis and rationale behind the upgrading of existing standard definition thermal imagers to high definition [9820-28]
9820 0S	Characterization and recognition of mixed emotional expressions in thermal face image [9820-29]
SESSION 8	TEST I
9820 0U	Thermal system field performance predictions from laboratory and field measurements (Invited Paper) [9820-31]
9820 0V	Novel approach to characterize and compare the performance of night vision systems in representative illumination conditions [9820-32]
9820 0W	Noise measurement on thermal systems with narrow band [9820-33]

SESSION 9	TEST II
9820 0X	Development of a high-definition IR LED scene projector [9820-35]
9820 0Y	Display MTF measurements based on scanning and imaging technologies and its importance in the application space [9820-36]
9820 0Z	Achieving ultra-high temperatures with a resistive emitter array [9820-37]
9820 10	Automated and semi-automated field testing of night vision goggles [9820-38]
SESSION 10	TEST III
9820 13	Real-time simulation of thermal shadows with EMIT [9820-41]
SESSION 11	TARGETS, BACKGROUNDS, ATMOSPHERICS, AND SIMULATION I
9820 14	Simulation of whitecaps and their radiometric properties in the SWIR [9820-42]
9820 15	Investigation of the dynamic thermal infrared signatures of a calibration target instrumented with a network of 1-wire temperature sensors [9820-43]
9820 16	Image based performance analysis of thermal imagers [9820-44]
SESSION 12	TARGETS, BACKGROUNDS, ATMOSPHERICS, AND SIMULATION II
9820 17	Application of cooled IR focal plane arrays in thermographic cameras [9820-45]
9820 18	3D flare particle model for ShipIR/NTCS [9820-46]
9820 19	Digital imaging and remote sensing image generator (DIRSIG) as applied to NVESD sensor performance modeling [9820-47]
9820 1A	Multi-spectral synthetic image generation for ground vehicle identification training [9820-48]
9820 1B	New technologies for HWIL testing of WFOV, large-format FPA sensor systems [9820-50]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David A. Logan, BAE Systems (United States)

Symposium Co-chair

Donald A. Reago Jr., U.S. Army Night Vision & Electronic Sensors
Directorate (United States)

Conference Chairs

Gerald C. Holst, JCD Publishing (United States)
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)

Conference Program Committee

Gisele Bennett, Georgia Institute of Technology (United States)
Piet Bijl, TNO Defence, Security and Safety (Netherlands)
James A. Dawson, Dynetics, Inc. (United States)
Ronald G. Driggers, St. Johns Optical Systems (United States)
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
David P. Forrai, L-3 Communications Cincinnati Electronics
(United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Eddie L. Jacobs, University of Memphis (United States)
Terrence S. Lomheim, The Aerospace Corporation (United States)
Teresa L. Pace, L-3 Communications (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)
Hector M. Reyes, Raytheon Company (United States)
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Bernard M. Rosier, ONERA (France)
Michael A. Soel, FLIR Systems, Inc. (United States)
Andrew W. Sparks, L-3 Sonoma EO (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems
(United States)

Session Chairs

- 1 Modeling I
Andrew W. Sparks, L-3 Sonoma EO (United States)
- 2 Modeling II
Andrew W. Sparks, L-3 Sonoma EO (United States)
- 3 Modeling III
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
- 4 Modeling IV
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
- 5 Modeling V
James A. Dawson, Dynetics, Inc. (United States)
- 6 Modeling VI
Hector M. Reyes, Raytheon Company (United States)
- 7 Modeling VII
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
- 8 Test I
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
- 9 Test II
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
- 10 Test III
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

- 11 Targets, Backgrounds, Atmospheric, and Simulation I
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)
- 12 Targets, Backgrounds, Atmospheric, and Simulation II
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors
Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)
Bernard M. Rosier, ONERA (France)
