Part One

OPTICAL MEASUREMENT TECHNOLOGY AND INSTRUMENTATION

10155 01  Recent progress of photodetectors based on MX₂/graphene van der Waals heterostructures [10155-1]
10155 02  A design of an optoelectronic isolation device to protect the measurement system of the underwater discharge acoustic source [10155-2]
10155 03  Random errors in DIC caused by non-uniform image noise [10155-4]
10155 04  Design of a photoelastic modulator in the spin-exchange relaxation-free magnetometer [10155-5]
10155 05  Study the multi-band co-caliber infrared system optimize design and quantitative measurement [10155-6]
10155 06  Construction of dark spherical spot array using an amplitude-modulated radially polarized beam [10155-7]
10155 07  An adaptive line enhancement method for UWB proximity fuze signal processing based on correlation matrix estimation with time delay factor [10155-8]
10155 08  Research of the penetration gas methods of measuring barrier property of OLED packaging materials by mass spectrometry [10155-9]
10155 09  Discrimination of three typical amino acids using PARAFAC [10155-10]
10155 0A  Variable aberration generator using a high-order even aspheric singlet for testing optical surfaces [10155-11]
10155 0B  Q-adjusting technique applied to vertical deflections estimation in a single-axis rotation INS/GPS integrated system [10155-12]
10155 0C  Measurements of density, pressure and temperature in the middle atmosphere with Rayleigh lidar [10155-14]
Filtered back-projection reconstruction of photoacoustic imaging based on a modified wavelet threshold function

Evaluation of the user experience of "astronaut training device": an immersive, VR-based, motion-training system

Random error model and experiment of fiber Bragg grating acceleration sensing system

Goos-Hänchen shifts at a resonance angle of a two-prism structure using COMSOL multiphysics

Status of astigmatism-corrected Czerny-Turner spectrometers

A FBG pulse wave demodulation method based on PCF modal interference filter

Dynamic X-ray phase imaging based on an aperture array

Refractive index sensing characteristics of D-shape double core photonic crystal fiber based on surface plasmon resonance

Novel glucose fiber sensor combining ThFBG with GOD

Optical skin friction measurement technique in hypersonic wind tunnel

An endoscope designed with 3D measurement functions

Distributed acoustic sensing system using an identical weak fiber Bragg grating array

Research on the calibration of ultraviolet energy meters

Time-resolved fluorescence spectroscopy of oil spill detected by ocean lidar

Design on wireless auto-measurement system for lead rail straightness measurement based on PSD

A focal plane metrology system and PSF centroiding experiment

Modular interference characteristics and beat length of a two-hole photonic crystal fiber

Theoretical analysis and estimation of decorrelation phase error in digital holographic interferometry

Experimental evidence for formation mechanism of regular circular fringes

Research on method and device of non-disperse atomic fluorescence excitation light source impurity detection

Design and realization of photoelectric instrument binocular optical axis parallelism calibration system
New time-domain three-point error separation methods for measurement roundness and spindle error motion [10155-43]

Design and experiment of an adjustable full polarization imaging measurement system [10155-42]

Two-dimensional imaging of gas temperature and concentration based on hyperspectral tomography [10155-44]

Tolerance analysis on diffraction efficiency and polychromatic integral diffraction efficiency for harmonic diffractive optics [10155-46]

Multi-platform laser communication networking optical antenna system design [10155-47]

Spectral responsivity calibration of silicon photodetectors using monochromator-based cryogenic radiometer [10155-49]

Phase retrieval based on cosine grating modulation and transport of intensity equation [10155-51]

Measurement system for lens thickness based on low-coherent fiber-optic interferometry [10155-52]

Analyzing the structure of the optical path difference of the supersonic film cooling [10155-53]

Accuracy of a reference instrument for specular gloss measurements [10155-54]

Study of laser energy standard and establishment of calibration device [10155-55]

Beam shaping in flow cytometry with diffractive optical elements [10155-56]

Design of wavefront coding optical system with annular aperture [10155-58]

Analysis of wavelength error in spectral phase shifting of digital holographic microscopy [10155-57]

3D shape reconstruction of specular surfaces by using phase measuring deflectometry [10155-59]

A method to enhance the measurement accuracy of Raman shift based on high precision calibration technique [10155-60]

Injection molding lens metrology using software configurable optical test system [10155-62]

Theoretical research and comparison of forces in optical tweezers based on ray optics method and T matrix method [10155-63]

Experiment of inverse synthetic aperture ladar at 1.1km [10155-64]

Vibration measurement based on the optical cross-correlation technique with femtosecond pulsed laser [10155-66]
The simulation and experiment research of harmonic signals based on wavelength modulation spectroscopy [10155-67]

Calibration of angle of incidence of ellipsometer by autocollimator-based method [10155-68]

Numerical simulation research on wind field disturbance detecting with coherent laser [10155-69]

Beam-forming oriented shape estimation of optical fiber sensor array [10155-70]

Measurements and analysis of solar direct irradiance-meter on Dunhuang radiometric calibration sites [10155-71]

Determining the nonlinear refractive index of fused quartz by femtosecond laser Z-scan technology [10155-72]

Design of adjustable laser beam high-resolution particle size measuring lens [10155-74]

Research on effect of reconstructed image quality in laser reflective tomography imaging [10155-75]

