

Keyword Index

- 2D object representation, 30
- 3D object representation, 30
- 8-neighborhood, 42
- Approximation, 83
- Area objects, 105
- Binarization, 33
- Binary image processing, 42
- Cartographic objects, 92
- Centers of maximal discs, 62
- Closing, 51
- Color maps, 7
- Connected component, 44
- Connectivity, 41
- Contour form, 26
- Contour pixel, 42
- Contouring, 70
- Database, 195
- Data quality, 148
- Dilation, 50
- Distance, 42
- Distance map, 47
- Distance transform, 46
- ED entities form, 28
- Erosion, 50
- Extraction of arcs, 127
- Feature extraction, 79
- Feature points, 79
- Graphic information, 1
- Graphic primitives, 26
- Gray-scale vectorization, 68
- Histogram, 37
- Image Binarization, 38
- Image file formats, 33
- Image scanning, 33
- Image vectorization, 4
- Interactive techniques, 146
- Interior pixel, 42
- Interpretation, 22
- Knowledge-based object recognition, 113
- Line drawings, 1
- Macrotecture, 106
- Map digitizing, 93
- Map layers, 6
- Mathematical morphology, 50
- Medial axis transform, 68
- Microtexture, 106
- Neighbors, 42
- Nodes and end points, 79
- Noise reduction, 56
- Opening, 60
- Raster, 2
- Recognition of crosshatched areas, 133
- Recognition of dashed lines, 129
- Recognition of dimensions, 136
- Recognition of line objects, 94
- Recognition of roads, 99
- Recognition of symbols, 109
- Run-length image representation, 57
- Scan devices, 33
- Scanning, 2
- Segment tracing, 80
- Skeleton, 26
- Straight lines, 127
- Structuring element, 50
- Texture, 106
- Texture border, 107
- Texture element, 105
- Thinning, 61
- Thinning requirements, 62
- Thresholding, 38
- Vector, 1
- Vector image representation, 26
- Vectorization, 3
- Vectorization errors, 87
- Vectorization systems, 11

Sergey V. Ablameyko was born September 24, 1956. He received his mathematics degree from Belarussian State University in Minsk (1978), and his Candidate of Sciences degree (PhD, 1984) and Doctor of Sciences degree (1990) from the Institute of Engineering Cybernetics (IEC) of the Belarussian Academy of Sciences. In 1992 he received the title of Professor. Dr. Ablameyko has worked at the IEC since 1986 as head of the Image Processing and Recognition Laboratory.

He has more than 130 publications, including several books on image processing, and has been involved in the creation of various practical image processing and map digitizing systems. Dr. Ablameyko's main interests are line-drawing image analysis, remote sensing image processing, object representation and recognition, digital geometry, knowledge-based systems, and geographic information systems. He has been a visiting scientist in Italy, Japan, Sweden, UK, Finland, Germany, and Spain. He was chair/cochair of international conferences held in Germany (1993), Poland (1996, 1997), and Belarus (1993, 1995, 1997), and member of program committees and session chair of numerous international conferences on image processing. Dr. Ablameyko is a Fellow of IEE, a senior member of IEEE, and Fellow (Academician) of two Academies. He is a member of the governing board of the International Association of Pattern Recognition (IAPR), president of the Belarussian IAPR Society, and vice president of the Belarussian Association for Artificial Intelligence.
