Front Matter: Volume 8895
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
Contents

v Conference Committee

SESSION 1  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING I

8895 02  Simulation of complex visibilities in synthetic aperture imaging radiometry with the aid of GPU (Invited Paper) [8895-1]
E. Anterrieu, IRAP, CNRS, Univ. de Toulouse (France); F. Cabot, CESBIO, CNRS, Univ. de Toulouse (France)

8895 04  Discrete cosine transform and hash functions toward implementing a (robust-fragile) watermarking scheme [8895-3]
S. Al-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates); A. Kunhu, Khalifa Univ. of Science, Technology and Research (United Arab Emirates)

SESSION 2  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING II

8895 06  Creation of the BMA ensemble for SST using a parallel processing technique [8895-6]
K. Kim, Y.-W. Lee, Pukyong National Univ. (Korea, Republic of)

8895 07  An improved maximum simplex volume algorithm to unmixing hyperspectral data [8895-7]
H. Qu, Harbin Institute of Technology (China) and Liaoning Technical Univ. (China); B. Huang, Univ. of Wisconsin-Madison (United States); J. Zhang, Y. Zhang, Harbin Institute of Technology (China)

8895 09  Acceleration of vertex component analysis for spectral unmixing with CUDA [8895-9]
S.-C. Wei, Tamkang Univ. (Taiwan); B. Huang, Univ. of Wisconsin-Madison (United States); A. Plaza, Univ. de Extremadura (Spain)

8895 0A  Research on optimization of imaging parameters of optical remote sensing camera based on ground objects BRDF [8895-17]
F. Li, H. He, Y. Bao, K. Xing, Z. Zhang, Beijing Institute of Space Mechanics and Electricity (China)

SESSION 3  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING III

8895 0B  Parallel method for sparse semisupervised hyperspectral unmixing (Invited Paper) [8895-10]
J. M. P. Nascimento, Instituto de Telecomunicações (Portugal) and Instituto Superior de Engenharia de Lisboa (Portugal); J. M. Rodríguez Alves, Instituto de Telecomunicações (Portugal); A. Plaza, Univ. de Extremadura (Spain); V. Silva, Instituto de Telecomunicações (Portugal) and Univ. de Coimbra (Portugal); J. M. Bioucas-Dias, Instituto de Telecomunicações (Portugal) and Univ. Técnica de Lisboa (Portugal)
SESSION 4  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING IV

8895 0G  GPU accelerated FDTD method for investigation on the EM scattering from 1-D large scale rough surface under low grazing incidence [8895-14]
C.-G. Jia, L.-X. Guo, P. Yang, Xidian Univ. (China)

8895 0H  GPU acceleration experience with RRTMG long wave radiation model [8895-15]
E. Price, J. Mielikainen, B. Huang, H.-L. A. Huang, Univ. of Wisconsin-Madison (United States);
T. Lee, NASA Headquarters (United States)

SESSION 5  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING V

8895 0K  A 64-bit orthorectification algorithm using fixed-point arithmetic [8895-21]
J. C. French, Univ. of Dayton (United States) and Univ. of Dayton Research Institute (United States);
E. J. Balster, Univ. of Dayton (United States); W. F. Turri, Univ. of Dayton Research Institute (United States)

8895 0L  GPU-based ray tracing algorithm for fast coverage zone prediction under urban microcellular environment [8895-22]
Z.-Y. Liu, L.-X. Guo, C.-G. Jia, Xidian Univ. (China)

SESSION 6  HIGH-PERFORMANCE COMPUTING IN REMOTE SENSING VI

8895 0N  Parallel acceleration of diffuse scattering model for indoor radio prediction by CUDA [8895-25]
X. Meng, L.-X. Guo, W. Tao, Xidian Univ. (China)

Author Index
Conference Committee

Symposium Chair
Charles R. Bostater Jr., Florida Institute of Technology (United States)

Symposium Cochair
Ulrich Michel, Pädagogische Hochschule Heidelberg (Germany)

Conference Chairs
Bormin Huang, University of Wisconsin-Madison (United States)
Antonio J. Plaza, Universidad de Extremadura (Spain)
Zhensen Wu, Xidian University (China)

Conference Programme Committee
Saeed H. Al-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
Adnan Al Rais, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
Philip E. Ardanuy, Raytheon Intelligence & Information Systems (United States)
Chein-I Chang, University of Maryland, Baltimore County (United States)
Yang-Lang Chang, National Taipei University of Technology (Taiwan)
David J. Crain, GeoMetWatch Corporation (United States)
Qian Du, Mississippi State University (United States)
Yong Fang, Northwest A&F University (China)
Samuel D. Gasster, The Aerospace Corporation (United States)
Mitch Goldberg, National Oceanic and Atmospheric Administration (United States)
Allen H.-L. Huang, University of Wisconsin-Madison (United States)
Tung-Ju Hsieh, National Taipei University of Technology (Taiwan)
Dieter Just, European Organisation for the Exploitation of Meteorological Satellites (Germany)
Roger L. King, Mississippi State University (United States)
Chulhee Lee, Yonsei University (Korea, Republic of)
Tsengdar J. Lee, NASA Headquarters (United States)
Sebastian Lopez Suarez, Universidad de Las Palmas de Gran Canaria (Spain)
Prashanth Reddy Marpu, Masdar Institute of Science & Technology (United Arab Emirates)
Jarno Mielikainen, University of Eastern Finland (United States)
J. Montgomery, Georgetown University (United States)
Abel Paz, Universidad de Extremadura (Spain)
Jordi Portell de Mora, Universitat de Barcelona (Spain)
Jeffery J. Puschell, Raytheon Space & Airborne Systems (United States)
Shen-En Qian, Canadian Space Agency (Canada)
Stefan A. Robila, Montclair State University (United States)
Luc Rochette, LR Tech (Canada)
Joan Serra-Sagrista, Universitat Autònoma de Barcelona (Spain)
Roger W. Saunders, Met Office (United Kingdom)
Yuliya Tarabalka, University of Iceland (Iceland)
Carole Thiebaut, Centre National d’Études Spatiales (France)
Miguel Velez-Reyes, The University of Texas at El Paso (United States)
Shih-Chieh Wei, Tamkang University (Taiwan)
Ye Zhang, Harbin Institute of Technology (China)

Session Chairs

1  High-Performance Computing in Remote Sensing I  
   Bormin Huang, University of Wisconsin-Madison (United States)

2  High-Performance Computing in Remote Sensing II  
   Antonio J. Plaza, Universidad de Extremadura (Spain)

3  High-Performance Computing in Remote Sensing III  
   Zhensen Wu, Xidian University (China)

4  High-Performance Computing in Remote Sensing IV  
   Jarno Mielikainen, University of Wisconsin-Madison (United States)

5  High-Performance Computing in Remote Sensing V  
   Li-xin Guo, Xidian University (China)

6  High-Performance Computing in Remote Sensing VI  
   Saeed H. Al-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