Measurement of excited layer thickness in highly photo-excited GaAs [10155-76]

Development and application of an automated precision solar radiometer [10155-79]

Application of chromatic confocal displacement sensor in measurement of tip clearance [10155-78]

A zero-crossing point locking system in the time-of-flight measurement of femtosecond pulsed laser [10155-82]

Development of high precision digital driver of acoustic-optical frequency shifter for ROG [10155-83]

Experimental investigation on aero-optical aberration of shock wave/boundary layer interactions [10155-84]

Research of spectacle frame measurement system based on structured light method [10155-85]

A new optical flat surface measurement method based on machine vision and deflectometry [10155-86]

Part Two

Application of double laser interferometer in the measurement of translational stages’ roll characteristics [10155-87]

Method for the fabrication error calibration of the CGH used in the cylindrical interferometry system [10155-88]

10155 34  Method of recognizing the high-speed railway noise barriers based on the distance image [10155-139]
10155 35  Research on measurement method of optical camouflage effect of moving object [10155-140]
10155 36  Alignment method of optical registration for multi-channel CCD camera [10155-142]
10155 37  Design of noise barrier inspection system for high-speed railway [10155-143]
10155 38  A defocus-information-free autostereoscopic three-dimensional (3D) digital reconstruction method using Direct Extraction of Disparity Information (DEDI) [10155-144]
10155 39  Wavefront reconstruction algorithm based on interpolation coefficients for radial shearing interferometry [10155-145]
10155 3A  Design of spectrally tunable calibration source based on Digital Micromirror Device (DMD) [10155-146]
10155 3B  Phase distortion of a probe beam transmitting through a transparent medium bulk [10155-147]
10155 3C  Combining depth and gray images for fast 3D object recognition [10155-148]
10155 3D  Beam hardening correction for interior tomography based on exponential formed model and radon inversion transform [10155-149]
10155 3E  Simulation of laser bistatic two-dimensional scattering imaging about lambertian cylinders [10155-151]
10155 3F  Use of the fluorescence of rhodamine B for the pH sensing of a glycine solution [10155-150]
10155 3G  Synthetic aperture LADAR at 1550 nm: system demonstration, imaging processing and experimental result [10155-152]
10155 3H  The microstructure measurement of surface defects of optical component based on digital image-plane holographic microscopy [10155-154]
10155 3I  Extinction characteristic of graphite smoke for terahertz wave [10155-153]
10155 3J  Object reconstruction from thermal and shot noises corrupted block-based compressive ultra-low-light-level imaging measurements [10155-155]
10155 3K  Study on design and experiment of safe illumination system based on optical fiber guiding light [10155-156]
10155 3L  A segmental dispersion compensation method to improve axial resolution of specified layer in FD-OCT [10155-157]
10155 3M  Error analysis of standard wave-front reconstruction based on spatial light modulator [10155-158]
10155 3N Steady-state and time-resolved fluorescence spectroscopic studies on the interaction between bovine serum albumin and Ag-nanoparticles [10155-159]

10155 3O Variable angle transmittance of silver grid transparent electrodes [10155-160]

10155 3P Measurement accuracy analysis for crystal plane spacing of nitride epitaxial layer by x-ray diffraction [10155-161]

10155 3Q Method to fabricate orthogonal crossed gratings by an interference fringe based alignment technique [10155-163]

10155 3R Characterization of Akiyama probe applied to dual-probes atomic force microscope [10155-164]

10155 3S Model-based x-ray energy spectrum estimation algorithm from CT scanning data with spectrum filter [10155-165]

10155 3T Fixtureless nonrigid part inspection using depth cameras [10155-167]

10155 3U Analysis of the mechanics and deformation characteristics of optical fiber acceleration sensor [10155-168]

10155 3V Digital holographic imaging for diffuse-reflection metal surface with strong feature [10155-169]

10155 3W Development of automated self-calibration spectra-radiometer [10155-170]

10155 3X S-F graphic representation analysis of photoelectric facula focometer poroo-plate glass [10155-171]

10155 3Y Dynamic three-dimensional shape measurement for specular freeform surfaces with the quaternary orthogonal grid fringes [10155-172]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the International Symposium on Optical Measurement Technology and Instrumentation. It was truly a great pleasure for us to greet the more than 1000 participants from many different countries who attended the symposium. We firmly believe the symposium will become an important international event in the field of optical technology.

The International Symposium on Optical Measurement Technology and Instrumentation was sponsored by the Chinese Society for Optical Engineering and China High-tech Industrialization Association (CHIA), organized by Chinese Society for Optical Engineering (CSOE), Photo-electronic Technology Committee, Chinese Society of Astronautics, Photo-electronic Industrialization Committee, CHIA, and Department of Cooperation and Coordination for Industry, Academe, and Research, CHIA.

The purpose of the symposium is to provide a forum for the participants to report and review the innovative ideas and up-to-date progress and developments, and discuss the novel approaches to application in the optical field. It is sincerely hoped that the research and development in optical field will be promoted, and the international cooperation sharing the common interest will be enhanced.

On behalf of other co-chairmen, and the Organization Committee, we would like to heartily thank our sponsors and cooperating organizers for all they have done for the symposium. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the symposium possible, to the Program Committee for their effective work and valuable advice, especially the Secretariat, and to the SPIE staff for their tireless efforts and outstanding service in preparing and publishing the proceedings.
