Volume 9828

Proceedings of SPIE 0277-786X, V. 9828

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Airborne Intelligence, Surveillance, Reconnaissance (ISR) Systems and Applications XIII, edited by Daniel J. Henry, Gregory J. Gosian, Davis A. Lange, Dale Linne von Berg, Thomas J. Walls, Darrell L. Young, Proc. of SPIE Vol. 9828, 982801 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2245356

Proc. of SPIE Vol. 9828 982801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 **ISR: PLATFORMS AND MISSIONS**

9828 02	ISR systems: Past, present, and future (Invited Paper) [9828-1]
9828 03	A framework for autonomous and continuous aerial intelligence, surveillance, and reconnaissance operations [9828-2]
9828 06	An aerial 3D printing test mission [9828-5]

SESSION 2 **ISR: OPTICS AND STABILIZATION**

9828 08	Laser-based satellite communication systems stabilized by non-mechanical electro-optic scanners [9828-7]
9828 09	Piezo-based miniature high resolution stabilized gimbal [9828-8]

SESSION 3 **ISR: SENSORS AND SYSTEMS**

9828 0B	The eyes of LITENING [9828-11]
---------	---------------------------------------

SESSION 4 **ISR: INFORMATION EXTRACTION/QUANTIFICATION**

9828 0C	Precision optical navigation guidance system [9828-12]
9828 0D	Pattern of life analysis for diverse data types [9828-13]
9828 0E	Automated video quality measurement based on manmade object characterization and motion detection [9828-14]
9828 0F	A study of the effects of degraded imagery on tactical 3D model generation using structure-from-motion [9828-15]

SESSION 5 ISR: IMAGE PROCESSING

- 9828 0G **Development of a real-time neural network estimator to improve defense capabilities of HEO satellites** [9828-16]
- 9828 0I **Automatic construction of aerial corridor for navigation of unmanned aircraft systems in class G airspace using LiDAR** [9828-18]
- 9828 0J **High-performance image deinterlacing using optical flow and artifact post-processing on GPU/CPU for surveillance and reconnaissance tasks** [9828-19]
- 9828 0K **Improving detection of low SNR targets using moment-based detection** [9828-20]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David A. Logan, BAE Systems (United States)

Symposium Co-chair

Donald A. Reago Jr., U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Conference Chair

Daniel J. Henry, Rockwell Collins, Inc. (United States)

Conference Co-chairs

Gregory J. Gosian, L-3 Communications (United States)
Davis A. Lange, UTC Aerospace Systems (United States)
Dale Linne von Berg, U.S. Naval Research Laboratory (United States)
Thomas J. Walls, U.S. Naval Research Laboratory (United States)
Darrell L. Young, Raytheon Intelligence & Information Systems (United States)

Session Chairs

- 1 ISR: Platforms and Missions
Dale Linne von Berg, U.S. Naval Research Laboratory (United States)
- 2 ISR: Optics and Stabilization
Davis A. Lange, UTC Aerospace Systems (United States)
- 3 ISR: Sensors and Systems
Thomas J. Walls, U.S. Naval Research Laboratory (United States)
- 4 ISR: Information Extraction/Quantification
Darrell L. Young, Raytheon Intelligence & Information Systems (United States)
- 5 ISR: Image Processing
Gregory J. Gosian, L-3 Communications (United States)

Introduction

This year's conference brought a wide range of papers related to Airborne ISR Systems and Applications. The conference was broken into multiple sessions, which addressed several different parts of the ISR TCPED image chain (Tasking, Capture, Processing, Exploitation, and Dissemination):

1. Platforms and Missions
2. Optics and Stabilization
3. Sensors and Systems
4. Information Extraction/Quantification
5. Image Processing

I would like to thank all of the authors for their efforts in making our conference such a success. We greatly appreciate them for writing and presenting their papers, as well as for their innovations in this exciting field that make our conference better each year. I look forward to the 2017 conference to see what additional advances have been made in these areas and what new technologies have been developed.

See you at Defense + Commercial Sensing 2017!

Sincerely,

Daniel J. Henry
