Front Matter: Volume 9901

, "Front Matter: Volume 9901," Proc. SPIE 9901, 2nd ISPRS International Conference on Computer Vision in Remote Sensing (CVRS 2015), 990101 (2 March 2016); doi: 10.1117/12.2234193

Event: 2015 ISPRS International Conference on Computer Vision in Remote Sensing, 2015, Xiamen, China

PROCEEDINGS OF SPIE

2nd ISPRS International Conference on Computer Vision in Remote Sensing (CVRS 2015)

**Cheng Wang
Rongrong Ji
Chenglu Wen**
Editors

**28-30 April 2015
Xiamen, China**

Organized by
ISPRS Working Group 1/4
ISPRS Inter-Commission Working Group 1/Va

Sponsored by
Xiamen University (China) • University of Waterloo (Canada) • Purdue University (United States) • Xiamen Municipal Science and Technology Association (China) • Xiamen Municipal Land Resources and Housing Society (China) • National Natural Science Foundation of China • International Society for Photogrammetry and Remote Sensing • International Cartographic Association • International Federation of Surveyors • China Society of Image and Graphics • The Geographical Society of Fujian Province (China) • Collaborative Innovation Center for Big Data Applications in Governments

SPIE

Volume 9901

Proceedings of SPIE 0277-786X, V. 9901

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

2nd ISPRS International Conference on Computer Vision in Remote Sensing (CVRS 2015), edited by Cheng Wang, Rongrong Ji, Chenglu Wen, Proc. of SPIE Vol. 9901, 990101 • © 2016 SPIE • CCC code: 0277-786X/16/\$18 • doi: 10.1117/12.2234193

Proc. of SPIE Vol. 9901 990101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committees</i>
xi	<i>Introduction</i>

SESSION 1 POINT CLOUD AND RANGE IMAGE PROCESSING

9901 02	An automatic segmentation method for building facades from vehicle-borne LiDAR point cloud data based on fundamental geographical data [9901-10]
9901 03	Automatic registration of laser-scanned point clouds based on planar features [9901-17]
9901 04	A point matching algorithm based on reference point pair [9901-32]
9901 05	Extraction of power lines from mobile laser scanning data [9901-33]
9901 06	Extraction of rod-like objects from vehicle-borne LiDAR data [9901-36]
9901 07	Extraction of tree crowns from mobile laser scanning data using a marked point process model [9901-38]
9901 08	Geometric validation of a mobile laser scanning system for urban applications [9901-45]
9901 09	Delineation of individual tree crowns for mobile laser scanning data [9901-47]
9901 0A	Road traffic sign detection and classification from mobile LiDAR point clouds [9901-49]
9901 0B	Feature selection for quality assessment of indoor mobile mapping point clouds [9901-56]

SESSION 2 PHOTOGRAMMETRIC COMPUTER VISION

9901 0C	Effects analysis of array geometry for resolving performance based on spatial average ambiguity function [9901-22]
9901 0D	Effect analysis and design on array geometry for coincidence imaging radar based on effective rank theory [9901-23]
9901 0E	Design and implementation of H.264 based embedded video coding technology [9901-30]
9901 0F	Semi-supervised feature learning for hyperspectral image classification [9901-40]
9901 0G	An improved SIFT algorithm based on KFDA in image registration [9901-41]

- 9901 OH **Change detection based on integration of multi-scale mixed-resolution information** [9901-46]
- 9901 OI **Automatic extraction of lunar impact craters from Chang'E images based on Hough transform and RANSAC** [9901-5]
- 9901 OJ **Accumulating pyramid spatial-spectral collaborative coding divergence for hyperspectral anomaly detection** [9901-52]
- 9901 OK **Space resection model calculation based on random sample consensus algorithm** [9901-6]
- 9901 OL **A robust endmember constrained non-negative matrix factorization method for hyperspectral unmixing** [9901-8]

SESSION 3 OBJECT EXTRACTION

- 9901 OM **Vehicle detection from high-resolution aerial images based on superpixel and color name features** [9901-13]
- 9901 ON **The live service of video geo-information** [9901-14]
- 9901 OO **The infrared target enhancement method based on optimization at the whole directional polarization** [9901-16]
- 9901 OP **Automated extraction of urban trees from mobile LiDAR point clouds** [9901-20]
- 9901 OQ **Ship detection in panchromatic images: a new method and its DSP implementation** [9901-3]
- 9901 OR **Automatic target extraction in complicated background for camera calibration** [9901-50]

