SPIE

Volume 9982
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/16/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-12, 20-22, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

### SESSION 1  WAVEFRONT SENSING

| 9982 02 | Wavefront measurement of vortex beam using ptychographic phase retrieval [9982-2] |
| 9982 03 | Wavefront reconstruction based on quadrant binary phase plate with single far field [9982-3] |
| 9982 04 | Design of wide-field imaging shack Hartmann testbed [9982-4] |
| 9982 05 | Wavefront sensing for anisotropic turbulence using digital holography [9982-5] |
| 9982 06 | Wavefront phase retrieval with multi-aperture Zernike filter for atmospheric sensing and adaptive optics applications [9982-22] |

### SESSION 2  IMAGE PROCESSING AND WAVEFRONT CORRECTION

| 9982 08 | Digital holography wavefront sensing in the pupil-plane recording geometry for distributed-volume atmospheric aberrations [9982-6] |
| 9982 09 | Comparison of polychromatic wave-optics models [9982-7] |
| 9982 0A | Predictive dynamic digital holography [9982-8] |
| 9982 0C | Shadow imaging of geosynchronous satellites: simulation, image reconstruction, and shadow prediction [9982-10] |
| 9982 0D | Numerical techniques for analysis of joint impact of atmospheric turbulence and aerosol scattering effects on imaging systems [9982-12] |

### SESSION 3  ACTIVE IMAGING

| 9982 0E | Waveguide generated mitigation of speckle and scintillation on an actively illuminated target [9982-13] |
| 9982 0F | Inverse synthetic aperture LADAR image construction: an inverse model-based approach [9982-14] |
| 9982 0G | Optimal speckle noise reduction filter for air-to-ground range gated laser illuminated imaging [9982-15] |
Adaptive compensation of a direct liquid-cooled solid-state MOPA system [9982-16]

Image reconstruction for coherent imaging for space surveillance and directed energy applications [9982-17]

Speckle imaging from an array [9982-18]

SESSION 4 SPACE OBJECT DETECTION AND ADVANCED PROCESSING

Improved space object detection via scintillated short exposure image data [9982-19]

Improving space object detection using a Fourier likelihood ratio detection algorithm [9982-20]

SESSION 5 PERFORMANCE CHARACTERIZATION

POAM in starlight: seven years of SAM measurements [9982-23]

The RACHL Experiment: an overview [9982-24]

Estimation of Kolmogorality through isotropy [9982-25]

POSTER SESSION

Space object detection using Poisson distributed vector projections [9982-29]

Wavefront analysis from backscattering phase in rough surfaces [9982-31]

Space object detection: receiver operating characteristics for Poisson and normally distributed data [9982-32]

Statistically Applied Non-Uniformity Correction (SANUC) [9982-33]

Analysis of the multi-hypothesis test for determining pointing angles for telescopes [9982-34]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chairs

Stephen M. Hammel, Space and Naval Warfare Systems Command (United States)
Alexander M. J. van Eijk, TNO Defence, Security and Safety (Netherlands)

Conference Chairs

Jean J. Dolne, The Boeing Company (United States)
Thomas J. Karr, Defense Advanced Research Projects Agency (United States)
David C. Dayton, Applied Technology Associates (United States)

Conference Program Committee

Stephen C. Cain, Air Force Institute of Technology (United States)
James Fienup, University of Rochester (United States)
Wes D. Freiwald, Pacific Defense Solutions, LLC (United States)
Richard B. Holmes, Boeing LTS Inc. (United States)
Liren Liu, Shanghai Institute of Optics and Fine Mechanics (China)
Zhaowei Liu, University of California, San Diego (United States)
Sergio R. Restaino, U.S. Naval Research Laboratory (United States)
Michael C. Roggemann, Michigan Technological University (United States)
Mark F. Spencer, Air Force Research Laboratory (United States)
Robert K. Tyson, The University of North Carolina at Charlotte (United States)
David G. Voelz, New Mexico State University (United States)

Session Chairs

1 Wavefront Sensing
   David C. Dayton, Applied Technology Associates (United States)

2 Image Processing and Wavefront Correction
   Jean J. Dolne, The Boeing Company (United States)

3 Active Imaging
   Thomas J. Karr, Defense Advanced Research Projects Agency (United States)
4 Space Object Detection and Advanced Processing
Victor L. Gamiz, Air Force Research Laboratory (United States)

5 Performance Characterization
Richard B. Holmes, Boeing LTS Inc. (United States)
