Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
Contents

vii Conference Committee
ix Introduction

SESSION 1 SOLID STATE LIGHTING I

8841 02 Simultaneous color-mixing and collimation within LED package (Invited Paper) [8841-1]
I. Moreno, N. Rodriguez, J. C. Basilio, Univ. Autónoma de Zacatecas (Mexico)

8841 05 Hybrid solid state illuminator [8841-4]
J. Huang, Y. Wang, Delta Electronics, Inc. (Taiwan)

SESSION 2 SOLID STATE LIGHTING II

8841 07 Radiance limits of ceramic phosphors under high excitation fluxes [8841-6]
A. Lenef, J. Kelso, Y. Zheng, M. Tchoul, OSRAM SYLVANIA Inc. (United States)

8841 09 Application of heterogeneous microlenses for solid state lighting [8841-8]
W.-T. Shih, G.-D. Su, National Taiwan Univ. (Taiwan)

SESSION 3 THEORY AND ANALYSIS

8841 0C Polarization fields for understanding polarization aberrations in optical imaging systems (Invited Paper) [8841-11]
J. Sasián, College of Optical Sciences, The Univ. of Arizona (United States)

8841 0D Design of compact fisheye lens with slope-constrained Q-type aspheres [8841-12]
C. Xu, D. Cheng, W. Song, Y. Wang, Q. Wang, Beijing Institute of Technology (China)

8841 0E Analytic formulas of the aspheric terms for convex-plano and plano-convex aspheric lenses [8841-13]
M. Avendaño-Alejo, Univ. Nacional Autónoma de México (Mexico)

SESSION 4 LENS DESIGN AND OPTIMIZATION I

8841 0F Multi-core and GPU accelerated simulation of a radial star target imaged with equivalent f-number circular and Gaussian pupils [8841-14]
A. W. Greynolds, Ruda-Cardinal, Inc. (United States)

8841 0G Man versus machine: a lens design challenge (Invited Paper) [8841-15]
D. C. Dilworth, Optical Systems Design, Inc. (United States); D. Shafer, David Shafer Optical Design (United States)
SESSION 5 LENS DESIGN AND OPTIMIZATION II

8841 0K **Double micro-prism array design for reducing dispersion on prism-based stereo camera system** [8841-19]
W.-S. Sun, P.-Y. Chu, National Central Univ. (Taiwan)

8841 0L **Micro-optical elements for optical wireless applications** [8841-20]
X. Jin, D. Guerrero, R. Klukas, J. F. Holzman, The Univ. of British Columbia (Canada)

8841 0M **Optical architecture of the new generation infrared atmospheric sounder interferometer (IASI-NG)** [8841-22]
C. Luitot, Ctr. National d’Études Spatiales (France); J. Boyadjian, EADS Astrium (France);
C. Buil, Ctr. National d’Études Spatiales (France); F. Pasternak, EADS Astrium (France)

8841 0N **A three-channel miniaturized optical system for multi-resolution imaging** [8841-23]
G. Y. Belay, H. Ottevaere, Y. Meuret, H. Thienpont, Vrije Univ. Brussel (Belgium)

SESSION 6 TESTING AND METHODS I

8841 0O **Internal structure of bokeh image in camera lenses with aspheric surfaces** [8841-24]
V. P. Sivokon, M. D. Thorpe, Raytheon ELCAN Optical Technologies (Canada)

8841 0Q **Backward reflection analysis of transmitting channel of active laser ranging optics** [8841-26]
J. Hong, Samsung Thales Co., Ltd. (Korea, Republic of) and Yonsei Univ. (Korea, Republic of);
H. S. Koh, Agency for Defense Development (Korea, Republic of)

SESSION 7 TESTING AND METHODS II

8841 0R **Further results in measuring water ice buildup on optical components in cryogenic vacuum chambers** [8841-32]
T. M. Moeller, L. M. Smith, F. G. Collins, The Univ. of Tennessee Space Institute (United States);
J. M. Labello, Arnold Engineering Development Ctr. (United States); J. P. Rogers, The Univ. of Tennessee Space Institute (United States);
H. S. Lowry, D. H. Crider, Arnold Engineering Development Ctr. (United States)

Yongtian Wang, Beijing Institute of Technology (China)
Introduction

Our conference on Current Developments in Lens Design and Optical Engineering accepted 51 papers of which 42 were presented at the conference over a period of two days, including 17 poster papers. We had three invited papers on solid-state lighting, polarization aberrations, and man versus machine. The papers were organized in 7 sessions that ranged from solid-state lighting, theory and analysis, lens design and optimization, and testing and methods. A total of 37 papers are presented in these Proceedings. There are 10 papers from Taiwan, 8 from the United States, 4 each from Mexico and Japan, 3 from China, 2 from Canada, and one each from Republic of Korea, France, Czech Republic, Belgium, Russian Federation, and Ukraine.
