Saratov Fall Meeting 2013

Optical Technologies in Biophysics and Medicine XV; and Laser Physics and Photonics XV

Elina A. Genina
Vladimir L. Derbov
Igor Meglinski
Valery V. Tuchin
Editors

24-28 September 2013
Saratov, Russian Federation

Organized by
N.G. Chernyshevsky Saratov State University (Russian Federation) • Institute of Precision Mechanics and Control, Russian Academy of Sciences (Russian Federation) • Research-Educational Institute of Optics and Biophotonics at Saratov State University (Russian Federation) • Research-Educational Center of Nonlinear Dynamics & Biophysics of CRDF and Ministry of Education and Science of RF (REC-006) (Russian Federation) • International Research-Educational Center of Optical Technologies for Industry and Medicine “Photonics” at Saratov State University (Russian Federation) • Volga Regional Center of New Information Technologies (Russian Federation) • Saratov State Medical University (Russian Federation) • University of Oulu (Finland) • SPIE Student Chapter of Saratov State University • OSA Student Chapter of Saratov State University

In cooperation with
Academy of Natural Sciences, Saratov Regional Division (Russian Federation) • Russian Society for Photobiology (Russian Federation) • Saratov Science Center of the Russian Academy of Sciences (Russian Federation) Biophotonics4Life (BP4L) Worldwide Consortium • Biomedical Photonics Committee of Chinese Optical Society (China)

Sponsored by
Russian Foundation for Basic Research (Russian Federation) • Russian Academy of Sciences (Russian Federation) SPE “Nanostructured Glass Technology” Ltd. (Russian Federation) • Russian Technology Platform “The Medicine of the Future”

xiii Introduction

OPTICAL DIAGNOSTICS

9031 02 To the problem of stiffness-contrast quantification in the correlation-stability approach to OCT elastography (Invited Paper) [9031-8]

9031 03 The optical origin of the PPG signal (Invited Paper) [9031-20]
I. Fine, Elfi-Tech Ltd. (Israel)

9031 04 Spatial resolution analysis for time-domain diffuse optical tomography based on a perturbation model [9031-67]
A. B. Konovalov, V. V. Vlasov, Russian Federal Nuclear Ctr. - Zababakhin Institute of Applied Physics (Russian Federation)

9031 05 Research and development of a differential laser polarimeter to measure the glucose concentration in turbid media [9031-18]
G. A. Cherevatenko, E. T. Aksenov, St. Petersburg State Polytechnical Univ. (Russian Federation)

9031 06 Demonstration of skull bones mobility using optical methods: practical importance in medicine [9031-21]
A. V. Zakharov, Noospheric Health Ctr. (Russian Federation); V. R. Okushko, Shevchenko State Univ. of Prichnestrivie (Moldova); S. A. Vlurin, Space Research Institute (Russian Federation); V. V. Mozyychuk, Noospheric Health Ctr. (Russian Federation); A. A. Petrov, Avroraclinic (Russian Federation); D. E. Suetenkov, Saratov State Medical Univ. (Russian Federation)

9031 07 In-vivo study of blood flow in capillaries using μPIV method [9031-40]
M. A. Kurochkin, I. V. Fedosov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); V. V. Tuchin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation), Institute of Precise Mechanics and Control (Russian Federation), and Univ. of Oulu (Finland)

9031 08 Skin blood flow as the first time derivative of the temperature: spectral approach to the blood flow estimation in hands [9031-69]
A. A. Sagaidachnyi, D. A. Usanov, A. V. Skripal, A. V. Fomin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)
Study of grows of spontaneous malignant tumors using LASCA microscopy [9031-66]
A. Golova, V. Laskavy, Saratov Scientific and Research Veterinary Institute (Russian Federation); O. Ulianova, Saratov State Agrarian Univ. (Russian Federation), Saratov Scientific and Research Veterinary Institute (Russian Federation), and N.G. Chernyshevsky Saratov State Univ. (Russian Federation); T. Polyanina, N. Bogoutdinov, Saratov Scientific and Research Veterinary Institute (Russian Federation); V. Feodorova, Saratov Scientific and Research Veterinary Institute (Russian Federation) and Saratov State Agrarian Univ. (Russian Federation); S. Ulyanov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)

