[DOI: [10.1117/1.OE.57.6.069802](https://doi.org/10.1117/1.OE.57.6.069802)]

This article [*Opt. Eng.* **57**(6), 066106 (2018)] was originally published on 7 June 2018 with two figures transposed. The positions of Figs. 3 and 4 were reversed. The corrected figures are shown below.

Fig. 3 Distribution of the transverse Poynting vector component projection on the radius vector direction in the silica glass capillary cross section. The streamlines for the transverse component of the Poynting vector (black lines). All dimensions are in μm .

Fig. 4 Distribution of the transverse Poynting vector component projection on the radius vector direction in the silica glass segmented capillary cross section ($N = 36$). The streamlines for the transverse component of the Poynting vector (black lines). All dimensions are in μm .

The paper was corrected online on 21 June 2018. It appears correctly in print.
