The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

vii Conference Committee

ix Introduction

SESSION 1 ISR: VISION, MISSION, AND TACTICS

9460 03 Hybrid consensus-based formation control of UAVs [9460-2]

SESSION 2 ISR: PASSIVE AND ACTIVE SENSING

9460 06 Results from an experiment that collected visible-light polarization data using unresolved imagery for classification of geosynchronous satellites [9460-5]

9460 07 Laser links for mobile airborne nodes [9460-6]

9460 08 Small SWAP 3D imaging flash ladar for small tactical unmanned air systems [9460-7]

9460 09 EM modeling of far-field radiation patterns for antennas on the GMA-TT UAV [9460-8]

SESSION 3 ISR: IMAGE FUSION/ENHANCEMENT

9460 0B Fusion of video and radar comparison to 3D ladar for activity recognition [9460-10]

9460 0C Real-time technology for enhancing long-range imagery [9460-11]

9460 0D Characterization of UAV hover patterns in support of super resolution research [9460-12]

SESSION 4 ISR: IMAGE PROCESSING AND TRACKING

9460 0E Aerial video mosaicking using binary feature tracking [9460-13]

9460 0F Background image understanding and adaptive imaging for vehicle tracking [9460-14]

9460 0G Enhanced performance for the interacting multiple model estimator with integrated multiple filters [9460-15]
### SESSION 5    ISR: CHANGE DETECTION

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair
Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Symposium Co-chair
David A. Logan, BAE Systems (United States)

Conference Chair
Daniel J. Henry, Rockwell Collins, Inc. (United States)

Conference Co-chairs
Gregory J. Gosian, L-3 Communications (United States)
Davis A. Lange, UTC Aerospace Systems (United States)
Dale Linne von Berg, U.S. Naval Research Laboratory (United States)
Thomas J. Walls, U.S. Naval Research Laboratory (United States)
Darrell L. Young, Raytheon Intelligence & Information Systems (United States)

Session Chairs
1 ISR: Vision, Mission, and Tactics
   Dale Linne von Berg, U.S. Naval Research Laboratory (United States)

2 ISR: Passive and Active Sensing
   Thomas J. Walls, U.S. Naval Research Laboratory (United States)

3 ISR: Image Fusion/Enhancement
   Davis A. Lange, UTC Aerospace Systems (United States)

4 ISR: Image Processing and Tracking
   Daniel J. Henry, Rockwell Collins, Inc. (United States)

5 ISR: Change Detection
   Daniel J. Henry, Rockwell Collins, Inc. (United States)

6 ISR: Exploitation
   Darrell L. Young, Raytheon Intelligence & Information Systems (United States)
ISR: Image Sequences/Full Motion Video

Darrell L. Young, Raytheon Intelligence & Information Systems
(United States)
Introduction

This year’s conference featured a wide range of papers related to Airborne ISR Systems and Applications. The conference was broken into multiple sessions that addressed several different parts of the ISR TCPED image chain (Tasking, Capture, Processing, Exploitation, and Dissemination):

1. Vision, Mission & Tactics
2. Passive and Active Sensing
3. Image Fusion/Enhancement
4. Image Processing and Tracking
5. Change Detection
6. Exploitation
7. Image Sequences/Full Motion Video

I would like to thank all the authors for their efforts to make our conference such a success. Their efforts to write and present their papers are greatly appreciated. Their innovations in this exciting field make our conference better each year, and I look forward to the 2016 conference to see what additional advances have been made in these areas, as well as the introduction of new technologies that have been developed.

See you at the meeting next year.
