<td>Photonics and Lasers</td>
</tr>
<tr>
<td>9948 0J</td>
<td>Determination of mean square deviation of surface roughness in a planar gradient optical waveguide [9948-18]</td>
</tr>
<tr>
<td>9948 0K</td>
<td>Improving spectrometer field of view correction with a freeform surface [9948-19]</td>
</tr>
<tr>
<td>9948 0L</td>
<td>Discussing design for manufacturability for two freeform imaging systems [9948-20]</td>
</tr>
<tr>
<td>9948 0M</td>
<td>Design of compact optical systems using multichannel configurations [9948-21]</td>
</tr>
<tr>
<td>9948 0N</td>
<td>Resolution limits of pixellated optical components [9948-22]</td>
</tr>
<tr>
<td>9948 0O</td>
<td>Digital integral cloaking [9948-23]</td>
</tr>
<tr>
<td><strong>SESSION 7</strong></td>
<td>Computational Imaging</td>
</tr>
<tr>
<td>9948 0T</td>
<td>Design and calibration of a wide field of view MWIR optically multiplexed imaging system [9948-28]</td>
</tr>
<tr>
<td>9948 0U</td>
<td>Multiple beam ptychography for large field of view imaging [9948-29]</td>
</tr>
<tr>
<td><strong>SESSION 8</strong></td>
<td>Optics and Sound</td>
</tr>
<tr>
<td>9948 0W</td>
<td>Modeling of an optocoupler-based audio dynamic range control circuit [9948-31]</td>
</tr>
<tr>
<td>9948 0X</td>
<td>Generation of rhythm patterns from harmonic structures in power modulated light [9948-32]</td>
</tr>
<tr>
<td>9948 0Y</td>
<td>Optical techniques for sound processing (Invited Paper) [9948-33]</td>
</tr>
</tbody>
</table>
POSTER SESSION

9948 0Z  A refractometer based on a sinusoidal grating [9948-35]

9948 11  Graphical selection of optical glasses using iterative method from an expanded athermal glass map for an athermal and achromatic design [9948-37]

9948 13  Parallel compressed sensing super-resolution imaging via using multiply scattering medium [9948-39]

9948 14  Methods of optimizing the speed and accuracy of optical complex guidance systems based on equivalence of automatic control system domain of attraction and unconditional stability of their equivalent circuits [9948-40]

9948 15  A novel high spatial resolution recording method of far-infrared digital hologram based on vanadium dioxide film [9948-41]

9948 18  Stereo matching image processing by the fixed pixels period sampling edge detection and the characteristic band area construction [9948-44]

9948 1A  Optical design of three-dimensional digital ophthalmoscopes [9948-46]

9948 1B  Compact wide-field off-axis two-mirror system with field corrector [9948-47]

9948 1C  A novel method to optimize a Galvo-Scanner used in optical imaging systems to minimize the artifacts in the images generated [9948-48]

9948 1D  Optical chaos generation and frequency pulling effects through external input signal in nonlinear delayed feedback system using VICSEL [9948-49]

9948 1E  A smart grid technology for electrical power transmission lines by a self-organized optical network using LED [9948-50]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chairs

José Sassián, College of Optical Sciences, The University of Arizona (United States)
R. John Koshel, College of Optical Sciences, The University of Arizona (United States)

Conference Chairs

Arthur J. Davis, ORAFOL Americas, Inc. (United States)
Cornelius F. Hahlweg, bbw Hochschule (Germany)
Joseph R. Mulley, Melles Griot (United States)

Conference Program Committee

Francois Callewaert, Northwestern University (United States)
Joseph S. Choi, University of Rochester (United States)
Yi Chin Fang, National Kaohsiung First University of Science and Technology (Taiwan)
Peter I. Goldstein, Philips Color Kinetics (United States)
G. Groot Gregory, Synopsys, Inc. (United States)
Eric Herman, The Aerospace Corporation (United States)
R. John Koshel, College of Optical Sciences, The University of Arizona (United States)
Scott A. Lerner, Carl Zeiss AG (Germany)
Bharathwaj Appan Narasimhan, CeDInt-UPM (Spain)
Craig Olson, L-3 Communications (United States)
Jeffrey J. Perkins, Q-Peak (United States)
José Sasián, College of Optical Sciences, The University of Arizona (United States)
David L. Shealy, The University of Alabama at Birmingham (United States)
R. Hamilton Shepard III, MIT Lincoln Laboratory (United States)
Haiyin Sun, ChemImage Corporation (United States)
Udo Zölzer, Helmut-Schmidt-Universität (Germany) and Universität der Bundeswehr München (Germany)
Session Chairs

