SPIE

Volume 9996

Proceedings of SPIE 0277-786X, V. 9996

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Information Science and Technology II, edited by Mark T. Gruneisen, Miloslav Dusek, John G. Rarity,
Proc. of SPIE Vol. 9996, 999601 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2263788

Proc. of SPIE Vol. 9996 999601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PRACTICAL QUANTUM CRYPTOGRAPHY

9996 04	Photonic quantum digital signatures operating over kilometer ranges in installed optical fiber [9996-4]
9996 06	Increasing operational command and control security by the implementation of device independent quantum key distribution [9996-6]

SECURITY AND PERFORMANCE OF QUANTUM COMMUNICATION SYSTEMS

9996 09	Secret key capacity of the thermal-loss channel: improving the lower bound (Invited Paper) [9996-8]
9996 0B	Enhancing QKD security with weak measurements [9996-10]
9996 0C	Enhancing the secure key rate in a quantum-key-distribution system using discrete-variable, high-dimensional, time-frequency states [9996-11]

GENERATION AND MANIPULATION OF ENTANGLED STATES

9996 0E	Generation and analysis of correlated pairs of photons on board a nanosatellite (Best Student Paper Award) [9996-13]
9996 0G	Polarization entangled cluster state generation in a lithium niobate chip [9996-15]
9996 0H	Quantum operations on entangled photons using Lyot filters [9996-16]
9996 0I	Observation of strong continuous-variable Einstein-Podolsky-Rosen entanglement using shaped local oscillators [9996-17]

QUANTUM CIRCUITS, MEMORIES, SIMULATORS, RANDOMNESS GENERATORS AND SENSORS II

9996 0N	Quantum lattice gas algorithmic representation of gauge field theory [9996-22]
9996 0P	A robust approach to the generation of high-quality random numbers [9996-24]

POSTER SESSION

- 9996 0Q **Generation of physical random numbers by using homodyne detection** [9996-25]
- 9996 0S **Continuous operation of four-state continuous-variable quantum key distribution system**
[9996-27]
- 9996 0T **The influences that spatial coherence of the pump beam imposes on the properties of
entangled photon pairs** [9996-28]
- 9996 0U **Free-space optical communication alignment system** [9996-29]
- 9996 0V **Security against jamming in imaging with partially-distinguishable photons** [9996-30]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David H. Titterton, United Kingdom Defence Academy
(United Kingdom)

Symposium Co-Chairs

Ric Schleijpen, TNO Defence, Security and Safety
(Netherlands)

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)

Stuart S. Duncan, Leonardo-Finmeccanica (United Kingdom)

Conference Chairs

Mark T. Gruneisen, Air Force Research Laboratory (United States)

Miloslav Dusek, Palacký University Olomouc (Czech Republic)

John G. Rarity, University of Bristol (United Kingdom)

Conference Programme Committee

Paul M. Alsing, Air Force Research Laboratory (United States)

Jan Bouda, Masaryk University (Czech Republic)

Robert W. Boyd, University of Ottawa (Canada)

Gerald S. Buller, Heriot-Watt University (United Kingdom)

Ryan M. Camacho, Sandia National Laboratories (United States)

Marcos Curty, Universidad de Vigo (Spain)

Michael L. Fanto, Air Force Research Laboratory (United States)

John D. Goglewski, European Office of Aerospace Research and
Development (United Kingdom)

Gregory S. Kanter, NuCrypt LLC (United States)

Prem Kumar, Northwestern University (United States)

Norbert Lütkenhaus, University of Waterloo (Canada)

Vadim V. Makarov, University of Waterloo (Canada)

Ronald E. Meyers, U.S. Army Research Laboratory (United States)

Momtchil Peev, Austrian Research Centers GmbH - ARC (Austria)

Renato Renner, ETH Zürich (Switzerland)

Andrew J. Shields, Toshiba Research Europe Ltd. (United Kingdom)

Rupert Ursin, Austrian Academy of Sciences (Austria)

Session Chairs

Opening Remarks

Mark T. Gruneisen, Air Force Research Laboratory (United States)

1 Keynote Session

Miloslav Dusek, Palacký University Olomouc (Czech Republic)

2 Practical Quantum Cryptography

Marco Lucamarini, Toshiba Research Europe Ltd. (United Kingdom)

3 Security and Performance of Quantum Communication Systems

Erika Andersson, Heriot-Watt University (United Kingdom)

4 Generation and Manipulation of Entangled States

Gerald S. Buller, Heriot-Watt University (United Kingdom)

5 Quantum Circuits, Memories, Simulators, Randomness Generators and
Sensors I

Rakhitha Chandrasekara, Center for Quantum Technologies
(Singapore)

6 Quantum Circuits, Memories, Simulators, Randomness Generators and
Sensors II

Paul M. Alsing, Air Force Research Laboratory (United States)
