I am very often asked about the circulation and the readership of *Optical Engineering*. Sometimes these are just interested inquiries from colleagues who are authors, reviewers, readers, or members—or, in fact, all possible combinations of the above. On other occasions the inquiry is more formal and comes from advertisers or from those who collect comparative statistics for a variety of journals and then share those statistics with potential advertisers.

Those of us who work on the journal thought that the readership would be interested in this information and I can also point to this editorial next time I am asked.

We can define circulation by a number of broad categories but first the grand total based on the July 1991 issue of *Optical Engineering* was 12,836. This number represents the paid subscriptions to the journal. Regular members received 10,806 of that total, and sustaining members 948. There were 1049 copies that went to subscribers and the final 33 copies were distributed as complimentary copies to various places such as the Library of Congress and the many companies that index *Optical Engineering*. You might also be interested to know that nearly 3000 copies were mailed overseas. In addition to these 12,836 “paid subscriptions,” a small number of additional copies are given out on a one-time basis to authors, guest editors, etc.

The Society is often asked to provide so-called “territorial distribution” statistics based in the United States on the census regions. The information for the May issue of this year is given below:

New England	1,196
Middle Atlantic	1,498
East North Central	908
West North Central	317
South Atlantic	1,282
East South Central	316
West South Central	488
Mountain	816
Pacific	3,033
Canada	342
Foreign	2,924
Other	5

So much for circulation. What about readership? I could not even hazard a guess except that I hope that the readership is much greater than the circulation. Multiple readers of library copies as well as individual copies should outnumber those copies not read by the recipient! I end by wishing all of you who have read this editorial “Happy reading of *Optical Engineering*!”

Brian J. Thompson
Editor

November 1991

Infrared Imaging Systems

Mohammad A. Karim
University of Dayton
Center for Electro-Optics
Dept. of Electrical Engineering
300 College Park Ave.
Dayton, OH 45469-0226
513/229-3611

January 1992

Smart Materials and Structures

Richard O. Claus
Virginia Polytechnic Institute and
State University
Dept. of Electrical Engineering
Fiber and Electro-Optics Research Center
648 Whittemore Hall
Blacksburg, VA 24061
703/231-7203

March 1992

Optics in Poland

Romuald Jozwicki
Warsaw Institute of Technology
Institute of Design of Precision and Optical
Instruments
ul. Chodkiewicza 8
02-525 Warsaw, Poland

April 1992

Optical Methods and Means of Information Processing

Mikhail M. Miroshnikov
S.I. Vavilov State Optical Institute
199034, Birjevaya Liniya 12
Leningrad, USSR

May 1992

Optical Implementation of Information Processing, Pattern Recognition, and Neural Networks

Bahram Javidi
University of Connecticut
Department of Electrical and Systems Engineering
Room 312, U-157
260 Glenbrook Road
Storrs, CT 06269-3157
203/486-2867
203/486-0318 FAX

This special issue will cover: optical information processing, including linear and nonlinear operations and transforms; pattern recognition, correlation, filters, distortion invariant object identification; applications of holography in information processing; feature extraction and classification; associative processors and neural networks; and applications of spatial light modulators in 1-D and 2-D information processing.

June 1992

Adaptive Signal Processing

Simon Haykin
McMaster University
Communications Research Laboratory
1280 Main Street West
Hamilton, Ontario L8S 4K1 Canada
416/525-9140

This special issue will cover the following areas: historical perspective of adaptive signal processing, fast algorithms for adaptive filtering, blind deconvolution, chaotic models, wavelet transforms, and neural networks. The emphasis will be on theory and applications.

July 1992

Biomedical Optics

Abraham Katzir
Tel Aviv University
School of Physics
69978 Tel Aviv, Israel

+44 81 467 6515 FAX
R. J. Parker
Rolls Royce plc
P.O. Box 31
Derby DE2 8BJ, United Kingdom

This special issue will represent a typical cross section of current applied research taking place in the United Kingdom in the field of optics. The editors regard this as an excellent opportunity to promote the best in U.K. optics research worldwide.

October 1992

Acousto-Optics

Ting-Chung Poon
Virginia Polytechnic Institute and State University
Bradley Department of Electrical Engineering
Optical Image Processing Laboratory
Blacksburg, VA 24061
703/231-4876
703/231-3362 FAX

This special issue will focus on all aspects of research on acousto-optic effects and devices as well as their signal and image processing applications. Manuscripts should be sent to Ting-Chung Poon before February 1, 1992.

December 1992

Automatic Target Recognition

Firooz Sadjadi
Systems and Research Center
Honeywell Inc.
3660 Technology Drive
Minneapolis, MN 55418
612/782-7543
612/782-7438 FAX

The areas to be considered for inclusion are sonar, radar, laser and passive IR, visible ATR techniques, modeling of sensors, target segmentation, detection, and tracking, model-based target recognition, multisensor processing and sensor fusion for ATR, role of performance evaluation in ATR, invariant object recognition, neural networks for ATR, adaptive and learning systems for ATR, and optical processing for ATR.

Authors are invited to submit manuscripts on any of the above topics. Manuscripts should be sent to Firooz Sadjadi before April 1, 1992.

January 1993

Optical Research in Asia