1 Displays
   Joseph S. Choi, University of Rochester (United States)

2 Optimization/Simulation
   Eric Herman, The Aerospace Corporation (United States)

3 Hyperspectral/UV/IR Systems
   R. Hamilton Shepard III, MIT Lincoln Laboratory (United States)

4 Instrumentation and Camera Systems
   Craig Olson, L-3 Communications (United States)

5 Freeform and Unconventional Optics
   R. John Koshel, College of Optical Sciences, The University of Arizona (United States)

6 Photonics and Lasers
   G. Groot Gregory, Synopsys, Inc. (United States)

7 Computational Imaging
   Udo Zölzer, Helmut-Schmidt-Universität (Germany)

8 Optics and Sound
   Yi Chin Fang, National Kaohsiung First University of Science and Technology (Taiwan)
Introduction

The nineteenth annual conference for Novel Optical Systems Design and Optimization was held in San Diego, California this year. Our technical sessions included tracks on Displays; Optimization/Simulation; Hyperspectral/UV/IR Systems; Instrumentation and Camera Systems; Freeform and Unconventional Optics; Photonics and Lasers; Computational Imaging; and Optics and Sound. In addition, there was a poster session, a joint Optical Engineering Plenary Session and Technical Group Events.

The session on Displays had interesting presentations on futuristic display technologies such as glasses-free 3D displays and transparent glass display panels. Optimization and Simulation included the novel application of the instantaneous Abbe Number for athermalization; optimization of GRINs without raytracing; and the simulation of photography for a camera moving near the speed of light. In Hyperspectral/UV/IR Systems we saw new and interesting approaches to hyperspectral imaging and 3D IR imaging. The Instrumentation and Camera Systems session demonstrated progress toward fully 3D-printed optical instrumentation and contemporary methods for tracking ballistic projectiles. In Freeform and Unconventional Optics, we saw further developments in using freeform surfaces in imaging applications, helmet-mounted displays and visible-spectrum cloaking. We had our first ever presentations in the area of Novel Photonics in our Photonics and Laser session, where a promising technique for optimizing next-generation photonic structures was shown. The Computational Imaging session presented some interesting techniques for increasing the field of view of an IR camera and optics-free diffraction-limited imaging. Finally, the Optics and Sound session included some fascinating light modulation visualizations for sound and an informative look at how optics are used in various audio technologies.

Our conference had two invited papers this year. Our thanks to Uwe Chalupka from Helmut-Schmidt University for his presentation on measuring projectile trajectories. Also thanks to Udo Zölzer for a very nice summary on the state of the art of optical techniques used for sound processing.

We are very grateful to those who helped make this conference a success, especially the authors, audience, SPIE staff, and program committee. The SPIE staff ensured that everything ran smoothly before, during, and after the meeting. The program committee provided excellent assistance to ensure the quality of the content while also presiding over a number of the sessions. Our Session Chairs were Joseph Choi, Yi Chin Fang, G. Groot Gregory, Eric Herman, R. John Koshel, Craig Olson, R. Hamilton Shepard and Udo Zölzer. Thanks to them for keeping our conference running smoothly and on time. Also thanks to everyone else on our Program Committee for helping review the Abstracts and Paper Submissions: Haiyin
Sun, Bharathwaj Narasimhan, David Shealy, Jeffrey Perkins, Peter Goldstein, Jose Sasian and Scott Lerner.

Next year we will return for our twentieth conference. The chairs will be Arthur Davis, Cornelius Hahlweg and Joseph Mulley. We look forward to seeing you in 2017!

Arthur J. Davis
Cornelius F. Hahlweg
Joseph R. Mulley
