High-resolution spectrometer: solution to the axial resolution and ranging depth trade-off of SD-OCT [8572-22]
T. Marvdashti, H. Y. Lee, A. K. Ellerbee, Stanford Univ. (United States)

SESSION 5  FLUORESCENCE

Sentinel lymph nodes detection with an imaging system using Patent Blue V dye as fluorescent tracer [8572-26]
F. Tellier, J. Steibel, R. Chabrier, ICUBE, CNRS, Univ. de Strasbourg (France); J. F. Rodier, Paul Strauss Cancer Ctr. (France); G. Pourroy, Institut de Physique et Chimie des Matériaux de Strasbourg, CNRS, Univ. de Strasbourg (France); P. Poulet, ICUBE, CNRS, Univ. de Strasbourg (France)

Laser line scanning illumination scheme for the enhancement of contrast and resolution for fluorescence reflectance imaging [8572-27]
F. Fantoni, L. Hervé, V. Poher, CEA LETI (France); S. Gioux, Beth Israel Deaconess Medical Ctr. (United States); J. Mars, GIPSA Lab., CNRS, Institut National Polytechnique de Grenoble (France); J. M. Dinten, CEA LETI (France)

Combination of widefield fluorescence imaging and nonlinear optical microscopy of oral epithelial neoplasia [8572-28]
R. Pal, The Univ. of Texas Medical Branch (United States); K. Edward, The Univ. of the West Indies (Jamaica); T. Brown, L. Ma, J. Yang, S. McCarmon, The Univ. of Texas Medical Branch (United States); M. Motamedi, The Univ. of Texas Medical Branch (United States) and The Univ. of the West Indies (Jamaica); G. Vargas, The Univ. of Texas Medical Branch (United States)

SESSION 6  ENDOSCOPY, ETC.

Infrared dermal thermography on diabetic feet soles to predict ulcerations: a case study [8572-29]
C. Liu, F. van der Heijden, Univ. Twente (Netherlands); M. E. Klein, DEMCON (Netherlands); J. G. van Baal, Hospital Group Twente (Netherlands); S. A. Bus, Hospital Group Twente (Netherlands) and Univ. of Amsterdam (Netherlands); J. J. Van Netten, Hospital Group Twente (Netherlands)

Laser scanning cytometry as a tool for biomarker validation [8572-30]
A. Mittag, Univ. Leipzig (Germany); C. Füldner, J. Lehmann, Fraunhofer Institute for Cell Therapy and Immunology (Germany); A. Tannok, Univ. Leipzig (Germany)

Wide-field flexible endoscope for simultaneous color and NIR fluorescence image acquisition during surveillance colonoscopy [8572-32]
P. B. Garcia-Allende, Helmholtz Zentrum München GmbH (Germany); W. B. Nagengast, Univ. Medisch Ctr. Groningen (Netherlands); J. Glatz, V. Ntzachristos, Helmholtz Zentrum München GmbH (Germany)

Real-time endoscopic guidance using near-infrared fluorescent light for thoracic surgery [8572-33]
V. Venugopal, A. Stockdale, F. Neacsu, F. Kettenring, J. V. Frangioni, S. P. Gangadharan, S. Gioux, Beth Israel Deaconess Medical Ctr. (United States)
### SESSION 7  NOVEL TECHNOLOGIES

| 8572 OS | Exploiting multimode waveguides for pure fibre based fluorescence imaging [8572-34] | T. Čižmár, K. Dholakia, Univ. of St. Andrews (United Kingdom) |
| 8572 OU | Mobile large area confocal scanner for imaging tumor margins: initial testing in the pathology department [8572-36] | S. Abeytunge, Y. Li, B. Larson, G. Peterson, R. Toledo-Crow, M. Rajadhyaksha, Memorial Sloan-Kettering Cancer Ctr. (United States) |

