Organic Light Emitting Materials and Devices XVIII

Franky So
Editor

17–20 August 2014
San Diego, California, United States

Sponsored and Published by
SPIE
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X
ISBN: 9781628412109

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:
- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
## Contents

9183 25  High barrier properties of transparent thin-film encapsulations for top-emission organic light-emitting diodes [9183-77]

9183 26  Extremely high efficiency phosphorescent organic light-emitting diodes with horizontal emitting dipoles (Organic Photonics + Electronics Best Student Paper Award) [9183-78]

9183 2C  To enhance light extraction of OLED devices by multi-optic layers including a micro lens array [9183-84]

9183 2G  Virtual screening for OLED materials [9183-88]

9183 2I  Sensitized fluorescence in organic light emitting diodes [9183-90]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Zakya H. Kafafi, National Science Foundation, ret (United States)

Conference Chair

Franky So, University of Florida (United States)

Conference Co-chair

Chihaya Adachi, Kyushu University (Japan)

Conference Program Committee

Malte C. Gather, Technische Universität Dresden (Germany)
Hisao Ishii, Chiba University (Japan)
Hironori Kaji, Kyoto University (Japan)
Jang-Joo Kim, Seoul National University (Korea, Republic of)
Jaewon Lee, LG Display (Korea, Republic of)
Mathew K. Mathai, Apple Inc. (United States)
Jongwook Park, The Catholic University of Korea (Korea, Republic of)
Yong-Jin Pu, Yamagata University (Japan)
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
Joseph Shinar, Iowa State University (United States)

Session Chairs

1. Novel Materials I
   - Mathew K. Mathai, Apple Inc. (United States)
   - Jang-Joo Kim, Seoul National University (Korea, Republic of)

2. Novel Materials II
   - Mathew K. Mathai, Apple Inc. (United States)
   - Jang-Joo Kim, Seoul National University (Korea, Republic of)

3. Mechanisms and Physics I
   - Russell J. Holmes, University of Minnesota, Twin Cities (United States)
   - Jongwook Park, The Catholic University of Korea (Korea, Republic of)

4. Mechanisms and Physics II
   - Russell J. Holmes, University of Minnesota, Twin Cities (United States)
   - Jongwook Park, The Catholic University of Korea (Korea, Republic of)
5 Mechanisms and Physics III
Malte C. Gather, University of St. Andrews (United Kingdom)
Dongge Ma, Changchun Institute of Applied Chemistry (China)

6 Mechanisms and Physics IV
Malte C. Gather, University of St. Andrews (United Kingdom)
Dongge Ma, Changchun Institute of Applied Chemistry (China)

7 Solution-Processed OLEDs I
Daisuke Yokoyama, Yamagata University (Japan)
Hany Aziz, University of Waterloo (Canada)

8 Solution-Processed OLEDs II
Daisuke Yokoyama, Yamagata University (Japan)
Hany Aziz, University of Waterloo (Canada)

9 Novel Applications
Jian Li, Arizona State University (United States)

10 Solid State Lighting I
Jian Li, Arizona State University (United States)

11 Solid State Lighting II
Noel C. Giebink, The Pennsylvania State University (United States)
Tae-Woo Lee, Pohang University of Science and Technology (Korea, Republic of)

12 Solid State Lighting III
Noel C. Giebink, The Pennsylvania State University (United States)
Tae-Woo Lee, Pohang University of Science and Technology (Korea, Republic of)
