Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Proc. of SPIE Vol. 9378  937801-5
Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia (United Kingdom)
Alexei L. Glebov, OptiGrate Corporation (United States)

Symposium Co-chairs

Jean-Emmanuel Broquin, IMEP-LAHC (France)
Shibin Jiang, AdValue Photonics, Inc. (United States)

Program Track Chair

Zameer U. Hasan, Temple University (United States)

Conference Chairs

Selim M. Shahriar, Northwestern University (United States)
Jacob Scheuer, Tel Aviv University (Israel)

Conference Program Committee

Tony Abi-Salloum, Widener University (United States)
Shanhui Fan, Stanford University (United States)
Daniel Joseph Gauthier, Duke University (United States)
Kohzo Hakuta, The University of Electro-Communications (Japan)
Ortwin Hess, Imperial College London (United Kingdom)
John C. Howell, University of Rochester (United States)
Jacob B. Khurgin, Johns Hopkins University (United States)
Uriel Levy, The Hebrew University of Jerusalem (Israel)
Frank A. Narducci, Naval Air Systems Command (United States)
Irina Novikova, The College of William & Mary (United States)
Gour S. Pati, Delaware State University (United States)
Stefania Residori, Institut Non Linéaire de Nice Sophia Antipolis (France)
Yuri Rostovtsev, University of North Texas (United States)
David D. Smith, NASA Marshall Space Flight Center (United States)
Yanhong Xiao, Fudan University (China)

Session Chairs

1 Slow Light: Waveguides and Resonators
Gour S. Pati, Delaware State University (United States)
2 Precision Metrology: CPT-based Clocks and Cooled Molecular Ions  
Yannick Dumeige, Ecole Nationale Supérieure des Sciences Appliquées et de Technologie (France)

3 Slow Light: Optimization and Application of Delay  
Jacob Scheuer, Tel Aviv University (Israel)

4 Fast Light: Generation, Application, and Comparison with Slow Light  
David D. Smith, NASA Marshall Space Flight Center (United States)

5 Precision Metrology Using Fast Light: Gyroscopy and Gravitational Wave Detection  
Robert W. Boyd, University of Ottawa (Canada)

6 Slow Light: Quantum Information  
Eugeniy E. Mikhailov, The College of William & Mary (United States)

7 Precision Metrology: Spin Squeezing, Optical Squeezing, and Photon Correlation Interferometry  
Elizabeth Donley, National Institute of Standards and Technology (United States)

8 Slow Light: Non-Linear Optics and Photon Drag  
John C. Howell, University of Rochester (United States)

9 Precision Metrology: Sensing with NV Diamond Color Centers  
Yanhong Xiao, Fudan University (China)

10 Slow Light: Novel Effects and New Directions  
Susanne F. Yelin, University of Connecticut (United States)

11 Slow Light: New Platforms and Systems  
Jacob B. Khurgin, Johns Hopkins University (United States)

12 Slow Light: Plasmonics and Metamaterials  
Jesper Moerk, Technical University of Denmark (Denmark)

13 Precision Metrology: Coupled Resonator Gyroscopes and Other Sensors  
Uriel Levy, The Hebrew University of Jerusalem (Israel)

14 Precision Metrology: Atomic Interferometry  
Selim M. Shahriar, Northwestern University (United States)

15 Precision Metrology: Optical Clock and Frequency Combs  
Charles Sackett, University of Virginia (United States)
16  Precision Metrology: Matter Wave Clock, Collective State Clock, and Other Developments

John H. Burke, Air Force Research Laboratory (United States)
