Bruce J. Schachter is an engineer whose work has focused on automatic target recognition (ATR) for more than forty years. He was on the team that developed the first Automatic Target Recognizer at the University of Maryland, then later at Northrop Grumman. He has been program manager or principal investigator of a dozen ATR programs. His previous books are Pattern Models and the award-winning Computer Image Generation. The author can be contacted at Bruce.Jay.Schachter@gmail.com.