TISSUE OPTICAL CLEARING IN MEDICAL DIAGNOSTICS

Optical tweezers-assisted measurements of elastic light scattering (Invited Paper) [9031-31]
M. Kinnunen, J. Tuorila, T. Haapalainen, Univ. of Oulu (Finland); A. Karmenyan, National Yang-Ming Univ. (Taiwan); V. Tuchin, Univ. of Oulu (Finland) and N.G. Chernyshevsky Saratov State Univ. (Russian Federation); R. Myllylä, Univ. of Oulu (Finland)

Simple numerical model of OCT signal evolution due to the diffusion of an optical clearing agent [9031-12]
N. A. Trunina, V. L. Derbov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); V. V. Tuchin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation), Institute of Precise Mechanics and Control (Russian Federation), and Univ. of Oulu (Finland)

Optical clearing of human skin for the enhancement of optical imaging of proximal interphalangeal joints [9031-9]
E. A. Kolesnikova, A. S. Kolesnikov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); U. Zabarylo, O. Minet, Charité – Universitätsmedizin Berlin (Germany); E. A. Genina, A. N. Bashkatov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); V. V. Tuchin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation), Institute of Precise Mechanics and Control (Russian Federation), and Univ. of Oulu (Finland)

In-vitro terahertz spectroscopy of rat skin under the action of dehydrating agents [9031-63]
A. S. Kolesnikov, E. A. Kolesnikova, D. K. Tuchina, A. G. Terentyuk, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); M. Nazarov, Institute of Laser and Information Technologies (Russian Federation); A. A. Skaptsov, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); A. P. Shkurinov, Lomonosov Moscow State Univ. (Russian Federation); V. V. Tuchin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation), Univ. of Oulu (Finland), and Institute of Precise Mechanics and Control (Russian Federation)

TISSUE OPTICS

Optical properties of parietal peritoneum in the spectral range 350-2500 nm [9031-46]
M. D. Kozintseva, A. N. Bashkatov, V. I. Kochubey, E. A. Genina, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); S. Yu. Gorodkov, Saratov State Medical Univ. (Russian Federation); D. A. Morozov, Moscow State Scientific-Research Institute of Pediatrics and Childrens Surgery (Russian Federation); V. V. Tuchin, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)
Assessment of neuroglial relationships under photodynamic treatment using fluorescent visualization of giant axons in crayfish ventral nerve cord [9031-5]
E. Duz, M. S. Kolosov, Southern Federal Univ. (Russian Federation)

The impact of laser radiation on the photodissociation of carboxyhemoglobin in blood [9031-30]
S. A. Mamilov, S. S. Esman, D. V. Veilgodski, Institute of Applied Problems of Physics and Biophysics (Ukraine); M. M. Asimov, Institute of Physics (Belarus); E. G. Borisova, A. I. Gisbrecht, Institute of Electronics (Bulgaria)

Nanostructure of biocompatible titania/hydroxyapatite coatings [9031-1]

Mechanical properties of adhesive system with a silver nanoparticulate filler: an experimental study [9031-58]
N. O. Bessudnova, D. I. Bilenko, S. B. Venig, O. A. Shlyapnikova, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)

A comparative evaluation of mechanical properties of nanofibrous materials [9031-62]
G. P. Lyubun, N. O. Bessudnova, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)

Quenching of the luminescence of nanomarkers bound to proteins by heavy metals [9031-53]
J. Konyukhova, N.G. Chernyshevsky Saratov State Univ. (Russian Federation); A. Melnikov, G. Melnikov, E. Naumova, Yu. A. Gagarin Saratov State Technical Univ. (Russian Federation); A. Skaptsov, E. Volkova, V. Kochubey, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)

ZnCdS nanoparticles as nanobiosensors to determine denaturation of tissue [9031-65]
J. Konyukhova, A. Skaptsov, E. Volkova, V. Galushka, V. Kochubey, N.G. Chernyshevsky Saratov State Univ. (Russian Federation)

Microscopic mechanism of the laser induced fluorescence from the biomolecules coupled on the surface of the core/shell quantum dots [9031-24]
L. Xu, Y. Wen, X. Feng, J. Duan, Yunnan Normal Univ. (China); L. Yin, Kaiyuan First Secondary School (China); Y. Jiang, Yunnan Medical Univ. (China)