SESSION 4 MAPPING WITH SAR AND LiDAR

- 9901 OS **Effects analysis of array geometry for resolving performance based on spatial average ambiguity function** [9901-24]
- 9901 OT **SAR target classification based on multiscale sparse representation** [9901-29]
- 9901 OU **Benchmark on outdoor scenes** [9901-44]
- 9901 OV **Epipolar geometry comparison of SAR and optical camera** [9901-54]
- 9901 OW **A line segment based registration method for terrestrial laser scanning point cloud data** [9901-59]
- 9901 OX **An automatic and overlap based method for LiDAR intensity correction** [9901-7]

SESSION 5 ENVIRONMENT MONITORING

- 9901 0Y **Detecting traffic hot spots using vehicle tracking data** [9901-2]
- 9901 0Z **Combinative hypergraph learning on oil spill training dataset** [9901-39]
- 9901 10 **Application of LiDAR's multiple attributes for wetland classification** [9901-4]
- 9901 11 **A sea-land segmentation algorithm based on graph theory** [9901-60]
- 9901 12 **Thinking on sharing 3D GIS data by web service following OGC standard** [9901-27]
- 9901 13 **A simplified method to estimate atmospheric water vapor using MODIS near-infrared data**
[9901-28]

SESSION 6 CLASSIFICATION ALGORITHM

- 9901 14 **Economic load dispatch using improved gravitational search algorithm** [9901-11]
- 9901 15 **A RANSAC-ST method for image matching** [9901-12]
- 9901 16 **Improved phase congruency based interest point detection for multispectral remote sensing images** [9901-57]
- 9901 17 **A class-oriented model for hyperspectral image classification through hierarchy-tree-based selection** [9901-18]
- 9901 18 **Are ground level visual attributes useful for high resolution remote sensing image classification?** [9901-51]
- 9901 19 **Supervised nonparametric sparse discriminant analysis for hyperspectral imagery classification** [9901-55]

SESSION 7 3D SCENE RECONSTRUCTION

- 9901 1A **A new 3D shape precision measurement system calibration method based on non-diffraction grating structured light projection** [9901-15]
- 9901 1B **An approach of DSM generation from multi-view images acquired by UAVs** [9901-21]
- 9901 1C **3D scene reconstruction based on 3D laser point cloud combining UAV images** [9901-26]
- 9901 1D **Research on precise modeling of buildings based on multi-source data fusion of air to ground** [9901-9]
- 9901 1E **Reconstruction of individual trees based on LiDAR and in situ data** [9901-43]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committees

Conference Chair

Jonathan Li, Xiamen University (China) and University of Waterloo (Canada)

Local Organizing Committee

Cheng Wang, Xiamen University (China)

Chenglu Wen, Xiamen University (China)

Program Committee

Rongrong Ji, Xiamen University (China)

Ayman Habib, Purdue University (United States)

Uwe Stilla, Technische Universität Munich (Germany)

Conference Review Committee

Xiaoshuai Sun, Harbin Institute of Technology (China)

Bineng Zhong, Huaqiao University (China)

Xiaoliang Fan, Lanzhou University (China)

Ming Cheng, Tsinghua University (China)

Xiaoji Niu, Wuhan University (China)

Yiping Chen, National University of Defense Technology (China)

Shiqian Wang, University of Waterloo (Canada)

Zilong Zhong, University of Waterloo (Canada)

Xiaofang Liu, Henan Normal University (China)

Session Chairs

- 1 Point Cloud and Range Image Processing
Jonathan Li, University of Waterloo (Canada)
- 2 Photogrammetric Computer Vision
Charles K. Toth, The Ohio State University (United States)
- 3 Object Extraction
Naser El-Sheimy, University of Calgary (Canada)
- 4 Mapping with SAR and LiDAR
Dorota A. Grejner-Brzezinska, The Ohio State University (United States)

- 5 Environment Monitoring
Xiaoji Niu, Wuhan University (China)
- 6 Classification Algorithm
Rongrong Ji, Xiamen University (China)
- 7 3D Scene Reconstruction
Cheng Wang, Xiamen University (China)

Introduction

The Second International Conference on Computer Vision in Remote Sensing in 2015 aimed to bring international researchers together and facilitated dialogue on emerging topics in the fields of Computer Vision, Image Processing, Image Analysis, Pattern Recognition, Photogrammetry, and Remote Sensing. The conference offered an interdisciplinary forum in the fields of image segmentation and classification, object detection and extraction, 3D surface modeling and reconstruction, and 3D scene representation and visualization.
