About the Author

Michael Schaub is currently a Principal Optical Engineer at Raytheon Missile Systems in Tucson, AZ, where he designs and develops visible, infrared, and laser-based electro-optical systems. Previously, he was a Senior Optical Engineer at a precision injection molding plastic optics company. In this role, he was involved in the design, prototyping, testing, and production of plastic optical systems. He has over 10 years experience in the design of plastic optical systems and remains active in the field, through his job, consulting, and teaching an SPIE course.