The quantum theory analysis of electrical and thermal effects at core/shell quantum dots and laser interactions [9031-22]
Y. Wen, L. Xu, X. Feng, J. Duan, Yunnan Normal Univ. (China); M. Ye, First Secondary School, Kunming (China); L. Yin, Kaiyuan First Secondary School (China); Y. Jiang, Yunnan Medical Univ. (China)

Introduction

The 1st International Symposium on Optics and Biophotonics (Saratov Fall Meeting (SFM-13)) was held 24–28 September 2013 in Saratov, Russia, with over 500 participants from Russia, USA, Canada, Europe, Africa, Asia, and Pacific Ocean countries. The symposium covered a wide range of modern problems of fundamental and applied optics, laser physics, photonics, and biomedical optics.

In the framework of the Symposium, the following Conferences were organized:

- Optical Technologies in Biophysics and Medicine XV
  Elina A. Genina, Igor Meglinski, and Valery V. Tuchin, Chairs
- Laser Physics and Photonics XV
  Vladimir L. Derbov, Chair
- Spectroscopy and Molecular Modeling XIV
  Valentin I. Berezin, Lev M. Babkov, and Michael D. Elkin, Chairs
- Nanobiophotonics IX
  Nikolai G. Khlebtsov, Chair
- Nonlinear Dynamics and Computational Biophysics IV
  Vadim S. Anishchenko, Chair
- Internet Biophotonics VI
  Alexey N. Bashkatov and Valery V. Tuchin, Chairs
- Microscopic and Low-Coherence Methods in Biomedical and NonBiomedical Applications VI
  Kirill Larin, Chair
- Low-dimensional structures III
  Olga Glukhova, Chair.

The main focus was on the discussion of fundamentals and general approaches of description of coherent, low-coherent, polarized, spatially and temporally modulated light interactions with inhomogeneous absorbing media, photonic crystals, optical biopsy, tissue phantoms, and various types of tissues’ properties both in vitro and in vivo. Such effects as static and dynamic light scattering, Doppler, photoacoustic and photothermal interactions, mechanical stress, photodynamic effect, etc. were considered. On this basis, the variety of laser and optical technologies for medical diagnostics, therapy, surgery, and light dosimetry, as well as for spectroscopy of random and ordered media were presented. New fundamental phenomena in quantum optics together with novel laser and fiber optic technologies were presented, as well as photonics of micro- and nanostructures.

SFM-13 was organized as the morning plenary sessions, afternoon lecture and oral sessions, evening poster presentations, and internet discussion. Plenary lectures were presented by leading experts in different fields of science and listened with a great interest and discussed by audience. Original oral reports and posters were
presented by junior scientists under supervising of leaders of well-known scientific groups.

Plenary and Invited lectures, oral and poster presentations covered a wide area of tissue optics, spectroscopy and imaging, controlling of optical properties of tissues, as well as biophysical and photo-chemical aspects of photo and laser therapy.

The traditional specific feature of the Saratov Fall Meetings is the Internet Session and one-day online discussion. In 2013, this session has included two plenary lectures, 10 invited lectures and 27 internet reports.

The abstracts by the participants from USA, Russia, United Kingdom, Germany, Portugal, Finland, Estonia, Israel, New Zealand, etc., located at the meeting website: http://sfm.eventry.org/symposium2013/internet, were available during the meeting and will be available for a whole year until the next meeting.

A great number of the materials presented are the result of collaboration between research groups from different countries supported by international scientific programs such as PHOTONICS4LIFE, TEKES, SCOPUS, Chinese Optical Society, and others.

This volume includes papers presented at the Conferences on Optical Technologies in Biophysics and Medicine XV and Laser Physics and Photonics XV. The editors thank all of the authors for their contributions to SFM-13, especially to internet lecturers for their exciting presentations.

The organizers of SFM-13 are grateful to all the sponsoring organizations and programs that efficiently supported this meeting, especially to: SPIE, The Optical Society (OSA); Russian Foundation for Basic Research; Russian Academy of Sciences; PHOTONICS4LIFE of FP7-ICT-2007-2 (No. 224014, 2008-2013); SPE "Nanostructured Glass Technology" Ltd. (Russia), and Russian Technology Platform “The Medicine of the Future.”