### SESSION 8  VIBRATIONAL SPECTROSCOPY

| 8572 OX | Raman microspectrometer combined with scattering microscopy and lensless imaging for bacteria identification [8572-39] | S. A. Strola, E. Schultz, C. P. Allier, CEA LETI (France); B. DesRoches, Tornado Spectral Systems (Canada); J. Lemmonier, J.-M. Dinten, CEA LETI (France) |
| 8572 OY | Classification of Raman spectra of bacteria using rank order kernels [8572-40] | A. Kyriakides, Univ. of Cyprus (Cyprus) and KIOS Research Ctr. for Intelligent Systems and Networks (Cyprus); E. Kastanos, Univ. of Nicosia (Cyprus); K. Hadjigeorgiou, Univ. of Cyprus (Cyprus); C. Pliiris, Univ. of Cyprus (Cyprus) and KIOS Research Ctr. for Intelligent Systems and Networks (Cyprus) |
| 8572 OZ | Integrated fingerprint and high wavenumber confocal Raman spectroscopy for in vivo diagnosis of cervical precancer [8572-41] | S. Duraipandian, W. Zheng, National Univ. of Singapore (Singapore); J. Ng, J. J. H. Low, A. Ilancheran, National Univ. Hospital and National Univ. of Singapore (Singapore); Z. Huang, National Univ. of Singapore (Singapore) |
| 8572 11 | Quantitative and qualitative analysis of fluorescent substances and binary mixtures by use of shifted excitation Raman difference spectroscopy [8572-43] | B. L. Volodin, S. Dolgy, PD-LD Inc. (United States); C. Lieber, H. Wu, W. Yang, BaySpec, Inc. (United States) |
| 8572 12 | Tissue measurement using 1064 nm dispersive Raman spectroscopy [8572-44] | C. A. Lieber, H. Wu, W. Yang, BaySpec, Inc. (United States) |

### SESSION 9  BIO-SENSORS

| 8572 13 | Utilization of fringe projection technique for evaluation of wound dimensions and of healing progress [8572-45] | M. T. Saito, E. M. Yoshimura, Univ. de São Paulo (Brazil); F. F. Palácios, Univ. de Oriente (Cuba); A. C. L. Lino, Instituto Agronómico (Brazil); G. F. Palácios, Univ. de Oriente (Cuba); M. V. P. Sousa, Univ. de São Paulo (Brazil) |
Bloodstain age analysis: toward solid state fluorescent lifetime measurements [8572-46]
K. Guo, N. Zhegalova, S. Achilefu, M. Y. Berezin, Washington Univ. School of Medicine in St. Louis (United States)

Using color intensity projections to visualize air flow in operating theaters with the goal of reducing infections [8572-47]
K. S. Cover, N. van Asperen, J. de Jong, R. M. Verdaasdonk, Vrije Univ. Medical Ctr. (Netherlands)

Label-free biosensor based on long period grating [8572-49]
F. Baldini, F. Chiavaioli, A. Giannetti, M. Brenici, C. Trono, Istituto di Fisica Applicata Nello Carrara, CNR (Italy)

A portable microfluidic-based biophotonic sensor for extracellular H2O2 measurements [8572-50]
V. Koman, G. Suárez, C. Santschi, V. J. Cadarso, J. Brugger, Ecole Polytechnique Fédérale de Lausanne (Switzerland); N. von Moos, V. I. Slaveykova, Institute F. A. Forel, Univ. of Geneva (Switzerland); O. J. F. Martin, Ecole Polytechnique Fédérale de Lausanne (Switzerland)

Glucose measurement in interstitial fluid by microdialysis for the calibration of minimally invasive blood glucose monitoring [8572-3]
D. Li, R. Wang, H. Chong, Y. Liu, K. Xu, Tianjin Univ. (China)

An optimized algorithm of image stitching in the case of a multi-modal probe for monitoring the evolution of scars [8572-51]
R. Kassab, FEMTO-ST Institute, CNRS, Univ. de Franche-Comté (France); S. Treuillet, Lab. Prisme - Univ. d’Orléans (France); F. Marzani, Le2i Lab., CNRS, Univ. de Bourgogne (France); C. Pieralli, J. C. Lapayre, FEMTO-ST Institute, CNRS, Univ. de Franche-Comté (France)

