### Index

#### A
- Abel inversion, 696, 743
- absorption cross section, 161
- acceleration of wafer stage, 33
- acceleration time, 32
- active plasma cleaning, 989
- aerial-image microscope (AIM), 634
- anomalous resistivity, 232
- aperture function, 895
- astron discharge, 459

####Atomic data modeling codes
- atomic structure calculations, 150
  - CIV3, 114
  - Cowan code, 62, 216, 693
  - Cowan suite of codes, 151
  - Flexible Atomic Code (FAC), 113, 114
  - HULLAC, 114, 155, 316, 323, 349
  - multiconfiguration Dirac-Fock (MCDF), 114, 316
  - multiconfiguration Hartree-Fock (MCHF), 114, 315, 316
  - random-phase approximation with exchange, 160
  - self-consistent Dirac-Fock-Slater iteration, 114
  - single-configuration Dirac-Fock (SCDF), 52
  - single-multipole approximation, 114
  - SUPERSTRUCTURE, 114
  - time-dependent local density approximation (TDLDA), 160
  - code DAVID, 160
  - also see under plasma modeling, laser-produced plasma modeling
  - applications of the EUV tube, 833

####Atomic data—tin
- energy levels, ionization potential, lines and transition probability, 353
  - Sn VI, 121
  - Sn VII, 117, 122
  - Sn VIII, 117, 123
  - Sn IX, 117, 126
  - Sn X, 117, 131
  - Sn XI, 117, 137
  - Sn XII, 142
  - Sn XIII, 144
  - Sn XIV, 146
  - Sn XV, 147
  - emissivity, 350
- relative ion population in plasma, 155, 595
- spectra
  - classification, 117
  - comparison experimental and theoretical, 118, 353
  - experimental, 117, 118, 160, 183, 405
  - recording, 113
  - spectral lines table, 120
  - theoretical, 116, 162, 236, 304, 323, 325
  - theoretical absorption spectra of Sn I–IV, 162
  - time-gated and space-resolved spectra of Sn vacuum spark, 190
  - transition probabilities for Sn VI–XV, 116

####Atomic data—xenon
- absorption coefficients, 290
- benchmarking
  - input data, 54
  - output data, 55
- electron-impact ionization cross section, 53
- energy levels
  - Xe VIII ($q = 7$), 71
  - Xe IX ($q = 8$), 81
  - Xe X ($q = 9$), 90, 353
  - Xe XI ($q = 10$), 97
  - Xe XIX ($q = 17$), 69
- ionization energies all ionic stages, 52
  - Xe ($q < 7$ or $> 18$), 54
  - Xe VIII, 59
  - Xe IX, 61
  - Xe X, 63
  - Xe XI, 64
  - Xe XII, 65
  - Xe XIII, 66
  - Xe XIV, 66
  - Xe XV, 67
  - Xe XVI, 67
Xe XVII, 68
Xe XVIII, 68
Xe XIX, 69
ionization rate, Xe X ion, 227
ion fraction distribution versus electron
temperature, 163, 302
outlook and future data needs, 56
oscillator strength Xe IX–XVIII, 151
photoionization cross sections, 53
