The Kingslake Medal and Prize

Optical Engineering is always proud to announce the recipients of the Rudolf Kingslake Medal and Prize for the most noteworthy paper appearing in Optical Engineering. The winner for the 1994 journal year is Jose M. Sasian, “How to approach the design of a bilateral symmetrical optical system.”

Congratulations, Dr. Sasian, on the well-deserved award for your paper that appeared in the June 1994 issue [Vol. 33(6), 2045—2061 (1994)]. Dr. Sasian was working at AT&T Bell Laboratories in Naperville, Illinois, when the work was carried out. He is now at the Optical Sciences Center at the University of Arizona.

The selection committee was chaired by Dr. John Greivenkamp who wrote in his report to SPIE President Gaskill:

“The selection process seems to get more difficult each year as the number of papers in Optical Engineering grows. We first selected 27 potential candidates from all the papers. This list was then narrowed to a list of 11 exceptional papers. Out of this list of finalists, Jose Sasian’s paper clearly emerged as a special contribution to the field of optical engineering. The selection of this paper is the unanimous choice of the committee.”

We thank John Greivenkamp and his committee, Ed English, David Kay, and Satoshi Ishihara for their significant effort in the process of selection—a time-consuming task.

Dr. Sasian will receive his award at the SPIE 40th Annual Meeting Awards Banquet on Wednesday, July 12, in San Diego, California.