The effect of borate polymer layers on glucose measurement by surface plasmon resonance [8572-54]
D. Li, J. Yang, P. Wu, B. Yang, Tianjin Univ. (China); B. Wang, Y. Lin, Changchun Institute of Applied Chemistry (China); K. Xu, Tianjin Univ. (China)

Raman spectroscopy using time-correlated photon-counting detection [8572-57]
Z. Meng, S. Cheng, G. I. Petrov, J. A. Jo, V. V. Yakovlev, Texas A&M Univ. (United States)

Normalized fluorescence lifetime imaging for tumor identification and margin delineation [8572-23]
A. J. Sherman, A. Papour, S. Bhargava, Z. Taylor, W. S. Grundfest, O. M. Stafsudd, Univ. of California, Los Angeles (United States)

A time-domain diffuse optical/fluorescent tomography using multi-dimensional TCSPC design [8572-11]
Y. Lu, W. Zhang, L. Wu, L. Zhang, F. Gao, Tianjin Univ. (China)

Author Index
Conference Committee

Symposium Chairs

James Fujimoto, Massachusetts Institute of Technology (United States)  
R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Tuan Vo-Dinh, Duke University (United States)  
Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chairs

Anita Mahadevan-Jansen, Vanderbilt University (United States)  
Tuan Vo-Dinh, Duke University (United States)  
Warren S. Grundfest, University of California, Los Angeles (United States)

Session Chairs

1 Functional Imaging I  
Anita Mahadevan-Jansen, Vanderbilt University (United States)

2 Functional Imaging II  
Anuradha Godavarty, Florida International University (United States)  
Warren S. Grundfest, University of California, Los Angeles (United States)

3 Optical Tomography  
Anuradha Godavarty, Florida International University (United States)

4 Optical Coherence Tomography  
Jennifer K. Barton, The University of Arizona (United States)

5 Fluorescence  
Laura Marcu, University of California, Davis (United States)

6 Endoscopy, etc.  
Tuan Vo-Dinh, Duke University (United States)

7 Novel Technologies  
Urs Utzinger, The University of Arizona (United States)
8  Vibrational Spectroscopy
   Wolfgang Petrich, Roche Diagnostics (Germany)

9  Bio-Sensors
   Maurice C. G. Aalders, Universiteit van Amsterdam (Netherlands)
Introduction

This volume continues the publication of advances in biomedical optical and related technologies for surgical applications and assist devices. The technologies presented in this volume represent the state-of-the-art in a field that is becoming increasingly important to patient care. These papers also represent the growth and success of interdisciplinary teams and demonstrate the benefits of interdisciplinary collaboration in the application of new technologies to the solutions of medical problems. Many of the papers in this volume have relied heavily on government funding and support for their development, but the transition to clinical practice requires productive capacity and industrial support. These papers illustrate the need for increased support of translational activities and development of academic, industry, and government partnerships to facilitate translation from proof of principle into clinical practice. Demonstration of feasibility is only the first step in the process of technology development and implementation. Many of the reports in this volume provide initial confirmation or verification of device feasibility. The reader is cautioned that translation of these technologies into clinical practice takes time and funding. However, these studies are an essential step in the process and provide a platform for future development.

Over the years this conference has seen an array of technologies evolve. Investigations presented in this volume represent continued steps in this evolutionary process. This evolution is driven by clinical need and may be limited by technical barriers, insufficient funds, and clinical practice patterns. Regulatory issues and intellectual property rights also influence technology development. The reader is advised to take these factors into account in assessing the impact of the technologies presented in this volume on clinical practice.

We hope the knowledge gained from this volume not only offers useful information for fundamental research and translational studies but also raises more questions than it answers, and thus provides the reader with a basis for future investigations.
