vii Conference Committee
ix Introduction

SESSION 1 OPTICAL TELECOMMUNICATION TECHNOLOGIES AND SYSTEMS

9156 02 Electronic compensation of nonlinearly interacting signals in fiber-optical transmission lines with application of nonlinear phase filters [9156-9]
V. A. Burdin, I. V. Grigorov, E. L. Tsveybelman, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

9156 03 Simulation of few-mode optical signal propagation over multimode fiber link under mode-field matched center-launching technique [9156-15]
A. V. Bourdine, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

9156 04 Optical-domain mode coupling compensation for mode division multiplexing systems [9156-19]
V. S. Lyubopytov, A. R. Gizatulin, A. Z. Tlyavlin, A. Kh. Sultanov, Ufa State Aviation Technical Univ. (Russian Federation)

9156 05 Interaction of PMD and Kerr-nonlinearities and its impact on WDM-signal transmission [9156-20]
A. K. Sultanov, V. K. Bagmanov, R. V. Kutluyarov, Ufa State Aviation Technical Univ. (Russian Federation)

9156 06 Calculation of the basic parameters and of the construction of demultiplexers CWDM based on the angular dispersion effect [9156-28]
M. S. Bylina, S. F. Glagolev, A. S. Golubev, The Bonch-Bruevich Saint-Petersburg State Univ. of Telecommunications (Russian Federation)

SESSION 2 PASSIVE AND ACTIVE COMPONENTS OF OPTICAL TELECOMMUNICATION

9156 07 Universal method for calculating the open dielectric waveguides with arbitrary cross-section [9156-3]
G. S. Malyshev, A. S. Raevskii, S. B. Raevskii, A. A. Titarenko, Nizhny Novgorod State Technical Univ. (Russian Federation)

9156 08 Theoretical and experimental study of aperture size effects on the polarization sensitivity of near-field microscopy fiber-optic probes [9156-5]

9156 09 Sharp focusing by means of binary relief at the end of the optical fiber [9156-6]
D. A. Savelyev, S. N. Khonina, Image Processing Systems Institute (Russian Federation)
Investigation of focusing of the fundamental linearly polarized mode using microrelief on the end of an optical fiber [9156-7]
A. V. Karsakov, Samara State Aerospace Univ. (Russian Federation); S. N. Khonina, Samara State Aerospace Univ. (Russian Federation) and Image Processing Systems Institute (Russian Federation)

Intellectual parachute and balloon systems based on fiber optic technologies [9156-11]

Modeling of splice of long non-identical optical fibers with precision transverse misalignment [9156-16]
A. V. Bourdine, A. E. Zhukov, V. V. Kotorov, S. A. Serikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

Diffraction of Bessel laser beams on a birefringent object [9156-18]
O. V. Zoteeva, S. N. Khonina, Image Processing Systems Institute (Russian Federation)

Based on Gaussian approximation solution for arbitrary order guided mode of optical fiber with constant curvature [9156-22]
V. A. Burdin, A. V. Bourdine, D. E. Praporshchikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

Birefringence of standard step-index optical fiber with waveguide cladding microcrack [9156-23]
V. A. Burdin, E. V. Dmitriev, D. E. Praporshchikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

About the parametric synthesis of an optical fiber using a dispersion characteristic [9156-33]
V. A. Malakhov, G. S. Malyshev, A. S. Raevskii, Nizhny Novgorod State Technical Univ. (Russian Federation)

Variable multimode models of complex dynamic systems [9156-10]
V. V. Afanasiev, M. P. Danilaev, S. S. Loginov, Y. E. Pol'skii, Kazan National Research Technical Univ. (Russian Federation)

Filter designing for image processing based on multidimensional linear extrapolation [9156-36]

Coding of an optical signal by a superposition of spheroidal functions for undistorted transmission of information in the lens system [9156-8]
M. S. Kirilenko, Samara State Aerospace Univ. (Russian Federation); S. N. Khonina, Samara State Aerospace Univ. (Russian Federation) and Image Processing Systems Institute (Russian Federation)
Principles of multiple frequencies characterization of stimulated Mandelstam-Brillouin gain spectrum [9156-13]
O. G. Morozov, A. A. Talipov, G. A. Morozov, Kazan National Research Technical Univ. (Russian Federation)

Diffraction analysis of focusing optical elements [9156-29]
P. G. Serafimovich, Image Processing Systems Institute (Russian Federation)

Theory of symmetrical two-frequency signals and key aspects of its application [9156-35]

SESSION 4 OPTICAL NETWORK MAINTENANCE, CONTROL AND RESTORATION

Instantaneous microwave frequency measurement with monitoring of system temperature [9156-14]

Method of measurement of optical cable stiffness at low temperatures [9156-17]
V. A. Burdin, I. N. Alekhin, T. G. Nikulina, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

Method of excess fiber length estimating based on low subzero temperature climatic test [9156-21]
V. A. Burdin, M. A. Vazhdaev, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

Algorithm for predictive control implementation on fiber optic transmission lines [9156-26]
V. A. Andreev, V. A. Burdin, A. A. Voronkov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)

Effect of analog to digital conversion of the backscatter signal on OTDRs parameters [9156-27]
S. F. Glagolev, I. A. Zuev, The Bonch-Bruevich Saint-Petersburg State Univ. of Telecommunications (Russian Federation)

SESSION 5 PROBLEMS OF TRAINING ON OPTICAL TELECOMMUNICATION SCIENCE TOPICS

Microwave signal processing in two-frequency domain for ROF systems implementation: training course [9156-12]
O. G. Morozov, G. A. Morozov, Kazan National Research Technical Univ. (Russian Federation)

Author Index
Conference Committee

Conference Chairs

Vladimir A. Andreev, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
Vladimir A. Burdin, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
Albert H. Sultanov, Ufa State Aviation Technical University (Russian Federation)
Oleg G. Morozov, Kazan National Research Technical University (Russian Federation)

Conference Program Committee

R. A. Badamshin, Ufa State Aviation Technical University (Russian Federation)
V. Ch. Bagmanov, Ufa State Aviation Technical University (Russian Federation)
E. N. Gordeev, UNI (Russian Federation)
O. V. Goryachkin, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
G. I. Il’in, Kazan National Research Technical University — Kazan Aircraft Institute (Russian Federation)
V. G. Kartashevski, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
N. L. Kazansky, Image Processing Systems Institute (Russian Federation)
G. A. Morozov, Kazan National Research Technical University (Russian Federation)
A. F. Nadeev, Kazan National Research Technical University — Kazan Aircraft Institute (Russian Federation)
N. Neumann, Technische Universität Dresden (Germany)
O. V. Osipov, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
D. Plettemeier, Technische Universität Dresden (Germany)
P. Rocca, University degli Studi di Trento (Italy)
A. I. Salikhov, Ufa State Aviation Technical University (Russian Federation)
A. A. Vasilets, Kazan National Research Technical University (Russian Federation)
I. L. Vinogradova, Ufa State Aviation Technical University (Russian Federation)
T. Y. Yakubov, "Poligon" Ltd. (Russian Federation)
Y. B. Zubarev, Corresponding Member of the Russian Academy of Sciences (Russian Federation)
Introduction

This volume contains a selection of reports presented at the 13th International Conference on Optical Technologies for Telecommunications. The conference was held at Povolzhskiy State University of Telecommunications and Informatics in Samara, Russian Federation, on 27 – 29 November 2013.

The conference covered a large range of problems in optical technologies in telecommunications. We have no doubt that the proceedings from this conference will be helpful for both scientists and specialists working in the fields of telecommunication technologies.
