Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Introduction

The 2016 Micro- and Nanotechnology (MNT) Sensors, Systems, and Applications VIII conference during the SPIE Defense and Security Symposium, was held in Baltimore, Maryland, 17-21 April, 2016.

Once again, thanks to the extraordinary efforts of our session chairs, a total of 17 conference sessions were successfully concluded, showcasing the broad and varied vistas in MNT. Cutting-edge sessions captured exciting emerging trends in: Novel Techniques in Image Processing and Detection; Metamaterials/Metasurfaces; Integrated Analog Photonics; Novel Harsh Environment Sensors for Energy Applications; Co-located Sensors, Electronics and Powering Devices for Extreme Environments; Human-Interface Sensors and Electronics; Smart Service Systems for Mobile Health and Telemedicine; Novel Nanophotonic Devices, Sensors, and Concepts Based on 2D Materials; "Killer" Applications for Flexible-Stretchable-Reconfigurable Electronics; Multifunctional Nanoparticles for Biomedical Research; Micro Autonomous Systems Technology; Alternative Navigation & Human in the Loop; Soft Robotics; Standoff Detection with Quantum Cascade Lasers (QCLs); Novel QCL Technology; and THz Imaging.

Successful joint sessions were conducted with the Unmanned Systems Technology conference (9468) and the Open Architecture/Open Business Model Net-Centric Systems and Defense Transformation conference (9479).

It is our sincere hope that the papers within this proceedings volume will provide you, our reader, not only with a snapshot of the programmatic vision behind investments made in each MNT topic area but also its current state of scientific and technological development. Enjoy!
