Daniel C. Harris is a Senior Scientist in the Chemistry and Materials Division of the Research Department at the Naval Air Warfare Center at China Lake, California, where his specialty is infrared window and dome materials. He holds a Bachelor's degree in chemistry from Massachusetts Institute of Technology and a Ph.D. in chemistry from California Institute of Technology. Prior to coming to the Naval Air Warfare Center in 1983, he taught at the University of California at Davis and Franklin and Marshall College in Lancaster, Pennsylvania. He is the author of the widely used undergraduate analytical chemistry text, *Quantitative Chemical Analysis* (5th edition, 1998), and has also written the textbook *Exploring Chemical Analysis* and co-authored *Symmetry and Spectroscopy*. On those very rare occasions when he is not at his desk or in an airport, he can be found hiking under the blue California sky.
