The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781628417104

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

POSTER SESSION

9544 2R  Hybrid plasmonic nanosandwich structures [9544-95]

9544 2S  Adjustment characteristics in terahertz transmission through a split ring resonator-based metamaterial [9544-96]

9544 2V  Shaping the light distribution of strongly focused systems for efficient excitation of optical nano-circuits [9544-99]

9544 2W  Quantum toroidal moments of nanohelix eigenstates [9544-100]

9544 2X  Mie resonance in the arrays of dielectric rods in air [9544-101]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs
Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Co-chairs
David L. Andrews, University of East Anglia (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs
Nader Engheta, University of Pennsylvania (United States)
Mikhail A. Noginov, Norfolk State University (United States)
Nikolay I. Zheludev, University of Southampton (United Kingdom)
and Nanyang Technological University (Singapore)

Conference Program Committee
Andrea Alù, The University of Texas at Austin (United States)
David L. Andrews, University of East Anglia (United Kingdom)
Pierre Berini, University of Ottawa (Canada)
Alexandra Boltasseva, Purdue University (United States)
Igal Brener, Sandia National Laboratories (United States)
Mark Brongersma, Stanford University (United States)
Che Ting Chan, Hong Kong University of Science and Technology (Hong Kong, China)
Hongsheng Chen, Zhejiang University (China)
Jennifer A. Dionne, Stanford University (United States)
Harald W. Giessen, Universität Stuttgart (Germany)
Yuri S. Kivshar, The Australian National University (Australia)
Jacob B. Khurgin, Johns Hopkins University (United States)
Uriel Levy, The Hebrew University of Jerusalem (Israel)
Natalia M. Litchinitser, University at Buffalo (United States)
Martin W. McCall, Imperial College London (United Kingdom)
Albert Polman, FOM Institute for Atomic and Molecular Physics (Netherlands)
Gennady B. Shvets, The University of Texas at Austin (United States)
David R. Smith, Duke University (United States)
Costas M. Soukoulis, Iowa State University (United States)
Mark I. Stockman, Georgia State University (United States)
Philippe Tassin, Chalmers University of Technology (Sweden)
Sergei Tretyakov, Aalto University School of Science and Technology (Finland)
Din Ping Tsai, National Taiwan University (Taiwan)
Augustine M. Urbas, Air Force Research Laboratory (United States)
Martin Wegener, Karlsruher Institut für Technologie (Germany)
Xiang Zhang, University of California, Berkeley (United States)

Session Chairs

NanoScience + Engineering Plenary Session
Satoshi Kawata, Osaka University (Japan)
David L. Andrews, University of East Anglia (United Kingdom)

1 Toroids and Vortices
Mikhail A. Noginov, Norfolk State University (United States)

2 Active Metamaterials I
Philippe Tassin, Chalmers University of Technology (Sweden)

3 Active Metamaterials II
Zubin Jacob, University of Alberta (Canada)

4 Control of Physical Phenomena with Metamaterials
Mikhail Lapine, University of Technology, Sydney (Australia)

5 Hyperbolic Metamaterials I
Luca Alloatti, Massachusetts Institute of Technology (United States)

6 Atomic Scale Metamaterials
Natalia M. Litchinitser, University at Buffalo (United States)

7 Dielectric and Semiconductor Metamaterials
Adil-Gerai Kussow, University of Massachusetts Lowell (United States)

8 Hyperbolic Metamaterials II
Adil-Gerai Kussow, University of Massachusetts Lowell (United States)

9 Mid Infrared and Thermal
Viktor A. Podolskiy, University of Massachusetts Lowell (United States)

10 Manipulating Light with Metamaterials
Joshua D. Caldwell, U.S. Naval Research Laboratory (United States)

11 Metadevices and Metasystems I
Ertugrul Cubukcu, University of Pennsylvania (United States)

12 Metadevices and Metasystems II
Alberto Piqué, U.S. Naval Research Laboratory (United States)
13 Randomness and Fluctuations
   Zhaozhu Li, The College of William & Mary (United States)

14 Metasurfaces I
   Andrey K. Sarychev, Institute for Theoretical and Applied
   Electrodynamics (Russian Federation)

15 Metasurfaces II
   Mayer A. Landau, Air Force Research Laboratory (United States)

16 Metasurfaces III
   Arseniy I. Kuznetsov, A*STAR - Data Storage Institute (Singapore)

17 Novel Phenomena and Methods
   Xingjie Ni, University of California, Berkeley (United States)

18 Low-Frequency Materials
   David Wilkowski, Nanyang Technological University (Singapore)
